

# Chi H. Le, MD, MS

Neurology Resident, Class of 2029  
Department of Neurology  
Icahn School of Medicine at Mount Sinai

Clinical and Academic Interests in  
**Neuro-Oncology, Vascular and Endovascular  
Neurosurgery, Global Neurosurgery**

## What made me choose Mount Sinai...

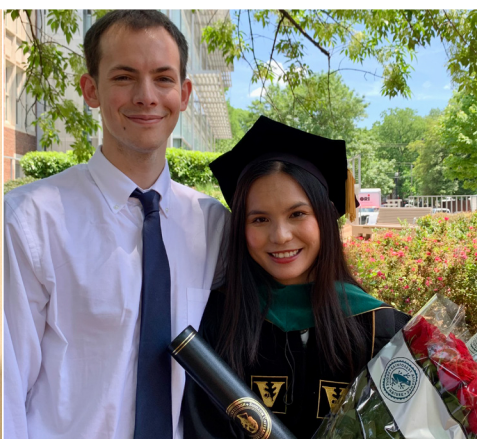

Through my sub-internship at Mount Sinai, I experienced the supportive training environment with an emphasis on teaching, mentorship, and innovation. The operative experience is phenomenal with a focus on clinical autonomy. The faculty are not only renowned surgeons but also incredible mentors in guiding residents to carve their own paths in neurosurgery. Moreover, there are ample resources to further my interests in clinical informatics and global health during residency. As an aspiring academic neurosurgeon, I feel incredibly privileged to train at Mount Sinai and be part of a great team for the next 7 years.
