

**Funding Opportunities Monthly Edition
Dec 2023 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Dec 2023. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
106316	Emerging Global Leader Award (K43 Independent Clinical Trial Required)	Fogarty International Center/NIH/DHHS	PAR-21-251	03-Oct-2023 [Optional][LOI/Pre-App]	525,000 USD
	<p>Contact Name Christine Jessup, Ph.D</p> <p>Contact Telephone 301-496-1653</p> <p>Contact Email Christine.Jessup@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 03-Oct-2023 [Optional][LOI/Pre-App], 03-Nov-2023 , 11-Dec-2023</p> <p>Synopsis The purpose of the Fogarty Emerging Global Leader Award is to provide research support and protected time (three to five years) to an early career research scientist from a low- or middle-income country (LMIC) who holds a junior faculty position at an LMIC academic or research institution, as defined by the World Bank (http://data.worldbank.org/about/country-classifications/country-and-lending-groups, including “low-income,” “lower-middle-income,” and “upper-middle-income” countries). This intensive, mentored research career development experience is expected to lead to an independently funded research career at the LMIC institution or in another LMIC. This Funding Opportunity Announcement (FOA) invites applications from LMIC scientists from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of their country under the mentorship of LMIC and U.S. mentors. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA PAR-21-252.</p>				
106317	Emerging Global Leader Award (K43 Independent Clinical Trial Not Allowed)	Fogarty International Center/NIH/DHHS	PAR-21-252	03-Oct-2023 [Optional][LOI/Pre-App]	525,000 USD
	<p>Contact Name Christine Jessup, Ph.D</p> <p>Contact Telephone 301-496-1653</p> <p>Contact Email Christine.Jessup@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p>

	<p>Deadline Dates (ALL) 03-Oct-2023 [Optional][LOI/Pre-App], 03-Nov-2023 , 11-Dec-2023</p> <p>Synopsis The purpose of the Fogarty Emerging Global Leader Award is to provide research support and protected time (three to five years) to an early career research scientist from a low- or middle-income country (LMIC) who holds a junior faculty position at an LMIC academic or research institution, as defined by the World Bank (http://data.worldbank.org/about/country-classifications/country-and-lending-groups, including “low-income,” “lower-middle-income,” and “upper-middle-income” countries). This intensive, mentored research career development experience is expected to lead to an independently funded research career at the LMIC institution or in another LMIC. This Funding Opportunity Announcement (FOA) invites applications from LMIC scientists from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of their country under the mentorship of LMIC and U.S. mentors. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA PAR-21-251.</p>				
113621	<p>RFA-CA-22-057 -- Basic/Translational Research on Health Disparities in Underrepresented People Living with HIV (PLWH) and Cancer (R21 Clinical Trial Not Allowed)</p>	National Cancer Institute/NIH/DHHS	RFA-CA-22-057	15-Nov-2023 [Optional][LOI/Pre-App]	275,000 USD
	<p>Contact Name Elizabeth L. Read-Connole, Ph.D.</p> <p>Contact Telephone 240-276-6190</p> <p>Contact Email bconnole@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Nov-2023 [Optional][LOI/Pre-App], 15-Dec-2023</p> <p>Synopsis Through this funding opportunity announcement, the National Cancer Institute (NCI) intends to focus on the biological interactions of cancer health disparities in people living with HIV (PLWH) from underrepresented minority groups through basic mechanistic or translational studies to investigate how HIV interacts with health disparities to promote both non-AIDS and AIDS-defining cancer initiation, progression, and the resulting pathogenic disease sequelae.</p>				
113620	<p>RFA-CA-22-056 -- Basic/Translational Research on Health Disparities in Underrepresented People Living with HIV (PLWH) and Cancer (R01 Clinical Trial Not Allowed)</p>	National Cancer Institute/NIH/DHHS	RFA-CA-22-056	15-Nov-2023 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Elizabeth L. Read-Connole, Ph.D.</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Telephone 240-276-6190</p> <p>Contact Email bconnole@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Nov-2023 [Optional][LOI/Pre-App], 15-Dec-2023</p> <p>Synopsis Through this funding opportunity announcement, the National Cancer Institute (NCI) intends to focus on the biological interactions of cancer health disparities in people living with HIV (PLWH) from underrepresented minority groups through basic mechanistic or translational studies to investigate how HIV interacts with health disparities to promote both non-AIDS and AIDS-defining cancer initiation, progression, and the resulting pathogenic disease sequelae.</p>				
117530	<p>RFA-CA-23-033 -- Implementation Science for Cancer Control in People Living with HIV in Low- and Middle-Income Countries (U01 Clinical Trial Optional)</p>	National Cancer Institute/NIH/DHHS	RFA-CA-23-033	15-Nov-2023 [Optional][LOI/Pre-App]	2,500,000 USD
	<p>Contact Name Vidya Vedham, Ph.D.</p> <p>Contact Telephone 240-276-7272</p> <p>Contact Email vidya.vedham@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Nov-2023 [Optional][LOI/Pre-App], 15-Dec-2023</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to support Implementation Science for Cancer Control in People Living with HIV (PLWH) in Low- and Middle-Income Countries (LMICs) to accelerate the integration of evidence-based cancer control interventions for PLWH by leveraging existing HIV treatment and prevention infrastructure. Specifically, this NOFO solicits applications that will identify, understand, and develop strategies to address barriers to the adoption, integration, and sustainability of evidence-based cancer control interventions among PLWH in LMICs and generate data in LMICs that can inform effective and equitable implementation of evidence-based cancer control for PLWH worldwide. Responsive applications should include multi-disciplinary teams of researchers with expertise in HIV, cancer, and implementation science to address the cancer control needs of PLWH populations specific to the proposed LMIC context.</p>				
106733	<p>Notice of Special Interest (NOSI): Dietary Effects on Nutrient Sensing Pathways in Tumor Etiology and Prevention</p>	National Cancer Institute/NIH/DHHS	NOT-CA-21-121	26-Sep-2023	Not Specified
	<p>Contact Name Phillip J. Daschner, MSc</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Telephone 240-276-6227</p> <p>Contact Email pd93u@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Oct-2023 , 12-Oct-2023 , 25-Oct-2023 , 28-Dec-2023 , 07-Jan-2024 , 05-Feb-2024 , 12-Feb-2024 , 25-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 12-Jun-2024 , 25-Jun-2024 , 07-Sep-2024</p> <p>Synopsis This Notice of Special Interest (NOSI) seeks to support new and ongoing basic research that provides a deeper understanding of the biology and molecular mechanisms that determine the outcome of key diet/nutrient/cell interactions during early tumor development. Specifically, studies that examine the tumor preventive or tumor-promoting effects of dietary modulation of nutrient sensor signaling pathways during early tumor formation (initiation and malignant progression from early lesions) in preclinical cell, organoid, and animal models, with the goal of identifying and testing potential molecular intervention targets.</p>				
117714	Notice of Special Interest (NOSI): RNA Modifications in Cancer Biology	National Cancer Institute/NIH/DHHS	NOT-CA-23-060	26-Sep-2023	Not Specified
	<p>Contact Name Stefan Maas, Ph.D.</p> <p>Contact Telephone 240-276-6230</p> <p>Contact Email stefan.maas@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Oct-2023 , 12-Oct-2023 , 16-Oct-2023 , 28-Dec-2023 , 07-Jan-2024 , 05-Feb-2024 , 12-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 05-Jun-2024 , 12-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 05-Oct-2024 , 12-Oct-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 12-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 12-Jun-2025 , 16-Jun-2025 , 07-Sep-2025 , 05-Oct-2025 , 12-Oct-2025 , 16-Oct-2025 , 07-Jan-2026</p> <p>Synopsis Through this Notice of Scientific Interest (NOSI), the National Cancer Institute intends to stimulate research on the role of RNA modifications in the area of cancer biology. Despite the recognition that RNA modifications and editing exert a substantial impact on gene expression and function, there is a lack of mechanistic insights into the dynamic regulation of RNA modifications and their de-regulation as drivers of cancer formation. A better understanding of the extent, diversity, and crosstalk between different types of RNA modification, and the elucidation of the molecular players that read and interpret the modification code are needed to reveal the mechanisms of RNA modifications that underlie cancer formation and the cancer phenotype.</p>

