

Icahn School of Medicine at
Mount Sinai

Grants and Contracts Office

**Funding Opportunities Monthly Edition
Jan 2024 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in Jan 2024. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

NIH Funding Opportunities

		propose innovative, state-of-the-art programs that address the cause, diagnosis, prevention, or treatment of cancer, rehabilitation from cancer, or the continuing care of cancer patients and the families of cancer patients, in order to advance the NCI mission.			
114681	National Cancer Institute Program Project Applications for the Years 2023, 2024, and 2025 (P01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-23-059	07-Jan-2024	Not Specified
	<p>Contact Name Referral Officer</p> <p>Contact Telephone 240-276-6390</p> <p>Contact Email ncirefof@dea.nci.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 25-Jan-2024 , 07-May-2024 , 25-May-2024 , 07-Sep-2024 , 25-Sep-2024 , 07-Jan-2025 , 25-Jan-2025 , 07-May-2025 , 25-May-2025 , 07-Sep-2025 , 25-Sep-2025 , 07-Jan-2026 , 25-Jan-2026 , 07-May-2026</p> <p>Synopsis Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) invites applications for investigator-initiated Program Project (P01) applications. The proposed Program may address any of the broad areas of cancer research, including (but not limited to) cancer biology, cancer prevention, cancer diagnosis, cancer treatment, and cancer control. Basic, translational, clinical, and/or population-based studies in all of these research areas are appropriate. Each application submitted in response to this FOA must consist of at least three research projects and an Administrative Core. The projects must share a common central theme, focus, and/or overall objective.</p>				
106890	Cancer Center Support Grants (CCSGs) for NCI-designated Cancer Centers (P30 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-21-321	25-Jan-2024	Not Specified
	<p>Contact Name </p> <p>Contact Telephone 240-276-5600</p> <p>Contact Email ncicenters-r@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 25-Jan-2024 , 25-May-2024 , 25-Sep-2024 , 25-Jan-2025</p> <p>Synopsis This Funding Opportunity Announcement (FOA) invites applications for P30 Cancer Center Support Grants (CCSGs) to support NCI-designated Cancer Centers. CCSGs support three types of Cancer Centers: 1) Comprehensive Cancer Centers,</p>

---------	---------------	--------------	----------------	---------------	----------------

which demonstrate reasonable depth and breadth of research activities in each of three major areas: basic laboratory; clinical; and prevention, control and population-based research, and which have substantial transdisciplinary research that bridges these scientific areas; and 2) Clinical Cancer Centers, which are primarily focused on basic laboratory; clinical; and prevention, cancer control, and population-based research; or some combination of these areas, and 3) Basic Cancer Centers, which focus on basic laboratory research. The purpose of all types of NCI-designated Cancer Centers is to capitalize on all institutional cancer research capabilities, integrating meritorious research into a single transdisciplinary research enterprise across all institutional boundaries. Cancer Centers supported through this FOA are expected to serve as major sources of discovery of the nature of cancer and of development of more effective approaches to prevention, diagnosis, and therapy; to contribute significantly to the development of Shared Resources that support research; to collaborate and coordinate their research efforts with other NCI-funded programs and investigators; and to disseminate research findings for the benefit of the community.

105680	Notice of Special Interest (NOSI): National Cancer Institute SBIR/STTR Program Announcement Regarding Cancer Prevention, Diagnosis, and Treatment Technologies for Low-Resource Settings	National Cancer Institute/NIH/DHHS	NOT-CA-21-062	05-Jan-2024	Not Specified

Deadline Dates (ALL)	05-Jan-2024 , 05-Apr-2024 , 05-Sep-2024

Synopsis The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs at the National Cancer Institute (NCI) are issuing this Notice of Special Interest (NOSI) to encourage SBIR/STTR grant applications from small business concerns (SBCs) in response to SBIR/STTR Omnibus Solicitations proposing commercially-directed research for the development of cancer prevention, diagnosis, or treatment technologies to improve cancer outcomes in low- and middle-income countries (LMICs), and low-resource settings in the US. Specifically, the NCI through this NOSI encourages grant applications from SBCs to develop or adapt, apply, and validate existing or emerging technologies into user-friendly products for cancer prevention, diagnosis, or treatment in low-resource settings. These technologies should be practical and affordable in low-resource settings, including remote or underserved populations within or outside the US. The technologies may include but are not limited to tools for vaccine dissemination/delivery, imaging, in vitro diagnosis, or treatment of pre-cancerous (pre-neoplastic) or cancerous lesions that are preventable or treatable within low-resource settings. Strong emphasis is placed on technologies that directly provide or immediately lead to prevention, diagnosis, or treatment options

		available in the local health system. This funding opportunity is part of a broader NCI-sponsored AffordableCancer Technologies (ACTs) Program. Note: LMIC is defined according to the World Bank Country and Lending Groups and is inclusive of low- and middle-income countries, not including upper-middle income countries, for the purposes of this NOSI.			
107027	Integrating Biospecimen Science Approaches into Clinical Assay Development (U01 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	PAR-22-049	11-Jan-2024	1,250,000 USD
	<p>Contact Name Abhi Rao, Ph.D.</p> <p>Contact Telephone 240-276-5715</p> <p>Contact Email abhi.rao@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 11-Jan-2024 , 07-Jun-2024 , 13-Sep-2024</p> <p>Synopsis This Funding Opportunity Announcement (FOA) will support extramural research to investigate and mitigate challenges facing clinical assay development and subsequent analytical validation due to preanalytical variability in tumor tissue biopsies, blood biospecimens utilized as “liquid biopsies, or other biospecimens as described in this FOA. Extramural research funded under this FOA may include investigations of preanalytical variability associated with the procurement and study of small biopsies (core biopsies, small excision samples), blood utilized for liquid biopsies, tissue swabs, tissue secretions, pleural and esophageal aspirates, feces, or bodily fluids like sweat, urine, CSF, breast milk and saliva. Investigator-designed experiments will explore how different biospecimen preanalytical conditions affect emerging and clinically relevant biomarkers quantified by a variety of testing platforms. The results from this research program will improve the understanding of how analytical quantification of clinically relevant biomarkers is affected by variation in biospecimen collection, processing, and storage procedures. The overall goal is to expedite biomarker clinical assay development through evidence-based standardization of biopsy handling practices.</p>

Synopsis The purpose of this trans-NCI Funding Opportunity Announcement (FOA) is to promote new cancer disparities research among investigators who do not normally conduct it and to encourage the partnership of experienced cancer research investigators with cancer disparities-focused researchers. This FOA is intended to accelerate and strengthen multi-disciplinary cancer disparities research in wide ranging areas. Cancer disparities research includes, but is not limited to basic, translational, behavioral, observational, interventional, environmental and population research studies that address the adverse differences in cancer incidence, prevalence, mortality, survivorship, burden and/or response to treatment in racial/ethnic minorities and/or underserved population groups. Proposed collaborations should focus on achieving research objectives that by necessity rely on diverse and complementary expertise, technical capabilities, and resource sets. Importantly, the supplemental request is required to be within the scope of the parent award and should expand the original aims to include a cancer disparity component and possible inclusion of international comparator cohorts. A trans NCI effort, the concept reissuance of the Collaborative Program is supported by NCI's Division of Cancer Biology (DCB), Division of Cancer Treatment and Diagnosis (DCTD), Division of Cancer Prevention (DCP), Division of Cancer Control and Population Sciences (DCCPS), Center to Reduce Cancer Health Disparities (CRCHD) and now, also included Center for Global Health.

