

# TUBE GUIDE

COLLECTION TUBES	ADDITIVE	USES
<b>GOLD/ SPECKLED</b> 	None (Serum separator tube)	<ul style="list-style-type: none"> <li>- Chemistries</li> <li>- Immunology</li> <li>- Serology</li> </ul>
<b>LIGHT GREEN</b> 	Lithium heparin (Plasma separator tube)	<ul style="list-style-type: none"> <li>- Chemistries</li> </ul>
<b>LAVENDER</b> 	EDTA	<ul style="list-style-type: none"> <li>- Hematology (CBC)</li> <li>- FK506;</li> <li>- Molecular testing</li> </ul>
<b>LIGHT BLUE</b> 	Sodium citrate	<ul style="list-style-type: none"> <li>- Coagulation tests (PT and PTT) - <b>full draw</b></li> </ul>
<b>LIGHT BLUE (white ring on top)</b> 	Sodium citrate	<ul style="list-style-type: none"> <li>- For use with VerifyNow analyzers (physician must request these special tubes directly from the lab)</li> </ul>
<b>DARK GREEN</b> 	Sodium heparin or Lithium heparin	<ul style="list-style-type: none"> <li>- For lithium level, use sodium heparin</li> <li>- Troponin</li> <li>- Flow cytometry</li> </ul>
<b>DARK BLUE</b> 	EDTA	<ul style="list-style-type: none"> <li>- Trace element testing (zinc, copper, lead, mercury)</li> <li>- Toxicology</li> </ul>
<b>GRAY</b> 	Sodium fluoride and potassium oxalate	<ul style="list-style-type: none"> <li>- Glucose (requires <b>full draw</b>)</li> </ul>
<b>YELLOW</b> 	ACD (Acid-Citrate-Dextrose)	<ul style="list-style-type: none"> <li>- HLA tissue typing</li> <li>- Paternity Testing</li> <li>- DNA studies</li> </ul>
<b>YELLOW/BLACK</b> 	Broth mixture	<ul style="list-style-type: none"> <li>- Microbiology – aerobes, anaerobes, fungi</li> </ul>
<b>PINK</b> 	EDTA	<ul style="list-style-type: none"> <li>- Blood Bank type and screen</li> <li>- Crossmatching</li> </ul>
<b>PEARL(WHITE)</b> 	EDTA WITH GEL	<ul style="list-style-type: none"> <li>- Viral load testing (HIV,HCV,HBV,CMV)</li> </ul>
<b>TAN</b> 	Sodium heparin	<ul style="list-style-type: none"> <li>- Serum lead determination</li> </ul>