		Prevention and Tobacco Control Act (FSPTCA). The award under this NOFO will be administered by NIH using designated funds through an interdepartmental delegation of authority (IDDA) from the FDA Center for Tobacco Products (CTP) for tobacco regulatory science mandated by the FSPTCA. Funds for this program have been made available through the FSPTCA (P.L. 111-31).			
108323	Notice of Special Interest (NOSI): Disparities Affecting Healthcare Utilization and Health Outcomes Among Childhood Cancer Survivors	National Cancer Institute/NIH/DHHS	NOT-CA-22-029	26-Sep-2023	Not Specified
	Contact Name	Veronica Chollette, RN, MS			
	Contact Telephone	240-276-6969			
	Contact Email	cholletv@mail.nih.gov			
	Sponsor Website				
	Program URL	Link to program URL			
	Deadline Dates (ALL)	05-Oct-2023 , 09-Oct-2023 , 16-Oct-2023 , 05-Nov-2023 , 28-Dec-2023 , 07-Jan-2024 , 25-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-Mar-2024 , 07-May-2024 , 25-May-2024 , 05-Jun-2024 , 07-Jun-2024 , 16-Jun-2024 , 25-Sep-2024 , 08-Oct-2024			
	Synopsis	The purpose of this Notice is to highlight the interest of the National Cancer Institute (NCI) Division of Cancer Control and Population Sciences (DCCPS) in receiving applications to understand and address the full spectrum of factors that contribute to disparities in survivorship care, healthcare utilization, and health outcomes among childhood cancer survivors. Studies that focus on factors that extend beyond the individual (e.g., survivor, caregiver, clinician) to include an examination or intervention that involves healthcare teams, healthcare system, community, payer, and/or policy-level factors that contribute to disparities in health outcomes and result in inequitable survivorship care are strongly encouraged.			
107760	Notice of Special Interest (NOSI): Research on Interprofessional Teamwork and Coordination During Cancer Diagnosis and Treatment	National Cancer Institute/NIH/DHHS	NOT-CA-22-014	26-Sep-2023	Not Specified

	Deadline Dates (ALL)	21-Nov-2023 , 21-Dec-2023 , 21-Feb-2024 , 18-Apr-2024 , 22-Jul-2024 , 19-Aug-2024 , 21-Nov-2024 , 20-Dec-2024			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits grant applications to further develop enabling technologies and transformative platforms to catalyze next-generation predictive, diagnostic and therapeutic products to address heart, lung, blood, and sleep (HLBS)-related disorders and diseases. This FOA solicits R33 applications where major feasibility gaps for the enabling technology or transformative platform have already been overcome, as demonstrated with supportive preliminary data, but still requires further development and rigorous validation to encourage downstream demonstration, utilization and adoption. Well-suited applications must offer the potential to accelerate and/or transform the areas of early detection and screening, model development, clinical diagnosis, treatment, control, prevention or epidemiology, while addressing issues associated with HLBS-related diseases and disorders. Projects proposing application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not appropriate for this solicitation. Applications considered nonresponsive to the FOA will not be reviewed. This FOA is part of a suite of Catalyze innovation grants to advance projects to the point where they can meet the entry criteria for the NHLBI Catalyze Product Definition or Preclinical FOAs.</p>

	Synopsis	<p>The purpose of the NHGRI Predoctoral to Postdoctoral Transition Award for a Diverse Genomics Workforce (F99/K00) is to support a defined pathway across career stages for talented graduate students from diverse backgrounds, including those from groups underrepresented in biomedical, clinical, behavioral and social sciences. This two-phased award will facilitate completion of a doctoral dissertation (F99) and transition to a strong postdoctoral research position (K00) focused on the scientific, medical, ethical, social and/or legal areas of genomics research. It is anticipated that successful completion of this phased award program will provide students sufficient scientific and career development activities to set them on the path to becoming independent genomics researchers.</p>

	<p>Contact Telephone 240-627-3566</p> <p>Contact Email CMII@niaid.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 27-Dec-2023 [Optional][LOI/Pre-App], 26-Jan-2024</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) invites applications for the Computational Models of Influenza Immunity (CMII) Cooperative Agreement Program. The program will employ computational modeling and immunologic studies to advance our understanding of the requirements for improving anti-influenza immunity, including inducing broad immune protection and enhancing immune durability. This program will help inform design of universal or improved seasonal flu vaccines. Projects may lead to a better understanding of how pre-existing immunity and repeat exposures (natural infection and/or vaccines) shape an individual's immune "landscape." Predictive modeling of adjuvants/vaccine formulations and experimental validation supported by this program should lead to enhanced host immune responses and universal or improved seasonal influenza vaccine efficacy.</p>

	Synopsis	The purpose of this announcement is to notify the research community that the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) is interested in receiving Exploratory/Developmental grant applications focused on NIAMS core mission areas. Awards will provide support for innovative projects that introduce novel scientific ideas, model systems, tools, agents, targets, and technologies that have the potential for significant impact, and to substantially advance research within the NIAMS mission. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs of high value to the NIAMS research community.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>environmental exposure data. The primary motivation of the NOFO is to understand the consequences of natural and human-made disasters, emerging environmental public health threats, and policy changes in the U.S. and abroad. A distinguishing feature of an appropriate study is the need for rapid review and funding, substantially shorter than the typical NIH grant review/award cycle, for the research question to be addressed and swiftly implemented. The shortened timeframe will be achieved by more frequent application due dates and expediting peer review, council concurrence and award issuance. The entire cycle, from submission to award, is expected to be within 4-6 months.</p>			
113303	Centers of Biomedical Research Excellence (COBRE) Phase 1 (P20 Clinical Trial Optional)	National Institute of General Medical Sciences/NIH/DHHS	PAR-22-250	31-Dec-2023 [Optional][LOI/Pre-App]	7,500,000 USD