Applications submitted to this FOA must include studies that meet the National Institutes of Health (NIH) definition of a clinical trial (see NOT-OD-15-015 for details) and provide specific clinical trial information as described in this FOA and the application instructions. This FOA does not and will not support clinical trials for studies of cancer diagnosis and/or oncologic therapy in patients.</p>

	Deadline Dates (ALL)	17-Dec-2023 [Optional][LOI/Pre-App], 16-Jan-2024			
	Synopsis	<p>This funding opportunity seeks to support the Comprehensive Partnerships to Advance Cancer Health Equity (CPACHE) Program. The CPACHE Program develops and maintains comprehensive, long-term, and mutually beneficial partnerships between institutions serving underserved health disparity populations and underrepresented students (ISUPs) and NCI-designated Cancer Centers (CCs). The program aims to achieve a stronger national cancer program and address challenges in cancer and cancer disparities research, education, and outreach, as well as cancer's impact on underserved populations. The institutions in each partnership are expected to work collaboratively to: 1) increase the cancer research and cancer research education capacity of the ISUPs; 2) promote the diversity of the cancer research workforce; 3) improve the effectiveness of CCs in developing and sustaining research programs focused on cancer health disparities and increase the number of investigators and students conducting cancer health disparities research; and 4) develop and implement cancer-related outreach and education initiatives that benefit the surrounding underserved communities.</p>

Synopsis		Through this Notice of Scientific Interest (NOSI), the National Cancer Institute intends to stimulate research on the role of RNA modifications in the area of cancer biology. Despite the recognition that RNA modifications and editing exert a substantial impact on gene expression and function, there is a lack of mechanistic insights into the dynamic regulation of RNA modifications and their de-regulation as drivers of cancer formation. A better understanding of the extent, diversity, and crosstalk between different types of RNA modification, and the elucidation of the molecular players that read and interpret the modification code are needed to reveal the mechanisms of RNA modifications that underlie cancer formation and the cancer phenotype.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This Notice of Special Interest (NOSI) seeks to support new and ongoing basic research that provides a deeper understanding of the biology and molecular mechanisms that determine the outcome of key diet/nutrient/cell interactions during early tumor development. Specifically, studies that examine the tumor preventive or tumor-promoting effects of dietary modulation of nutrient sensor signaling pathways during early tumor formation (initiation and malignant progression from early lesions) in preclinical cell, organoid, and animal models, with the goal of identifying and testing potential molecular intervention targets.

	Synopsis	Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) intends to facilitate well planned clinical trials across the cancer prevention and control spectrum aimed at improving prevention/ interception, cancer-related health behaviors, screening, early detection, healthcare delivery, management of treatment-related symptoms, supportive care, and the long-term outcomes of cancer survivors. Although the scientific literature or preliminary data may provide the rationale for conducting a clinical trial, investigators often lack critical information about the study population, accrual challenges, intervention, outcome/ endpoints, data/statistical challenges or operational risks necessary to finalize the trial protocol completely. These information gaps can result in multiple protocol changes before and after trial start-up, leading to the need for additional time and expenses that may prevent study completion. Further, the suitability and feasibility of new trial designs, which minimize infrastructure and reduce costs may need to be tested in the context of a particular intervention, at-risk group, symptom or venue. Preparatory studies may fill information gaps and address unknowns this can include a pilot/feasibility clinical trial if necessary, improving trial design and rigor.

and procedures in a Manual of Procedures (MOP). Additionally, there are other elements essential to the launching of a trial, such as obtaining regulatory authorizations or approvals and establishing agreements with requisite partners including cell manufacturing and production facilities, assay or cell analysis centers, and data coordinating centers. These activities are often costly and time-consuming, and they may involve collection of preliminary data to assess feasibility. The Regenerative Medicine Clinical Trial Planning Grant may be used by applicants to support the preparation of a clinical trial MOP and procedures necessary for implementing a clinical trial to evaluate interventions (or new treatments) that restore vision in humans through regeneration of cells.

Deadline Dates (ALL)	07-Jan-2024 , 16-Feb-2024 , 07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 16-Feb-2025 , 07-May-2025
Synopsis	The NEI supports large-scale clinical vision research projects, including randomized clinical trials and epidemiologic studies on eye/vision conditions. At the time of submission, applications requesting support for these activities are expected to provide detailed information regarding the study rationale, design, analytic techniques, protocols and procedures, facilities and environment, organizational structure, and collaborative arrangements. This information is best conveyed in a Manual of Procedures (MOP), the development of which represents a costly and time-consuming activity. This clinical research planning grant funding opportunity supports applicants in their planning efforts to conduct collaborative clinical research. The grant may be used to support the development of a MOP, as well as to conduct preliminary studies to refine study procedures or document recruitment potential. The grant must not be used to generate data on the effects of a proposed intervention. This NEI FOA is applicable to both epidemiologic and clinical trial research studies.

109824	NEI Research Grant for Vision-Related Secondary Data Analysis (R21 Clinical Trial Not Allowed)	National Eye Institute/NIH/DHHS	PAR-22-141	07-Jan-2024	275,000 USD

	<p>Contact Email everettd@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 16-Feb-2024 , 07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 16-Feb-2025 , 07-May-2025</p> <p>Synopsis This FOA encourages applications from institutions/organizations that propose to conduct vision-related secondary data analyses utilizing existing database resources. Applications may be related to, but must be distinct from, the specific aims of the original data collection. The NEI supports an extensive portfolio of clinical trials and large-scale epidemiologic research projects wherein numerous data collection activities are required to meet each project's specific aims. The resultant wealth of data generated by these studies often provides unique, cost-effective opportunities to investigate additional research questions or develop new analytical approaches secondary to a project's originally-intended purpose. Data are not limited to those collected under NEI support, but such data are of the highest programmatic interest. The purpose of this FOA is for secondary data analysis using existing data sets from vision-related clinical trials, epidemiologic, and other clinical research studies. This FOA may be used to develop new statistical methodologies or test hypotheses using existing data, but this FOA must not be used to support the collection of new data.</p>

Synopsis The purpose of this funding opportunity announcement (FOA) is to enhance the participation of individuals from diverse backgrounds, including those from groups that are nationally underrepresented in cardiovascular, pulmonary, hematologic and sleep disorders research across the career development continuum by providing support to institutions that promote diversity. The NHLBI's T32 Training Program for Institutions That Promote Diversity is a Ruth L. Kirschstein National Research Service Award Program intended to support training of predoctoral and health professional students and individuals in postdoctoral training institutions with an institutional mission focused on serving health disparity populations not well represented in scientific research, or institutions that have been identified by federal legislation as having an institutional mission focused on these populations, with the potential to develop meritorious training programs in cardiovascular, pulmonary, and hematologic diseases, and sleep disorders. These institutions are uniquely positioned to engage minority and other health disparity populations in research, translation, and implementation of research advances that impact health outcomes, as well as provide health care for these populations. This Funding Opportunity Announcement (FOA) does not