The objectives of the COBRE initiative are to strengthen an institution's biomedical research infrastructure through the establishment of a thematic multidisciplinary center and to enhance the ability of investigators to compete independently for NIH individual research grants or other external peer-reviewed support. COBRE awards are supported through the IDeA Program, which aims to foster health-related research by increasing competitiveness of investigators at institutions located in states with historically low aggregate success rates for grant awards from NIH.</p>

	Synopsis	<p>This specific NOFO seeks applications for Assay and Data Generation Centers (ADGCs). The ADGCs will be responsible for developing and carrying out high and moderate-throughput assays to characterize the central nervous system (CNS) function of a set of NPD risk genes, selected by the SSPsyGene Consortium, using relevant experimental systems (e.g., cellular, ex vivo, model organism). ADGCs will work in collaboration with the central Data Resource and Administrative Coordination Center (DRACC), to form the SSPsyGene Consortium. The consortium will develop and implement methods and standards to create a harmonized cross-modality and cross-species phenotypic data set to systematically characterize the function of NPD risk genes. ADGCs selected for funding will work closely with other funded ADGCs and the DRACC to achieve the goals of the SSPsyGene Consortium. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

108301	RFA-NS-22-034 -- HEAL Initiative: Discovery and Validation of Novel Targets for Safe and Effective Pain Treatment (R01 Clinical Trial Not Allowed)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	RFA-NS-22-034	04-Oct-2023	Not Specified
	<p>Contact Name Michael L. Oshinsky, PhD</p> <p>Contact Telephone 301-496-9964</p> <p>Contact Email michael.oshinsky@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 04-Oct-2023 , 07-Dec-2023 , 02-Feb-2024 , 09-Apr-2024 , 04-Jun-2024 , 07-Aug-2024 , 02-Oct-2024 , 06-Dec-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to promote the discovery and validation of novel therapeutic targets to facilitate the development of pain therapeutics. Specifically, the focus of this FOA is on the basic science discovery of targets in the peripheral nervous system, central nervous system, immune system or other tissues in the body that can be used to develop treatments that have minimal side effects and little to no abuse/addiction liability. Research supported by this FOA must include rigorous validation studies to demonstrate the robustness of the target as a pain treatment target. This will lower the risk of adopting the target in translational projects to develop small molecules, biologics, natural substances, or devices that interact with this target for new pain treatments. Translational research to develop new medical devices is not the focus of this FOA. Basic science studies of pain and related systems in the body are responsive to this FOA and are encouraged in the context of novel pain therapeutic target discovery. This FOA is not specific</p>

Synopsis

The purpose of this Notice of Funding Opportunity (NOFO) is to promote the discovery, development, and validation of real-world digital endpoints derived from data generated by existing remote or wearable devices. These endpoints will be used for monitoring the experience of pain, its progression, response to interventions, and impact on quality of life. In this NOFO, endpoints refer to biosignatures obtained from functional and physiological assessments captured by remote or wearable devices. Development of digital endpoints will involve clinical research using existing wearable or remote devices, with a specific focus on selecting and validating novel measurements as appropriate digital endpoints for pain assessment. The proposed digital endpoints may focus on a specific pain condition or encompass multiple pain conditions. Applications aiming to identify digital endpoints across various pain conditions should involve Multiple Principal Investigator (MPI)-led teams that represent each relevant pain condition and associated clinical networks. These teams should collaborate to discover, develop, and validate digital endpoints that accurately measure pain and related outcomes, such as quality of life or appropriate pain-related functional measures. In addition, the applicant should include experts in digital technology, data analysis, and advanced statistical methods to handle real-world data. Applicants must establish centralized resource groups responsible for coordinating clinical trials, standardizing sample or data collection methods, technology development, statistical analysis, and algorithm development across all pain conditions under investigation. For applications focused on developing digital endpoints for a single pain condition, MPI-led teams with cross-functional expertise should be included, along with centralized resource groups responsible for coordinating clinical trials, standardizing sample or data collection

		<p>methods, technology development, and statistical analysis. Furthermore, the inclusion of people with lived experience in the team is required to incorporate patient perspectives, concerns, and valuable input regarding the relevance and acceptability of digital measurements in the study. The final products of this effort would be algorithms and software designed to analyze data from existing remote or wearable technologies. The goal is to demonstrate that digital biosignatures or digital functional assessments, serving as digital endpoints, are sensitive and objective measures of clinical benefit.</p>			
104435	NIA Predoctoral Fellowship Award to Promote Diversity in Translational Research for AD/ADRD (F31)	National Institute on Aging/NIH/DHHS	PAR-21-218	08-Dec-2023	Not Specified

	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to promote diversity in the translational research workforce for Alzheimer's disease and Alzheimer's disease-related dementias (AD/ADRD). This predoctoral fellowship program will emphasize the development of skills in data science and drug discovery and their application to various aspects of AD/ADRD research (from populations studies to research that can lead to new treatments and diagnostics, including all aspects of behavioral and social research). It will support research training of promising predoctoral candidates from diverse backgrounds to help them gain critical translational skills in data science and drug discovery. The long-term goal of this program is to develop a diverse translational workforce that can effectively participate in and/or lead a team-science, precision medicine approach to studies of AD/ADRD treatment, prevention, early detection, and disease management and care. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

As a starting point, eligible applicants must identify a therapeutic candidate with a robust body of background data in the basic science and early discovery phases to be ready for transition to the preclinical and clinical phases of development. Data may include having sufficient bioactivity, stability, manufacturability, bioavailability, in vivo efficacy and/or target engagement, and other favorable properties that are consistent with the desired clinical application. Projects responsive to this announcement could be undertaken at any point along the drug development continuum, from late discovery (i.e., lead optimization/early safety) up to early-stage clinical trials. For small molecules, the earliest stage of eligibility for this Award is already having small-molecule compounds with proof of desired pharmacological activity. For biologics, the profiling of promising product candidates in animal models of AUD or AAOD will be allowed as the earliest entry point. The ultimate purpose and goal of this FOA is to advance molecules closer to U.S. Food and Drug Administration (FDA) approval. Milestones will be commensurate with the project proposed and the purpose of this FOA. This FOA supports early-phase clinical trials, although these are not required. Women-owned and socially or economically disadvantaged small businesses are encouraged to apply.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of the NIDCD Research Dissertation Fellowship for Au.D. Audiologists (F32) program is to support a comprehensive, rigorous biomedical research training, and dissertation research leading to a research doctorate (i.e., Ph.D.) in the biomedical, behavioral, or clinical sciences. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

	Deadline Dates (ALL)	06-Dec-2023			
	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to accelerate the development of Digital Therapeutics (DTx) to treat Substance Use Disorders (SUDs). Advances in technology offer unprecedented opportunities to develop clinical-grade mobile, web, or other software-based platforms designed to deliver treatments that are safe and effective for SUD. FDA authorization of DTx can play an important role in increasing the availability of treatments to patients with SUD. The primary objective of this FOA is to move DTx to their next step in the development process, with the ultimate goal of generating new, FDA authorized, disseminated treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new DTx or existing DTx developed for other indications. The UG3/UH3 Cooperative Agreement involves 2 phases. The UG3 phase, for up to 2 years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to 3 additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by NIDA and prioritized for transition to the UH3 phase. Investigators submitting to this FOA must address both UG3 and UH3 phases.</p>

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 06-Dec-2023</p> <p>Synopsis There is an urgent public health need for the expansion of available therapeutic options for individuals with Opioid and Polysubstance Use Disorders as the efficacy of many treatments decrease over the long-term. The National Institute on Drug Abuse (NIDA) seeks applications that stimulate research to support the development and testing of Digital Therapeutics (DTx) to treat Opioid Use Disorders (OUD) or Polysubstance Use Disorders (PUD) as stand-alone interventions or integrated with FDA-approved medication treatments. In response to this public health need, the HEAL Initiative will consider funding scientifically meritorious applications that focus on evaluating the safety and/or the efficacy of digital therapeutics to opioid use disorders alone or in combination with other Substance Use Disorders (SUD) that are submitted in response to PAR-21-183.</p>

Synopsis | The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation’s biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Courses for Skills Development Research Experiences This notice of funding opportunity (NOFO) is a part of NIDA’s Racial Equity Initiative (REI). The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this National Institute on Drug Abuse (NIDA) R25 program is to support educational activities that complement and/or enhance the training of a diverse workforce to meet the nation’s biomedical, behavioral and clinical research needs. This NOFO invites R25 applications that propose to train a diverse data science workforce in the drug addiction research field to accelerate the pace of biomedical and socio-behavioral innovation in drug addiction research.

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 24-Dec-2023 [Optional][LOI/Pre-App], 24-Jan-2024</p> <p>Synopsis This notice of funding opportunity (NOFO) is a part of the National Institute on Drug Abuse's (NIDA's) Racial Equity Initiative (REI). The purpose of this Academic Research Enhancement Award (AREA) for Undergraduate-Focused Institutions is to support small scale research grants at institutions that do not receive substantial funding from the NIH, with an emphasis on providing research experience that intersects drug addiction and data science primarily for undergraduate students, and enhancing the drug addiction research environment that applies data science at applicant institutions. The over-arching goal of this R15 program is to train a diverse data science workforce to leverage the potential of artificial intelligence and machine learning (AI/ML) to accelerate the pace of socio-behavioral and biomedical innovation in drug addiction research. The establishment of mutually beneficial partnerships to enhance the participation of researchers from diverse backgrounds and communities experiencing health disparities is expected. Help in determining the Organization Funding Level can be found here or https://grants.nih.gov/grants/funding/r15.htm.</p>

107481	Pre-application: Opportunities for Collaborative Research at the NIH Clinical Center (X02 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-21-342	13-Dec-2023	Not Specified
	<p>Contact Name Forbes D. Porter, MD, PhD</p> <p>Contact Telephone 301-435-4432</p> <p>Contact Email fdporter@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 13-Dec-2023</p> <p>Synopsis The goal of this program is to support collaborative translational research projects aligned with NIH efforts to enhance the translation of basic biological discoveries into clinical applications that improve health. It encourages high quality science demonstrating the potential to result in understanding an important disease process or lead to new therapeutic interventions, diagnostics, or prevention strategies within the research interests and priorities of the participating NIH Institutes/Centers (ICs). Specifically, the program seeks to broaden and strengthen patient-centric translational research collaborations between basic and clinical researchers both within and outside NIH to accelerate and enhance translational science by promoting partnerships between NIH intramural investigators (e.g., those conducting research within the labs and clinics of the NIH) and extramural investigators (e.g., those conducting research in labs outside the NIH), and by</p>

---------	---------------	--------------	----------------	---------------	----------------

providing support for extramural investigators to take advantage of the unique research opportunities available at the NIH Clinical Center by conducting clinical research projects in collaboration with NIH intramural investigators. In order to be eligible for this program, the application must include at least one intramural scientist as a co-Program Director/Principal Investigator (co-PD/PI) and at least some of the clinical research must be conducted at the NIH Clinical Center. Through this collaboration, external researchers may gain access to the NIH Clinical Center and leverage the diverse Clinical Center resources, expertise, and infrastructure available to test promising laboratory- and animal-based discoveries with potential for advancing disease diagnosis, treatment and prevention. The special environment of the Clinical Center can support studies that may not be readily supported elsewhere. This may include collaborations that propose targeted increases in new patients enrolled in protocols at the Clinical Center. For this initiative, patients must be seen at the NIH Clinical Center. Projects that take only minimal advantage of Clinical Center resources, such as projects only utilizing banked samples or data, will not be considered for funding. This funding opportunity announcement (FOA) encourages X02 pre-applications for Opportunities for Collaborative Research at the NIH Clinical Center. The X02 pre-application is the recommended (not required) first step in the application process for the companion U01 FOA (PAR-21-343). Potential applicants should read both FOAs. Investigators whose X02 pre-applications are meritorious, can be accommodated by the resources of the NIH Clinical Center and the relevant intramural program, and align with the research missions of the participating NIH Institutes, will be notified of the opportunity to submit a U01 application under PAR-21-343 . No awards will be made under this FOA.

106669	The Role of Epstein Barr Virus (EBV) Infection in Non-Hodgkin Lymphoma (NHL) and Hodgkin Disease (HD) Development With or Without an Underlying HIV Infection (U01 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-21-348	15-Dec-2023	Not Specified

Deadline Dates (ALL)	15-Dec-2023
Synopsis	This funding opportunity announcement (FOA) focuses on the role of EBV infection on Non-Hodgkin Lymphoma (NHL) and Hodgkin disease (HD) development with or without an underlying HIV infection. The goal is to increase our knowledge through mechanistic, epidemiological, or translational studies that examine how EBV promotes NHL or HD initiation, progression, and the resulting disease sequelae and to provide insights into mechanistic differences in the relationship between EBV infection and lymphomagenesis in HIV+ versus HIV- persons. Research project U01s funded through this PAR will form a cooperative group, the Epstein Barr Virus associated Lymphoma Consortium (EALC).