	Deadline Dates (ALL)	07-Jan-2024			
	Synopsis	The objective of this funding opportunity is to support investigator-initiated, Phase I clinical trials for diagnostic and therapeutic interventions for heart, lung, blood, and sleep (HLBS) disorders in adults and children. In addition to supporting clinical trial start-up and implementation activities, this FOA will provide support for final stage preclinical activities needed for the implementation of the proposed trial. All the activities proposed in the R61 phase must be directly related to the therapeutic/diagnostic in preparation for the clinical trial. The proposed trial can be single or multisite. This FOA will utilize a bi-phasic, milestone-driven mechanism of award where the first phase can be used to finalize required pre-trial activities such as stability, shipping studies, and site training.			
101703	NHLBI Early Phase Clinical Trials for Therapeutics and/or Diagnostics (R33 Clinical Trial Required)	National Heart, Lung, and Blood Institute/NIH/DHHS	PAR-21-118	07-Jan-2024	4,545,000 USD

	Deadline Dates (ALL)	11-Jan-2024 , 13-Feb-2024 , 10-May-2024 , 11-Jun-2024 , 11-Sep-2024 , 11-Oct-2024 , 10-Jan-2025 , 11-Feb-2025 , 12-May-2025 , 11-Jun-2025 , 11-Sep-2025			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) supports applications for a collaborating Data Coordinating Center (DCC) for investigator-initiated multi-site clinical trials including efficacy, comparative effectiveness, pragmatic and/or implementation research clinical trials. Trials using innovative designs such as platform trials, adaptive, and Bayesian designs are encouraged. These trials may include ones that test different therapeutic, behavioral, and/or prevention strategies. Trials for which this FOA applies must be relevant to the research mission of the NHLBI and meet the NIH definition of a clinical trial (see NOT-OD-15-015). For additional information about the mission, strategic vision, and research priorities of the NHLBI, applicants are encouraged to consult the NHLBI website. This FOA will utilize a milestone-driven cooperative agreement mechanism of award and runs in parallel with a companion FOA PAR-22-192() that encourages applications for a collaborating Clinical Coordinating Center (CCC). The objective of the DCC application is to present a comprehensive plan to provide overall project coordination, administration, data management, and biostatistical support for the clinical trial proposed in the collaborating CCC application. The application should also describe its approaches to collaborate with the CCC on implementation of the clinical trial community engagement and diversity plans. Both a DCC application and a collaborating CCC application must be submitted on the same application due date for consideration by NHLBI. Applicants are strongly encouraged to contact the appropriate Scientific/Research contact prior to submitting an application.</p>

Synopsis	The symptom-based diagnosis and treatment of heart, lung, blood, and sleep (HLBS) diseases has vastly improved in recent years, yet an understanding of the molecular mechanisms underlying many of these diseases has remained elusive.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Furthermore, in most cases the impact of genetic variation on severity of disease and treatment outcomes remains unknown. Therefore, the NHLBI has created the Trans-omics for Precision Medicine (TOPMed) program, which aims to utilize genomics data to characterize a variety of HLBS diseases. TOPMed is well on its way to collecting whole genome sequence (WGS) from over 194,270 well-phenotyped individuals and is currently generating multi-omics data (e.g., over 31,852 RNA sequences, over 44,342 DNA methylation profiles, and 26,124 metabolomics profiles) from many of these individuals to complement whole genome sequence information. Having produced an unprecedented volume of high-throughput data, TOPMed now seeks to turn its attention to effectively leveraging this resource to uncover biological function and disease pathobiology through novel systems biology analyses and the power of artificial intelligence (AI) and Machine Learning (ML). Although lower costs and technological improvements in sequencing technology have vastly expanded our ability to generate large volumes of omics data, the ability to analyze such large datasets to extract biologically meaningful insights remains challenging. Systems level models incorporating trans-omics analyses will be an important step in uncovering the underlying biological networks and the gene-gene and gene-environment interactions influencing disease and treatment outcomes. Thus, advanced analyses that incorporate genotype and phenotype datasets from thousands to tens of thousands of individuals are essential to move TOPMed to the next phase of discovery.

Synopsis	The purpose of this NOSI is to stimulate research focused on the development of transformative diagnostics and disease management tools for heart, lung, blood, or sleep (HLBS) disorders that are designed to meet the needs of the underserved populations. Underserved populations, for the purpose of this NOSI, can include racial and ethnic minorities, immigrants, the homeless, low-income individuals, the uninsured and people who live in communities that are socioeconomically disadvantaged, rural or have few health care resources. Please see NOT-OD-20-031 for NIH definitions. Special consideration will be given to technology solutions that are accessible and feasible in these communities. Working with community partners is required throughout the project to ensure successful development and implementation.

---------	---------------	--------------	----------------	---------------	----------------

Synopsis | This Notice of Special Interest (NOSI) calls for research to understand and promote cardiovascular and cardiometabolic health during transitional phases across the lifecourse, from pre-adolescence (6-10 years) through adolescence (11-18 years) to young adulthood (19-39 years). This initiative would support research to: 1) understand the mechanisms and the pathogenesis of cardiometabolic health and cardiovascular disease (CVD) risk in vulnerable groups throughout transitional phases from pre-adolescence into adolescence and adolescence into young adulthood, and 2) develop precision prevention interventions (at the individual and populations levels) to address cardiovascular and cardiometabolic risk across these transitional phases.

Synopsis | This NOSI encourages the submission of research project applications focused on understanding the long-term manifestations of acute HLBS illnesses with an emphasis on host response, viral pathways, and mechanisms that contribute to long-term manifestations in the context of HIV. Proposals considered responsive to the NOSI may address questions across the spectrum of basic science to population science.

Basic, translational, and clinical research applications to elucidate circadian-dependent mechanisms contributing to the pathophysiology of HLBS disorders are invited. This NOSI encourages multidisciplinary and multiple investigator teams of experts in heart, lung, and blood research fields to synergistically work with circadian biologists and sleep researchers to provide a comprehensive understanding of the circadian biology in relation to HLBS conditions. The purpose is to facilitate translational research to identify potential applications of circadian science to the diagnosis, prevention and treatment of HLBS conditions. Mechanism-based studies investigating the circadian rhythm dysregulation, clinical markers, and/or therapeutic targets of HLBS conditions are encouraged. Behavioral, physiological, pharmacological, molecular, and genomic studies aimed at elucidating the relationship between circadian-dependent mechanisms and disease are appropriate. Studies to delineate circadian-based mechanisms, therapeutic targets, epidemiological risk and clinical trials to assess therapeutic safety, efficacy, effectiveness, or implementation may be proposed.</p>

	Synopsis	This Funding Opportunity Announcement (FOA) invites applications to use NHLBI-funded TransOmics for Precision Medicine (TOPMed) program to generate a large volume of integrated genetic and multi-omics data to facilitate discovery of the molecular mechanisms of Heart, Lung, Blood, and Sleep (HLBS) disorders. No funding will be provided under this FOA. The omics data and related phenotypic data will be deposited in a public NIH-designated controlled-access database such as the database for Genotypes and Phenotypes (dbGaP) and NHLBI's BioData Catalyst (BDC).The overall goal is to transition the program from genetic Map to Mechanism (M2) and to fill knowledge gaps that have not been sufficiently covered by existing TOPMed datasets, enabling functional genomics research that will accelerate mechanistic personalized medicine.

Synopsis	<p>The purpose of this funding opportunity announcement (FOA) is to solicit current or recently completed NHLBI K01, K08, K23, and K25 recipients for small grant support to expand their current research objectives or to branch out to a new study that resulted from the research conducted under the K award. Active NHLBI K01, K08, K23, and K25 recipients may apply for R03 support after the notice of award (NoA) for their first type-5 K awards has been issued. Recently completed NHLBI K01, K08, K23, and K25 recipients are eligible to apply for the R03 if the earliest possible R03 start date falls within 2 years of their prior NHLBI K award Project Period end date. This FOA is intended to enhance the capability of NHLBI K01, K08, K23, and K25 recipients to conduct research as they complete their transition to fully independent investigator status. This R03 program is intended to support research projects that can be carried out and completed within a short period of time (no more than two years) with limited resources and that may generate preliminary data to support a subsequent R01-equivalent application. These studies include, but are not limited to, pilot or feasibility studies; proof of concept studies; secondary analysis of existing data; small, self-contained research projects; development of new research methodologies or technologies, or development of novel experimental models. A minimum of 40% protected overall research effort, not necessarily limited to the proposed R03 project, is required from applicants. For current and previous K23 recipients, research proposed in the R03 application may or may not include patient-oriented research.</p>

Deadline Dates (ALL)	07-Jan-2024
Synopsis	<p>This Funding Opportunity Announcement (FOA) supports studies that are both necessary and sufficient to inform the planning of a Phase II-IV clinical trial within NHLBI's mission. The NHLBI expects that applications to this FOA will describe the planned clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent trial. Furthermore, this FOA will support research projects that are designed to provide results that will be sufficient to inform the future trial without further studies. The planned Phase II, III, or IV trial must be primarily intended to test the efficacy, safety, clinical management, or implementation of intervention(s) in the prevention and/or treatment of heart, lung, blood, and sleep disorders. In contrast to the study start up or preparation phase of NHLBI funding opportunities for clinical trials (as described at https://www.nhlbi.nih.gov/grants-and-training/funding-opportunities-and-contacts/clinical-trials-optimization), the R34 mechanism is intended to provide new information that answers a scientific or operational question(s) which may be pragmatic in nature and, therefore, informs the final development of a Phase II-IV clinical trial. Regardless of the results of the R34, support of the proposed future clinical trial will require a new application.</p>

	Synopsis	The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. To accomplish the stated over-arching			

NIH Funding Opportunities

---------	---------------	--------------	----------------	---------------	----------------

goal, this NOFO will support educational activities with a primary focus on: Courses for Skills Development Research Experiences. Another overarching goal of this R25 program is to support and integrate educational and mentorship activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in genomics research. This notice of funding opportunity (NOFO) seeks to expose undergraduate and post-baccalaureate level students to the foundational sciences relevant to genomics to enable them to pursue careers that span all areas of interest to NHGRI - genome sciences, genomic medicine, genomics and society, genomic data science, and genomics and health equity. For the purposes of this NOFO, the term “genomics” encompasses issues and activities in these five areas. To accomplish the stated overarching goal, this NOFO will support creative educational activities with a primary focus on Research Experiences for undergraduate and/or post-baccalaureate trainees that include extensive mentorship activities. Programs should fall under the following categories: 1) summer, semester, or academic year programs for undergraduate trainees; 2) year-long program (duration of at least 12 months) for post-baccalaureate trainees. The research experiences must be based on the foundational sciences relevant to genomics: genomic sciences; genomic medicine; genomics and society; computational genomics and data science, or genomics and health equity. A secondary focus is on Courses for Skills Development. Complementary didactic activities are encouraged, especially those academic courses that have the potential to increase opportunities for success at the next career level. The proposed research education programs must include both research experiences and courses for skills development, with primary emphasis on the former. Proposed courses should be developed in conjunction with and support research experiences to enhance skills development.

	<p>Contact Telephone 240-627-3566</p> <p>Contact Email CMII@niaid.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 27-Dec-2023 [Optional][LOI/Pre-App], 26-Jan-2024</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) invites applications for the Computational Models of Influenza Immunity (CMII) Cooperative Agreement Program. The program will employ computational modeling and immunologic studies to advance our understanding of the requirements for improving anti-influenza immunity, including inducing broad immune protection and enhancing immune durability. This program will help inform design of universal or improved seasonal flu vaccines. Projects may lead to a better understanding of how pre-existing immunity and repeat exposures (natural infection and/or vaccines) shape an individual's immune "landscape." Predictive modeling of adjuvants/vaccine formulations and experimental validation supported by this program should lead to enhanced host immune responses and universal or improved seasonal influenza vaccine efficacy.</p>

	Deadline Dates (ALL)	27-Dec-2023 [Optional][LOI/Pre-App], 26-Jan-2024			
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support basic research that will elucidate mechanisms of Fc-mediated antibody functions, including antibody-dependent cellular cytotoxicity (ADCC) and antibody-dependent cell-mediated phagocytosis (ADCP). Supported studies are expected to generate foundational data and tools that can be applied to the prediction of Fc-mediated killing activity by antibodies. Such data should accelerate development of therapeutic monoclonal antibodies and design of vaccines or vaccine-adjuvant combinations that induce antibody responses capable of killing infected host cells, particularly in cases where induction of neutralizing antibodies fails or is insufficient for clearance of infection.

	Deadline Dates (ALL)	05-Jan-2024 , 07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 05-Apr-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 05-Sep-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 05-Jan-2025 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 05-Apr-2025 , 07-May-2025 , 05-Jun-2025 , 16-Jun-2025 , 05-Sep-2025 , 07-Sep-2025 , 05-Oct-2025 , 16-Oct-2025 , 05-Jan-2026 , 07-Jan-2026			
	Synopsis	The purpose of this Notice of Special Interest (NOSI) is to highlight NIAID’s interest in supporting research in the areas outlined in the NIAID Strategic Plan For Research To Develop A Valley Fever Vaccine. The proposed research should have clear relevance to the strategic priorities defined in the strategic plan, which encompasses three major research areas: 1) address gaps in Coccidioides basic research to support the development of a vaccine; 2) develop tools and resources to support vaccine development; 3) develop and advance vaccines to prevent coccidioidomycosis.

	Synopsis	The purpose of the NIAID Physician-Scientist Pathway to Independence Award (K99/R00) program is to increase and maintain a strong cohort of new and talented independent physician-scientists. This program is designed to facilitate a timely transition of outstanding postdoctoral researchers with a clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIAID research support during this transition to help awardees launch competitive, independent research careers in biomedical fields and thereby help to address the national physician-scientist workforce shortage. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this FOA candidates are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA (PAR-23-070).