Deadline Dates (ALL)	08-Dec-2023 , 09-Dec-2024 , 08-Dec-2025
Synopsis	The goals of this program are to support locally relevant research in critical areas of HIV-associated non-communicable diseases (NCDs) at Low- and Middle-Income Country (LMIC) Institutions, to enhance research capacity, and to build a network of researchers both within and across LMICs to address this critical burden. This initiative is expected to stimulate new research on the interplay between HIV and development of NCDs in persons living with HIV (PLWH). This includes exploratory studies to uncover the extent to which HIV infection influences the etiopathogenesis of the NCDs; and to identify and develop appropriate approaches for effective diagnosis, prevention, therapeutic interventions and integrated clinical care for PLWH with the comorbid conditions. Applicants should develop their studies in keeping with the NIH HIV/AIDS Research Priorities (https://www.oar.nih.gov/hiv-policy-and-research/research-priorities ; https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-018.html). Research teams should contain an appropriate mix of expertise to accomplish the proposed studies, including partnerships between HIV and NCD researchers who can initiate new ideas, and determine feasibility of novel approaches to understand and reduce the long-term suffering from the comorbid disorders. Applicants will also be asked to address the needs of collaborating LMIC institutions to develop capacity for carrying out research in this field.

	Synopsis	<p>The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support educational activities with a primary focus on: Courses for Skills Development Research Experiences The ESTEEMED program is designed to foster the development of undergraduate freshmen and sophomores from diverse backgrounds to pursue further studies and careers in bioengineering or STEM fields relevant to NIBIB’s scientific mission. Applications are encouraged to propose integrated educational activities that include 3 elements: a summer bridge program for incoming freshmen, and in the freshman and sophomore years, academic year activities and summer research experiences. The ESTEEMED program is intended to expose students to bioengineering research early in their college careers while also providing students didactic, mentoring and career development opportunities. This will prepare students to join, in their junior and senior years, an honors program that promotes STEM and entrance into a Ph.D. program. The ultimate goal is for the participants to pursue a doctoral degree and a subsequent research career in bioengineering or NIBIB-relevant field.</p>

	Synopsis	<p>This Funding Opportunity Announcement (FOA) encourages grant applications for the conduct of innovative, collaborative research projects with low- and middle-income country (LMIC) institutions/ scientists on brain and other nervous system function and disorders throughout life, relevant to LMICs. Research on neuro-health and neurological, neuromuscular, sensory, neuropsychiatric, cognitive, behavioral and neurodevelopmental function and disorders may span the full range of science from basic to clinical to translation and implementation research. Scientists in the United States (U.S.) or upper middle-income countries (UMICs) are eligible to partner with LMIC institutions. Scientists in UMICs may partner directly with scientists at other LMIC institutions with or without out a US partner. Income categories are defined by the World Bank at http://data.worldbank.org/about/country-classifications/country-and-lending-groups. The collaborative research programs are expected to contribute to the long-term goals of building and strengthening sustainable neuro-health research capacity in LMICs to address brain, nervous system and neuromuscular development, function and impairment throughout</p>

Deadline Dates (ALL)	06-Nov-2023 [Optional][LOI/Pre-App], 06-Dec-2023

Synopsis
 This NOFO invites applications to participate in a research program cooperative agreement to support the Prevention and Treatment through a Comprehensive Care Continuum for HIV-affected Adolescents in Resource Constrained Settings Implementation Science Network (PATC³H-IN). The Network will expand and/or improve successes achieved by PATC³H to new geographic settings with limited implementation science (IS) research capacity and/or risk populations who are poorly represented in international adolescent HIV research (e.g. sexual and gender minorities; commercial sex workers; drug users) and stimulate much needed IS research in a neglected area of public health significance: prevention of new HIV infections among adolescents at risk and the identification of, and linkage and retention to care of and long-term viral suppression among youth living with HIV in low-to-middle income countries (LMICs). These settings must have an HIV epidemic density defined by UNAIDS estimates as either a country 1) in which at least 200,000 people are living with HIV and the number has not decreased by more than 5% over the last 2 consecutive years of available data or 2) has an HIV

		<p>incidence among youth ages 10 to 24 years of 0.01% or more. The structure of PATC3H-IN shall consist of three highly integrated components - (1) Clinical Research Centers (CRC) (each center will propose a study to be executed in at least 5 research performance sites); (2) a Coordination and Operations Center (COC); and (3) an Implementation Science Coordinating Center (ISCC). This NOFO solicits applications for a single Implementation Science Coordinating Center.</p>			
118355	Interventions for Stigma Reduction to Improve HIV/AIDS Prevention, Treatment and Care in Low- and Middle- Income Countries (R01 - Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-23-190	20-Dec-2023	400,000 USD
	<p>Contact Name Geetha P. Bansal, Ph.D.</p> <p>Contact Telephone 301-496-1492</p> <p>Contact Email geetha.bansal@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 20-Dec-2023 , 23-Dec-2024 , 22-Dec-2025</p> <p>Synopsis The purpose of this NOFO is to solicit Research Project Grant (R01) applications for up to 3 years of support to develop and test interventions to reduce the impact of HIV-associated stigma on the prevention and treatment of HIV infection and/or AIDS, and on the quality of life of People Living with HIV and/or AIDS (PLWH). The NOFO will also support interventions to address the multiple intersecting stigmas and measurement of the stigmas at individual levels. Specifically, this initiative will support intervention research on a) novel stigma reduction strategies that link to increase in care-seeking behavior and/or decrease in transmission, b) reducing the impact of stigma on adolescent and/or youth health, c) strategies to cope with the complex burden of stigmatization due to HIV and one or more comorbidities/coinfections, d) reducing the effects of stigma on, and/or by, family members or caregivers of PLWH and e) development of innovative and improved stigma measurement in the context of implementation of a stigma-reduction intervention. The overall goals are to understand how to reduce stigma as a factor in HIV transmission, to eliminate or mitigate the aspects of stigma that limit beneficial health outcomes for the infected and at-risk individuals and communities, and to conduct exploratory studies to determine the feasibility of stigma-reduction interventions related to HIV prevention, treatment and/or care in Low and Middle-Income Countries (LMICs).</p>				
120839	Ruth L. Kirschstein National Research Service Award (NRSA) Individual Fellowship for Students at Institutions with NIH-Funded Institutional Predoctoral Dual-Degree Training Programs (Parent F30)	National Institutes of Health/DHHS	PA-23-260	08-Dec-2023	Not Specified

The purpose of the Kirschstein-NRSA, dual-doctoral degree, predoctoral fellowship (F30) is to enhance the integrated research and clinical training of promising predoctoral students, who are matriculated in a combined MD/PhD or other dual-doctoral degree training program (e.g. DO/PhD, DDS/PhD, AuD/PhD, DVM/PhD), and who intend careers as physician/clinician-scientists. Candidates must propose an integrated research and clinical training plan and a dissertation research project in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The fellowship experience is expected to clearly enhance the individual's potential to develop into a productive, independent physician/clinician-scientist. This Notice of Funding Opportunity (NOFO) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

Synopsis	The purpose of this NOSI is to encourage research on the efficacy of interventions that address nutrition security and the mechanisms of food insecurity on a variety of health outcomes. It also calls for the development of new measures for nutrition security and assessment of food insecurity that are broadly applicable. . It was developed by the Office of Nutrition Research (ONR) Implementation Working Group on Nutrition and Health Disparities in collaboration with NIH Institutes and Centers (ICs) and Offices in support of the goals and objectives of the Strategic Plan for NIH Nutrition Research.