	Deadline Dates (ALL)	25-Jan-2024			
	Synopsis	<p>The National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH), of the Department of Health and Human Services (DHHS) supports research related to the basic understanding of microbiology and immunology leading to the development of vaccines, therapeutics, and medical diagnostics for the prevention, treatment, and diagnosis of infectious and immune-mediated diseases. The discovery and development of an AIDS vaccine remains among the highest research priorities of the National Institute of Allergy and Infectious Diseases (NIAID) and is a principal mission of NIAID’s Division of AIDS (DAIDS). To support this mission, NIAID has provided high- quality, novel, and targeted reagents, assays, and services for investigators engaged in AIDS vaccine-related research, including NIAID-funded grantees and contractors, other NIH- funded researchers, and investigators supported through various Non-Governmental Organizations (NGOs). These services are provided through this contract by investigator request and NIAID staff approval. The current contract for this work is entitled " Reagent Resource Support Program for AIDS Vaccine Development” and the incumbent contractor is Quality Biological Inc., contract number HHSN272201800007C. The purpose of the proposed contract will be to produce, procure, store, ship, and maintain an up-to-date inventory of high-quality reagents, assays, and services in support of preclinical and clinical AIDS vaccine research. The Contractor shall: 1) procure, purify, and test reagents, including, for example: viral proteins and peptides, virus stocks, monoclonal and polyclonal antibodies, topical microbicides, vaccine vectors, vaccine adjuvants and cytokines, and any additional reagents deemed necessary for the NIAID DAIDS Vaccine Research Program; 2) perform genetic cloning and sequencing; 3) acquire the needed reagents, assays, and/or services used to evaluate AIDS vaccine safety and immunogenicity in small animal and/or NHP models; 4) analyze all reagents for purity and integrity, and provide for their quality control and assurance; and 5) provide for receipt and inventory tracking, storage, maintenance, and distribution of all reagents. It is anticipated that one (1) cost reimbursement, level-of-effort (term) type contract will be awarded. The period of performance will be for one (1) year (Base Period) plus six (6) one- year options (terms) that may be exercised by the Government unilaterally, for a total possible performance period of seven (7) years, beginning on or about January 7, 2018.The requirement will be for the delivery of 2.00 full time equivalents (FTEs) per year for the Base Period (Year 1) and each option period (Years 2 through 7).In addition to the above functions and services to be provided for the Base period, the Government may exercise, at its discretion, Options for additional level of effort to accommodate significant increases in work. These Options are defined as follows: Option 1 - 6: Extend the Term of the Contract: The Government may exercise options to extend the term of the contract beyond the Base period (Year 1), annually, for a total contract period of up to 7 years of the performance. The total period of performance resulting from the base period plus all potential Term Options is 7 years. Assume that the scope and types of activities as outlined for the Base Period (Year 1 of the contract) would be continued for each succeeding annual contract period. Options 7-20 Increased Level of Effort: The Government may exercise options for increased level of effort that may result from unanticipated increases in</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount														
	<p>demand. Up to Two (2) Options per year may be exercised during years 1 through 7 of contract performance. Should the Government elects to exercise these Options, the Contractor shall provide an additional 1.0 FTE for each option exercised. The period of performance of an Option for Increased Services will not exceed the term of the base year or the Option year in which the Option is exercised. Any responsible offeror may submit a proposal which will be considered by the Agency. This RFP will be available electronically on/about October 27, 2023, and may be accessed through SAM.gov. This notice does not commit the Government to award a contract. No collect calls will be accepted. No facsimile transmissions will be accepted. For this solicitation, the NIAID requires proposals to be submitted online via the NIAID electronic Contract Proposal Submission (eCPS) website. Submission of proposals by facsimile or e-mail is not acceptable. For directions on using eCPS, go to the website https://ecps.nih.gov and then click on "How to Submit."</p>

Synopsis	The purpose of the Historically Black Colleges and Universities (HBCUs) Biomedical Engineering, Imaging, and Technology Acceleration (BEITA) program is to enhance bioengineering and imaging research capacity, technology innovation, education and research training, and opportunities for scientific growth at HBCUs in order to utilize the Nation's full range of talent in meeting the growing need to accelerate the development and translation of high-impact biomedical innovation and technologies. The HBCU BEITA initiative will provide funding to strengthen the research capacity and technology innovation at HBCUs, accelerate technology development and implementation, and prepare students at HBCUs for careers in biomedical engineering, imaging, and technology (BEIT).

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The purpose of this FOA is to provide investigators with a mechanism to request services from this facility that would advance their contraceptive development program. This FOA aims to position innovative and validated methods for future clinical development. Applicants do not need to have current NIH funding to apply, but priority may be given to programs receiving NIH support at the time of application submission.			
113304	Notice of Special Interest (NOSI): Research on the Impact of Policy Changes and Emerging and Evolving Public Health Crises on NICHD Populations of Interest	National Institute of Child Health and Human Development/NIH/DHHS	NOT-HD-22-038	07-Jan-2024	Not Specified

	Synopsis	The Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) is issuing this Notice of Special Interest (NOSI) to announce that research on the effects of: emerging and evolving public health crises; and/or policy changes on the health, development, and well-being of populations of interest to the NICHD is of high program priority. The NICHD populations of interest are neonates, infants, children, adolescents, and young adults, pregnant and post-partum and nursing people, individuals of reproductive age, and individuals with intellectual, developmental, or physical disabilities, as well as the families of these individuals. For information on the NICHD Strategic Plan 2020, see NICHD Strategic Plan 2020 NICHD - Eunice Kennedy Shriver National Institute of Child Health and Human Development (nih.gov)

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to correlate immune system development patterns between two or more age groups - neonates, infants, and children and adolescents and further understand the impact of infectious diseases, microbiome and environmental factors on the ontogeny and development of the pediatric immune system, from birth, transitioning into adolescence and adulthood with the focus of impact during pregnancy and post-natal period.			
115912	Notice of Special Interest (NOSI): Research to Improve Pre-Pregnancy Care and Enhance Healthy Birth Intervals	National Institute of Child Health and Human Development/NIH/DHHS	NOT-HD-23-003	07-Jan-2024	Not Specified

	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-May-2024			
	Synopsis	The purpose of this Notice of Special Interest (NOSI) is to encourage research on the processes that facilitate or hinder the achievement of healthy interbirth intervals and promote healthy birth outcomes. Because short interbirth intervals are associated with a range of risk factors and poor maternal and child health outcomes, reducing the proportion of pregnancies conceived within 18 months of a previous pregnancy is a Healthy People 2030 objective. These negative outcomes include a lack of preconception health care, delayed prenatal care, preeclampsia, prematurity, low birth weight, infant mortality, and maternal morbidity and mortality. Short interbirth intervals may also reduce the duration of breastfeeding; conversely, the continuation of breastfeeding can contribute to the lengthening of interbirth intervals. This NOSI is intended to encourage collaboration among researchers across the social, behavioral, biomedical, and public health sciences to elucidate understanding of the modifiable factors behind barriers to enhancing birth intervals.