Synopsis	The NIH INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE (INCLUDE) Project seeks to improve health and quality-of-life for individuals with Down syndrome (DS). This Notice of Special Interest (NOSI) announces NIH support for the professional development of trainees aiming to establish a career in DS-related research. By providing these scientists with training, resources, and mentorship, the NIH intends to support the career development of junior investigators in DS who will lead future research to improve the understanding of the biology of DS and support development of new treatments for health conditions experienced by those with DS. Investigators early in their careers (e.g., predoctoral candidates) as well as those with advanced degrees (e.g., PhD, MD) may benefit from mentorship from

Synopsis | The overall goal of this Notice of Special Interest (NOSI) is to promote mechanistic research aimed at better understanding the pathophysiology of immune-related adverse events (irAEs). It is anticipated that the mechanistic research supported through this NOSI will build the foundational knowledge which will ultimately lead to better strategies to predict, prevent and/or ameliorate toxicities that can arise as a consequence of current immunotherapeutic regimens, and improve treatment outcomes. The proposed research can be basic or translational but should be focused on revealing the mechanisms underlying irAEs. Single investigators and/or multidisciplinary teams with relevant expertise in the research area proposed and/or patient characterization and selection are encouraged to apply.

Synopsis	This Notice calls for research on the health of sexual and gender minority populations. SGM populations include, but are not limited to, individuals who identify as lesbian, gay, bisexual, asexual, transgender, Two-Spirit, queer, and/or intersex. Individuals with same-sex or -gender attractions or behaviors and those with a difference in sex development are also included. These populations also encompass those who do not self-identify with one of these terms but whose sexual orientation, gender identity or expression, or reproductive development is characterized by non-binary constructs of sexual orientation, gender, and/or sex.

121244	Ruth L. Kirschstein National Research Service Award (NRSA) Individual Fellowship for Students at Institutions Without NIH-Funded Institutional Predoctoral Dual-Degree Training Programs (Parent F30)	National Institutes of Health/DHHS	PA-23-261	08-Dec-2023	Not Specified
	Contact Name Contact Telephone Contact Email GrantsInfo@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 08-Dec-2023 , 07-Jan-2024 , 08-Apr-2024 , 07-May-2024 , 08-Aug-2024 , 07-Sep-2024 , 08-Dec-2024 , 07-Jan-2025 , 08-Apr-2025 , 07-May-2025 , 08-Aug-2025 , 07-Sep-2025 Synopsis This Notice of Funding Opportunity (NOFO) will support students at institutions without NIH-funded institutional predoctoral dual-degree training programs. The purpose of the Kirschstein-NRSA, dual-doctoral degree, predoctoral fellowship (F30) is to enhance the integrated research and clinical training of promising predoctoral students, who are matriculated in a combined MD/PhD or other dual-doctoral degree training program (e.g. DO/PhD, DDS/PhD, AuD/PhD, DVM/PhD), and who intend careers as physician/clinician-scientists. Candidates must propose an integrated research and clinical training plan and a dissertation research project in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The fellowship experience is expected to clearly enhance the individual's potential to develop into a productive, independent physician/clinician-scientist. This NOFO is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

Specifically, this NOFO solicits applications focused on molecular mechanisms of small cerebral vessel diseases, including one or more of arteriosclerosis, cerebral amyloid angiopathy (CAA), and atherosclerosis (direct impact or downstream effects on small vessels) that contribute to dementia diagnoses. Proposed research will use team-based and multi-faceted approaches to understand these small vessel disorders both cross-sectionally and over time (prodromal and after phenotypic disease first develops), as well as their relationship to VCID phenotypic and clinical outcomes. In addition to standard NIH sharing requirements, the program will highlight Center Without Walls (CWOW) sharing of pre-publication ideas, data, methods, and results. The overall goal is to generate, via a collaborative CWOW framework, foundational knowledge in the emerging field of VCID that is needed for future development of interventions including for prevention and better clinical outcomes.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 28-Dec-2023</p> <p>Synopsis The Stephen I. Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this Funding Opportunity Announcement (FOA) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies that are NOT conducted with specific applications toward processes or products in mind and which also do not meet the clinical trial definition should submit under the appropriate ‘Clinical Trial Not Allowed’ FOA .</p>

---------	---------------	--------------	----------------	---------------	----------------

<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p>	<p>Kimberly Dormer</p> <p>301-761-6391</p> <p>kimberly.dormer@nih.gov</p> <p></p> <p>Link to program URL</p> <p>07-Dec-2023</p> <p>Synopsis</p> <p>Introduction The National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH), of the Department of Health and Human Services (DHHS) supports research related to the basic understanding of microbiology and immunology leading to the development of vaccines, therapeutics, and medical diagnostics for the prevention, treatment, and diagnosis of infectious and immune-mediated diseases. The NIAID, Division of AIDS has a requirement for the operation of the Virology Core Laboratory. The current Virology Core Laboratory (VCL) is held by Duke University (HHSN272201800003C). Description The primary purpose of the VCL is to quantitatively measure viral RNA levels in samples in support of a candidate AIDS vaccine (or other intervention) being tested. The VCL will also produce a large volume of at least 500ml, well characterized SIV, SHIV, and/or HIV viral stocks that will serve as standard reagents for the scientific community. Assays may be performed on fresh and/or frozen preclinical samples. All assays undergo testing for inter- and intra-assay as well as inter- and intra-operator variability. Standard operating procedures (SOPs) are developed for all assays, laboratory processes, and equipment use and maintenance. Additionally, all work done by the VCL is conducted under good laboratory practice (GLP)-like standards, thereby ensuring rigor and reproducibility. For the purposes of this contract, GLP-like standards are defined as the application of the principles of Good Laboratory Practices Regulation, codified in CFR Title 21 Part 58, but not requiring external accreditation or official Food and Drug Administration (FDA) regulatory review of the laboratory. The Contractor shall develop, acquire, optimize, and conduct assays to characterize and quantitatively determine the level of SIV, SHIV, or HIV viral RNA in samples such as plasma, mucosal tissues or secretions, lymphoid tissues, or other tissues derived from animals infected with SIV, SHIV, or HIV and in samples from in vitro virus cultures and virus stocks. In vivo studies are anticipated to largely include NHP animal studies but may extend to small animal models including mouse models or others as directed by the COR. Assays to detect viral RNA for other infectious agents may be requested. The Contractor shall use current state-of-the-art technologies to conduct quantitative and high-throughput viral RNA assays, shall incorporate new and optimized technologies for assay development into contract activities when appropriate, and shall conduct other activities to accomplish the technical objectives of the statement of work (e.g. virus stock production). Assays shall incorporate appropriate positive and negative controls using reference panels to define background and dynamic range and shall demonstrate reproducibility and consistency. Specifically, the Contractor shall: 1) conduct validated viral assays using GLP-like processes; 2) receive, store, catalog, track, and maintain an inventory of the samples for evaluation; 3) analyze, manage, report, and deposit assay data; 4) perform project management</p>

activities related to contract activities; 5) conduct initial and final transition activities, as needed; and 6) perform Option work described below, if required. It is anticipated that one (1) cost reimbursement, level-of-effort (term) type contract will be awarded. The period of performance will be for one (1) year (Base Period) plus six (6) one year Options (terms that may be exercised by the Government unilaterally), for a total possible performance period of 7 years, beginning on or about November 15, 2024. The performance requirement will be the delivery of 3.0 full time equivalents (FTEs) per year for the base period (Year 1) and Option periods 1-6 (Year 2 through Year 7). Please note that the number of FTEs is exclusive of subcontractor and consultant effort. In addition, the Government may exercise Options to accommodate unanticipated increases in demand as follows: Options 7 through 13: Increased Level of Effort: The Government may exercise Options for increased level of effort that may result from unanticipated increases in demand for the activities supported by the base requirements of the contract. Should the Government elect to exercise these Options, the Contractor shall provide resources for the unanticipated increase in work volume by 0.5 Full Time Equivalent (FTE) for each Option exercised. These Options may be exercised once per year during Years 1 through 7. The period of performance of an Option for increased level of effort for this purpose will not exceed the term of the Base Period or Option year in which the Option is exercised. Please note that the number of FTEs is exclusive of subcontractor and consultant effort. Any responsible Offeror may submit a proposal which will be considered by the Agency. This RFP will be available electronically on/about September 7, 2023, and may be accessed through SAM.gov. This notice does not commit the Government to award a contract. No collect calls will be accepted. No facsimile transmissions will be accepted. For this solicitation, the NIAID requires proposals to be submitted online via the NIAID electronic Contract Proposal Submission (eCPS) website. Submission of proposals by facsimile or e-mail is not acceptable. For directions on using eCPS, go to the website <https://ecps.nih.gov> and then click on "How to Submit."

Deadline Dates (ALL)	14-Nov-2023 [Optional][LOI/Pre-App], 14-Dec-2023
Synopsis	<p>This notice of funding opportunity (NOFO) seeks to support studies that will inform safe and effective medication-assisted, psychosocial, and complementary interventions for people with co-occurring Opioid Use Disorder (OUD) and Alcohol Use Disorder (AUD). Alcohol increases lethal opioid overdose risk. As a result, treatment providers may under-prescribe or be reluctant to provide opioid agonist therapies (OATs) such as methadone and buprenorphine to people with OUD who also have AUD or misuse alcohol. There is also scant research on non-pharmacological therapies for people with OUD-AUD.</p> <p>Reciprocal relationships between opioid use and alcohol use has been observed for OUD-AUD patients such that reduced opioid intake may result in increased drinking which heightens opioid relapse and overdose risk and suggests an urgent need for targeted therapies in this population. Research projects dedicated to OUD treatment and prevention, while not excluding subjects who drink, seldom explicitly recruit subjects with AUD. The purpose of this NOFO is to support clinical research project development, including piloting study design and research protocols, subject recruitment, and initiating data collection and analysis pertinent to studying treatment practices for people with OUD-AUD.</p>

Synopsis	The NIH Office of Strategic Coordination (Common Fund - https://commonfund.nih.gov/) has generated many valuable and widely available datasets. The Common Fund Data Ecosystem is helping to ensure that all Common Fund (CF) data are Findable, Accessible, Interoperable, and Reusable (FAIR). The purpose of this Notice of Funding Opportunity (NOFO) is to announce the availability of funds for projects that involve collaboration with multiple CF Data Coordinating Centers (DCCs) to combine discovery and/or translational approaches with work that will enhance reusability of Common Fund data and contribute knowledge to the Common Fund Data Ecosystem. Clinical trials will not be accepted through this NOFO. A clinical trial planning component is allowable, provided it is appropriate and rigorously developed.

Emerging (and re-emerging) pathogens represent a continuing risk to national security because they threaten health (animal, human, and ecosystem) and economic stability. Often, society falls short on the coordination and breadth of expertise needed to respond to such threats. Effective responses to emerging pathogens will require sustained, global-scale efforts of researchers and organizations. This can only be accomplished by synergistic integration of innovative scientific and

technological advances across disciplines and scales, and effective knowledge transfer into practice. As part of these efforts, NSF is organizing a set of activities around the broad theme of Predictive Intelligence for Pandemic Prevention (PIPP). The PIPP initiative focuses on foundational research and development activities needed to tackle grand challenges in infectious disease pandemics through prediction and prevention. The PIPP Phase II Centers Program expands upon the Phase I Development Grant Program and is the NSF's flagship program to establish a network of Centers or large-scale awards/investments that will support interdisciplinary team-based approaches to accelerate research and development activities in emerging infectious diseases and pandemics. The overall goal of the PIPP Phase II Centers program is to support research and development activities needed to transform society's ability to forecast the likelihood of pandemic-scale events, detect outbreaks early, and respond efficiently. Continued advancement, enabled by sustained federal investment channeled toward issues of national importance holds the potential for further economic impact and public health improvements.

Deadline Dates (ALL)	11-Dec-2023 , 16-Sep-2024

Synopsis The contemporary research landscape is a collaborative and international enterprise requiring high level coordination among multi-disciplinary, cross-cultural teams. As such, the Accelerating Research through International Network-to-Network Collaborations program (AccelNet) values cooperation over competition. Program goals are to 1) leverage prior NSF support for building research capacity towards activities that launch international research network of networks (NoN) that will lead to an accelerated advancement of an area of science after the award period and 2) recruit and foster a diverse and internationally competent US-based workforce trained in conducting and leading multi-team international collaboration. Any area funded by the National Science Foundation is eligible, particularly those addressing grand research challenges identified within research communities and/or by NSF. Successful proposals will demonstrate that the proposed activities will: 1) accelerate scientific research at a rate that would not be possible without concerted international cooperation in research planning; 2) make NoN members more competitive for research awards following the period of award; 3) recruit and foster a US-based diverse and internationally competent workforce trained in conducting and leading multi-team international collaboration. Proposals must include detailed plans for collaborative networking activities that will result in a synergy of

---------	---------------	--------------	----------------	---------------	----------------

effort across the entire NoN. The AccelNet Program has two tracks. The Design Track allows PIs to build on prior NSF research awards by providing time and resources for building capacity across teams to launch a synergistic international NoN. The Implementation Track allows PIs to build on prior research or networking awards, such as AccelNet Design or Research Coordination Networks (RCN) by providing time and resources to implement an international NoN. There are two phases to the Implementation Track. Phase 1 funding is for activities related exclusively to NoN activities and is open to all PIs, including but not limited to prior successful Design Track PIs. Phase 2 funding is for early concept research arising from Phase 1 activities and is only open to Phase 1 PIs who have identified a critical research gap during synergistic networking activities in the first 18-24 months of Phase 1 awards.