	Deadline Dates (ALL)	07-Jan-2024 , 16-Feb-2024 , 07-May-2024			
	Synopsis	The NICHD Small Research Grant Program (Clinical Trial Required) supports clinical trials that fall within the NICHD mission. This funding opportunity announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ FOA.			
103808	Notice of Special Interest (NOSI): Reproductive Health, Pregnancy, and Parenting among Women with Disabilities	National Institute of Child Health and Human Development/NIH/DHHS	NOT-HD-21-025	07-Jan-2024	Not Specified

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025</p> <p>Synopsis Although the placenta is a short-lived organ limited to pregnancy, its importance is often underappreciated in being a crucial organ for the propagation of our species and future health of our progeny. Perturbations in any one of its many functions may result in many common adverse pregnancy outcomes. These include early pregnancy loss, preeclampsia, fetal growth restriction, stillbirth, and preterm birth. In addition, a poorly functioning placenta can lead to aberrant programming of the fetus that can impact the health of the individual later in adult life. This includes an increased incidence of adult diseases such as obesity, cardiovascular disease, and diabetes. Thus, a more comprehensive understanding of the placenta is necessary to help address a number of major gaps in knowledge.</p>				
121650	RFA-DE-24-006 -- NIDCR Award for Sustaining Outstanding Achievement in Research (SOAR) (R35 Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	RFA-DE-24-006	26-Dec-2023 [Optional][LOI/Pre-App]	5,200,000 USD

This NOSI encourages innovation, optimization and customization of core technologies in digital dentistry that improve efficiency of oral healthcare delivery, effectiveness of clinical decision-making and outcomes of treatments associated with dental, oral and craniofacial (DOC) tissues. Among the areas of interest of this NOSI, are development of digital imaging and image processing capabilities for dental radiology, and the integration of 3-dimensional additive manufacturing with imaging tools. This NOSI also supports efforts to develop, integrate, adapt, optimize, and validate new and existing dental materials designed for additive manufacturing approaches in the repair, replacement and restoration of DOC tissues.</p>				
101701	<p>NIDCR Dual Degree Dentist Scientist Predoctoral to Postdoctoral Transition Award (F99/K00 Independent Clinical Trial Not Allowed)</p>	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-21-108	08-Dec-2023	Not Specified

102061	NIDCR Predoctoral to Postdoctoral Transition Award for a Diverse Dental, Oral and Craniofacial Research Workforce (F99/K00 Independent Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-21-060	08-Dec-2023	Not Specified
	<p>Contact Name Leslie A. Frieden, Ph.D.</p> <p>Contact Telephone 301-496-4263</p> <p>Contact Email leslie.frieden@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 08-Dec-2023 , 07-Jan-2024</p> <p>Synopsis The purpose of the NIDCR Predoctoral to Postdoctoral Transition Award for a Diverse Dental, Oral and Craniofacial Research Workforce (F99/K00) is to support outstanding graduate students from diverse backgrounds, including those from groups underrepresented in biomedical, clinical, behavioral and social sciences, over the transition from predoctoral to postdoctoral research training. This phased award program will facilitate completion of graduate PhD or dual degree clinician scientist programs (F99) and progression to mentored postdoctoral positions in dental, oral and craniofacial research (K00). It is anticipated that successful completion of this phased award program will enable achievement of an independent research faculty position and subsequent NIDCR career development and research project awards. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>				
102596	NIDCR Clinical Trial Planning and Implementation Cooperative Agreement (UG3/UH3 Clinical Trial Required)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-21-160	07-Jan-2024	Not Specified

biologic, device, or procedure for dental, oral, or craniofacial diseases or conditions, including trials for any phase of testing for a Food and Drug Administration (FDA)-regulated product. Awards made under this FOA will initially support a one-year milestone-driven UG3 planning phase, with possible transition to a UH3 clinical trial implementation phase of up to five years. The UH3 phase of the award will support the conduct of one investigator-initiated clinical trial. The UG3 planning phase permits both operational and scientific planning activities. Operational planning activities include, at minimum, finalizing the protocol and preparing other documents to implement the clinical trial (e.g., data collection instruments, Manual of Procedures, data management plan). Allowable scientific planning activities include small-scale data collection to assess the feasibility and/or acceptability of a planned intervention and associated study procedures (e.g., acceptability of mode of intervention delivery; feasibility of proposed data collection procedures; preliminary testing of intervention training and fidelity monitoring procedures) and assessment of the subject population to determine recruitment potential for the future trial. The UG3 phase cannot be used to test for intervention safety or efficacy. If the application proposes a clinical trial with an investigational drug, biologic or device, the investigators must have submitted the appropriate investigational application to the FDA prior to the UH3 phase.

117461	NIDCR Prospective Observational or Biomarker Validation Study Cooperative Agreement (U01 Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-23-162	07-Jan-2024	Not Specified

UH3 clinical trial implementation phase (UH3) of up to five years. The UG3 phase for behavioral and social intervention clinical trials will permit both scientific and operational planning activities. Scientific planning activities include small-scale data collection to assess the feasibility and/or acceptability of a planned behavioral or social intervention and associated study procedures (e.g., acceptability of study content or mode of delivery; feasibility of proposed data collection procedures; preliminary testing of intervention training and fidelity monitoring procedures). Operational planning activities include, at a minimum, development of: the final clinical protocol; the intervention manual or equivalent; the data management system and other tools for data and quality management, safety and operational oversight plans; recruitment and retention strategies; and other essential documents. The UH3 phase will support the conduct of investigator-initiated intervention research at all stages, from early mechanistic research and intervention development (e.g., Stages 0/ I) through implementation and health services research (Stages IV/V). This FOA may also support basic behavioral experimental studies with humans that are considered clinical trials based on the NIH's revised clinical trial definition (please see Clinical Trial Requirements for Grants and Contracts for guidance).

(25% full-time professional effort) in any year of the R00 phase. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.

108353	NIDCR Dual Degree Dentist Scientist Pathway to Independence Award (K99/R00 Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	PAR-22-041	07-Jan-2024	Not Specified

Synopsis The purpose of the NIDCR Dentist Scientist Career Transition Award for Intramural Investigators (K22) program is to facilitate transition of highly qualified dentists from NIH Intramural postdoctoral research positions to extramural academic tenure-track or equivalent faculty positions at eligible institutions. The award will provide support for two years of mentored postdoctoral research training in the NIH Intramural Research Program, and three years of independent research funding at the extramural institution. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. 	Synopsis	NIDCR announces its interest in encouraging state-of-the-art, systematic research approaches to determine mechanisms underlying the ability or inability of the immune system to dynamically maintain its functional role against internal and external perturbations, and to examine immune mechanisms of protection against recurrence of chronic inflammation in response to infectious and autoimmune diseases of dental, oral, and craniofacial (DOC) tissues. The expectation is that new knowledge derived from this research will facilitate development of novel, personalized immunomodulatory-based therapies that shift the balance between degenerative and regenerative processes toward protection against episodic recurrence and preventative disease management in a patient-specific manner across the lifespan.

	Synopsis	The Medical Student Research Training (MSRT) program provides mentored support for medical students interested in taking a year off from their medical school studies to work in an academic research lab. Support will be provided through an administrative supplement to an active NIDDK institutional training grant (T32 or TL1) in the an area of research within the NIDDK mission. A list of currently funded T32 program locations with the Principal Investigator contact information is available on the NIDDK website. Providing the opportunity for students to interrupt their medical school studies for up to 12 months to pursue a research project should help them solidify their decisions to pursue a research career, focus their research interests, and provide a background for future training and career development programs once they have completed their medical training.

	Synopsis	<p>The purpose of this NIDDK Funding Opportunity Announcement (FOA) is to support pilot and feasibility trials to test pragmatic interventions that include screening for adverse social determinants of health (SDoH) and referring or providing resource service linkages for social services within the healthcare setting for individuals living with type 1 diabetes. The pilot trials will determine 1) feasibility of screening for social risks and implementing referral service linkages (e.g., connecting persons in need to appropriate transportation, housing, food, etc. resources) within the context of a healthcare encounter, and 2) preliminary signals of the intervention’s impact on both the social risk(s) and type 1 diabetes (T1D) specific outcomes such as glycemic control. The overarching goal of this FOA is to stimulate collaborations between healthcare systems, community-based organizations, and social service entities for testing and advancing effective interventions which integrate social care and medical care to reduce health disparities in T1D.</p>

	Synopsis	<p>This Funding Opportunity Announcement (FOA) invites applications for innovative basic and translational pilot research projects within the mission of the NIDDK that are aligned with NIH HIV/AIDS research priorities. These priorities were most recently outlined by the NIH Office of AIDS Research (OAR) in NOT-20-018, UPDATE: NIH HIV/AIDS Research Priorities and Guidelines for Determining HIV/AIDS Funding, scientific priorities. Potential topics could address multiple overarching priorities. These include elucidation of unique pathophysiological mechanisms contributing to HIV comorbidities, coinfections, and complications (CCCs) affecting organs, tissues, and processes within the mission of the NIDDK. Likewise, interrogations into biological mechanisms underlying HIV reservoirs in NIDDK-relevant tissues are important for developing strategies for long-term viral suppression or eradication. Finally, health-impeding social determinants of health may affect CCCs or viral reservoirs within NIDDK's mission through multiple pathways.</p>

Conte Digestive Diseases Research Core Centers (DDRCCs). The DDRCCs are part of an integrated program of digestive and liver diseases research support provided by the NIDDK. The purpose of this Centers program is to bring together basic and clinical investigators as a means to enhance communication, collaboration, and effectiveness of ongoing research related to digestive and/or liver diseases within the NIDDK's mission. DDRCCs are based on the core concept, whereby shared resources aimed at fostering productivity, synergy, and new research ideas among the funded investigators are supported in a cost-effective manner. Each proposed DDRCC must be organized around a central theme that reflects the focus of the digestive or liver diseases research of the Center members. The central theme must be within the primary mission of the NIDDK, and not thematic areas for which other NIH Institutes or Centers are considered the primary source of NIH funding. This NOFO requires a Plan for Enhancing</p>

The NIDDK is announcing its intent to issue a single source cooperative agreement award to the University of Pennsylvania. The purpose of this Single Source is to extend the Human Pancreas Analysis Program for Type 2 Diabetes (HPAP-T2D). The HPAP-T2D is a resource-generation program that is tasked with: 1) identifying, collecting and intensively characterizing primary pancreatic tissues from patients with T2D and related forms of islet dysfunctions, as well as age-matched controls; and 2) curating, organizing, analyzing and sharing the data resulting from the study of these tissues through the PANC DB open-access resource database. HPAP-T2D is a component of the Human Islet Research Network (HIRN), created in 2014 to support innovative and collaborative translational research to understand how human beta cells are lost in Type 1 Diabetes (T1D), and to find innovative strategies to protect and replace functional human beta cell mass.

	<p>Deadline Dates (ALL) 16-Nov-2023 , 07-Jan-2024 , 16-Feb-2024 , 16-Mar-2024 , 07-May-2024 , 16-Jun-2024 , 16-Jul-2024 , 07-Sep-2024 , 16-Oct-2024 , 16-Nov-2024 , 07-Jan-2025 , 25-Feb-2025 , 16-Mar-2025 , 07-May-2025 , 16-Jun-2025 , 16-Jul-2025 , 07-Sep-2025</p> <p>Synopsis The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) announces a program that provides NIDDK-supported K01, K08, K23, and K25 recipients the opportunity to apply for Small Grant (R03) support during the latter years of the award period of their K award. Through the use of this mechanism, the NIDDK is seeking to enhance the capability of its K01, K08, K23, and K25 award recipients to conduct research as they complete their transition to fully independent investigator status. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is, therefore, intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application.</p>

	<p>Contact Telephone</p> <p>Contact Email laurie.stepanek@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 31-Jan-2024 , 31-Jan-2025</p> <p>Synopsis The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Courses for Skills Development Research Experiences This Funding Opportunity Announcement (FOA) provides support to eligible, domestic institutions to develop and implement effective, evidence-informed approaches to biomedical research education and mentoring that will keep pace with the rapid evolution of the research enterprise. NIGMS expects that the proposed research education programs will incorporate extensive research experiences and well-designed courses for skills development to prepare recent baccalaureates from diverse backgrounds to transition into and complete rigorous, research-focused biomedical doctoral degree programs (e.g., Ph.D. or M.D./Ph.D.). This program is limited to applications from doctoral degree-granting institutions that are research-intensive (i.e., those with NIH research project grant (RPG) funding averaging greater than or equal to \$7.5 million in total costs per year over the last three fiscal years). This FOA does not allow appointed participants to lead an independent clinical trial but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>

 Deadline Dates (ALL) | 16-Jan-2024 , 16-May-2024 , 16-Jan-2025 , 16-May-2025

Synopsis | The Maximizing Investigators' Research Award (MIRA) provides support for the program of research in an investigator's laboratory that is within the mission of NIGMS. The goal of MIRA is to increase the efficiency and efficacy of NIGMS funding. It is anticipated that this program will: Increase the stability of funding for NIGMS-supported investigators, which could enhance their ability to take on ambitious scientific projects and approach problems more creatively; Increase flexibility for investigators to follow important new research directions within the NIGMS mission as opportunities arise, rather than being bound to specific aims proposed in advance of the studies; More widely distribute funding among the nation's highly talented and promising investigators to increase overall scientific productivity and the chances for important breakthroughs; Reduce the time spent by researchers writing and reviewing grant applications, allowing them to spend more time conducting research; Enable investigators to devote more time and energy to mentoring trainees in a more stable research environment. This FOA allows applications from eligible NIGMS-funded investigators and from New Investigators proposing research within the scientific mission of NIGMS. The FOA also allows renewal applications from all current MIRA grantees (established investigators and those previously funded as early-stage investigators). PD/PIs who are currently Early Stage Investigators (ESIs) should apply through the ESI MIRA FOA and should not apply through this FOA.