Synopsis	The IUCRC program catalyzes breakthrough pre-competitive research by enabling close and sustained engagement between industry innovators, world-class academic teams, and government agencies. IUCRCs help industry partners and government agencies connect directly and efficiently with university researchers to achieve three primary objectives: 1) Conduct high-impact research to meet shared and critical industrial needs in companies of all sizes; 2) Enhance U.S. global leadership in driving innovative technology development, and 3) Identify, mentor and develop a diverse, highly skilled science and engineering workforce.

Core research areas of the program include control, data analytics, and machine learning including real-time learning for control, autonomy, design, Internet of Things (IoT), mixed initiatives including human-in- or human-on-the-loop, networking, privacy, real-time systems, safety, security, and verification. By abstracting from the particulars of specific systems and application domains, the CPS program seeks to reveal cross-cutting, fundamental scientific and engineering principles that underpin the integration of cyber and physical elements across all application domains. The program additionally supports the development of methods, tools, and hardware and software components based upon these cross-cutting principles, along with validation of the principles via prototypes and testbeds. This program also fosters a research community that is committed to advancing education and outreach in CPS and accelerating the transition of CPS research into the real world.</p>

Synopsis	<p>The Missile Defense Agency (MDA) Command and Control, Battle Management and Communications (C2BMC) contracting office (BCK) invites innovative technical approach concept “white” papers that address operationally focused C2BMC capabilities and/or agile mechanisms to monitor, acquire, track, and engage adversary weapons during any phase of an attack. MDA seeks to identify, adapt and acquire emerging technologies that enhance the performance of C2BMC capabilities, which include addressing the development of Command and Control (C2) of Long Range Discrimination Radar (LRDR) for Homeland Defense (S8.2-5), Engage on Remote technology (Spiral S8.2-3), early development of Ballistic Missile Defense (BMD) System Track (BST) with System Level Integrated Discrimination (S8.2-7), radar and radio frequency (RF) communications, computer science, signal, and data processing, and artificial intelligence / machine learning. MDA C2BMC will not issue paper copies of this announcement. C2BMC reserves the right to select for award all, some, or none of the white papers in response to this announcement. The cost of responding to this BAA is not an allocable and allowable cost as set forth in accordance with FAR Part 31. Such costs shall be excluded from any billing, claim, or proposal applicable to a Government award. It is the policy of C2BMC to handle all white papers and proposals submitted under this BAA as sensitive, competitive information, and to disclose their contents only for the purposes of evaluation and potential award. The issuance of this BAA does not commit the Government to any contract, agreement, or other arrangements. Furthermore, this BAA shall not be construed as a commitment by the Government for any procurement of supplies or services nor does it constitute a solicitation or a promise of a solicitation in the future. 	Synopsis	Action for A-T has two project grant funding opportunities available for researchers; Joint funding from Action for A-T and BrAshA-T Action for A-T and BrAshA-T invite applications for high quality medical research projects that have the potential to treat, cure or enable medical interventions for Ataxia Telangiectasia (A-T). Applications are invited across the fields of this multi-system condition however research must demonstrate to be of actual or future potential benefit to A-T patients. Joint funding from Action for A-T and NATA Action for A-T and NATA invite applications for research projects into the identification of targets or biological pathways that could be amenable to nucleic acid-based interventions. This could include ASOs, siRNAs, mRNA and DNA/RNA base-editing approaches, with the goal of offering new options for the management and/or treatment of Ataxia-Telangiectasia (A-T) patients.

	Synopsis	The AATS Foundation Cardiac Surgical Resident Investigator Award is intended to support cardiac surgical residents enrolled in an I6 program, or general surgery residents intending to follow either a traditional 5-2 training pathway or a 4-3 Early Specialization Program in cardiothoracic surgery, to conduct research in the laboratory of an established cardiac surgical investigator. This mentored award affords funding for the research activities of residents working directly with a senior cardiac surgeon. The established cardiac surgical investigators would direct the research projects and serve as research mentors. Each award would be for up to a 2-year duration for a total investment of \$40,000 in support annually.

Synopsis	The AMNH Ph.D. Program in Comparative Biology is training the next generation of biologists through an integrative approach focused on the history, evolutionary relationships, and interactions among species. It builds on the Museum's strength and experience in research and training, educating a new generation of scientists to become leaders in understanding the history and diversity of life on Earth and in disseminating their work in ways that will support advances in biological research, human health, biodiversity conservation, and other related fields. This is an

	Deadline Dates (ALL)	29-Sep-2023 [LOI/Pre-App], 01-Dec-2023			
	Synopsis	The American Occupational Therapy Foundation (AOTF) awards Intervention Research Grants (IRG) as part of its mission to advance the science of occupational therapy to support people's full participation in meaningful life activities. The purpose of this grant program is to lay the necessary groundwork for larger intervention studies and for larger implementation studies and support the profession's Vision 2025 of occupational therapy as an evidence-based profession. The intent of the IRG program is to provide seed funding for the development of new and/or novel ideas in order to generate preliminary data as proof of concept. Most larger funders, including federal sources and most of the major nonprofit foundations, require this data in order to apply to them, yet sources to fund this preliminary work are limited at best. The AOTF IRG occupies a very important niche and fills a critical gap by investing in the development of ideas and data in the early state of the occupational therapy research enterprise. One-year non-

	Synopsis	The American Occupational Therapy Foundation (AOTF) awards Implementation Research (IR) Grants as part of its mission to advance the science of occupational therapy to support people's full participation in meaningful life activities. The IR grant specifically supports research that is focused on helping occupational therapists take evidence-informed practice from theory to reality in their practice setting. This research grant develops and evaluates the processes used to implement, sustain, and or scale-up evidence-based practice into routine care with an end goal to improve the quality and effectiveness of care.

	Synopsis	This is an award to the author or authors of published research on basic or applied aspects of diseases of perennial fruit plants (tree fruits, tree nuts, small fruits, and grapes, including tropical fruits, but excluding vegetables). A nomination must be based principally or completely on a paper or series of papers published in APS journals within 10 calendar years preceding the annual meeting. Earlier papers in APS journals should be cited in the nomination only if they were the foundation of subsequent work during the 10-year period or if the work during the 10-year period involved a logical extension and application of earlier research.

	Synopsis	The mission of California Institute for Regenerative Medicine (CIRM) is to accelerate world class science to deliver transformative regenerative medicine treatments in an equitable manner to a diverse California and world. The objective of this program announcement is to support late-stage preclinical studies necessary to file and attain an active IND or IDE with the Food and Drug Administration (FDA) and initiate start-up activities to prepare for a clinical trial for a regenerative medicine therapy (stem cell-based or genetic therapy). Under this program, CIRM will act not only as a funding agency, but will also devote significant internal resources and leverage its external team of world-class subject matter experts to actively advance the project. The result of a successful application will be the formation of a true partnership that both accelerates the program and gives it the greatest opportunity for success.