113303	Centers of Biomedical Research Excellence (COBRE) Phase 1 (P20 Clinical Trial Optional)	National Institute of General Medical Sciences/NIH/DHHS	PAR-22-250	31-Dec-2023 [Optional][LOI/Pre-App]	7,500,000 USD

	Deadline Dates (ALL)	20-Jan-2024 [Optional][LOI/Pre-App], 20-Feb-2024			
	Synopsis	<p>This initiative supports pilot work for subsequent research to test the effectiveness of combined interventions to both detect and intervene to reduce risk of suicide and suicide ideation and behavior (SIB), and non-suicidal self-injury (NSSI) specifically among children and adolescents from underserved populations. Applications should focus on developmental work that would enhance the probability of success in subsequent larger scale R01 projects. Research generating new information about factors causing/reducing disparities is strongly encouraged, along with due consideration for the variation in developmental needs across children and youth. Applications proposing definitive tests of an intervention/implementation strategy should respond to the companion R01 announcement RFA-MH-21-187. Opportunities for detection and prevention in youth may occur at various points of contact across an array of mental health specialty and non-specialty settings. This Funding Opportunity Announcement (FOA) invites development of service strategies that are designed to be delivered in typical service settings using commonly available personnel and resources, to enhance the future implementation of interventions that are proven effective, enhance their future uptake in diverse settings, and thereby reduce risk of suicide and self-harm. Given the importance of cultural, social and contextual factors, the service strategy under development should account for individual-, family, community-, provider-, and organizational-level factors necessary to optimize effectiveness, feasibility, and rapid uptake, implementation and sustained delivery, thereby accelerating the benefit to the population. The intervention should improve connections to preventive and treatment interventions with proven effectiveness in reducing suicide and suicidal ideation and behaviors, with the goal of making these more available, accessible, and more effectively delivered to underserved youth, in a sustained and coordinated way. This FOA encourages pilot research focused on the development of systems-level interventions and is not intended to support development or testing of new screening tools, assessment instruments, or pilot studies for the development of individual-level preventive or therapeutic interventions. This FOA is published in parallel to a companion R01 FOA (RFA-MH-21-187) supporting larger</p>

Synopsis

This initiative supports research to test the effectiveness of combined strategies to both detect and intervene to reduce the risk of suicide and suicide ideation and behavior (SIB) and/or non-suicidal self-harm (NSSI) by youth from populations that are often underserved by the mental health system. Specifically, this Funding Opportunity Announcement (FOA) encourages services research aimed at testing easily implemented systems-level interventions and strategies that improve systematic risk identification, coordinated referral to, or engagement and retention in quality care for prevention of SIB and/or NSSI among adolescents and children from the targeted populations. Opportunities for detection and prevention in youth may occur at various points of contact across an array of mental health specialty and non-specialty settings. The service strategies to be tested under this announcement should be designed for delivery in typical service settings using commonly available personnel and resources, to enhance implementation and future uptake in diverse settings, and thereby reduce risk of suicide and self-harm. Given the importance of cultural, social, and contextual factors, the intervention strategies should account for individual-, family-, community-, provider-, and organizational-level factors to optimize effectiveness, feasibility, acceptability, rapid uptake and sustained delivery. The strategy should also improve connections to preventive and treatment interventions with proven effectiveness in reducing SIB or NSSI, with the goal of making these interventions more available, accessible, and more effectively delivered to youth, in a sustained and coordinated way. This FOA encourages research focused on systems-level interventions and is not intended to support the development or testing of new screening tools, assessment instruments, or individual-level preventive or therapeutic interventions. This FOA is published in parallel to a companion R34 FOA (RFA-MH-21-188) supporting pilot studies in preparation for the larger-scale studies described here. This FOA is focused on services interventions for use in settings that

The ADGCs will be responsible for developing and carrying out high and moderate-throughput assays to characterize the central nervous system (CNS) function of a set of NPD risk genes, selected by the SSPsyGene Consortium, using relevant experimental systems (e.g., cellular, ex vivo, model organism). ADGCs will work in collaboration with the central Data Resource and Administrative Coordination Center (DRACC), to form the SSPsyGene Consortium. The consortium will develop and implement methods and standards to create a harmonized cross-modality and cross-species phenotypic data set to systematically characterize the function of NPD risk genes. ADGCs selected for funding will work closely with other funded ADGCs and the DRACC to achieve the goals of the SSPsyGene Consortium. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>				
113136	RFA-MH-21-175 -- BRAIN Initiative: Engineering and Optimization of Molecular Technologies for Functional Dissection of Neural Circuits (UM1 Clinical Trial Not Allowed)	National Institute of Mental Health/NIH/DHHS	RFA-MH-22-245	16-Jan-2024 [Optional][LOI/Pre-App]	Not Specified

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 16-Jan-2024 [Optional][LOI/Pre-App], 15-Feb-2024 , 18-Sep-2024 [Optional][LOI/Pre-App], 17-Oct-2024</p> <p>Synopsis This funding opportunity announcement (FOA) is intended to support the creation of Centers for accelerated engineering and optimization of high-impact, molecular technologies to monitor and/or manipulate brain cell activity in experimental animals. The Centers will produce high-impact molecular probes such as, but not limited to, fluorescent protein indicators of neuronal state variables (e.g., intracellular calcium, membrane voltage, released neurotransmitters/neuromodulators, etc.), molecular integrators of neural activity, optogenetic, chemogenetic, sonogenetic, magnetogenetic actuators, and activity-dependent molecular switches. This FOA is part of the Brain Research through Advancing Innovative Neurotechnologies (BRAIN Initiative Armamentarium project, whose goal is to generate tools to specifically access, manipulate, and monitor brain cell types across multiple species. In this FOA, technology optimization is sought for existing tools for brain cell monitoring or manipulation that are beyond the proof-of-concept stage and that can be delivered selectively as payloads to cell types using newly developed brain cell access reagents. Each Molecular Payloads Center is expected to integrate: (1) sufficiently scaled molecular engineering, (2) in vivo validation of improvements seen in engineering assays in intact brains of experimental animals, (3) benchmarking throughout the technology development against existing best-in-class tools, and (4) adaptation of tools into easily produced and applied formats for neuroscience users. Molecular Payloads Centers may also include optional demonstration experiments that establish groundbreaking capabilities of improved molecular tools in vivo. This FOA will foster close interaction between technologists and neurobiologists in a research consortium including tool developers funded by other Armamentarium FOAs for brain cell access reagents. The Armamentarium consortium will promote rigorous technology design, benchmarking, validation, and distribution of monitoring and/or manipulation tools and associated brain cell access reagents.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to enhance the diversity of the mental health research workforce by providing dissertation awards in all research areas within the strategic priorities of the NIMH to individuals from diverse backgrounds, including those from groups underrepresented in biomedical, behavioral, clinical and social sciences research. This FOA provides support to complete a mental health-related doctoral research project and includes funds not readily available in NRSA predoctoral (F31) awards, which limit support to stipends, tuition and fees, and institutional allowance.			
115128	Innovations to Optimize HIV Prevention and Care Continuum Outcomes (R01 Clinical Trial Optional)	National Institute of Mental Health/NIH/DHHS	PAR-23-062	09-Jan-2024	Not Specified

	Synopsis	The NIMH invites applications for Research Project Grants (R01) that propose to advance innovative research to optimize HIV prevention, treatment, and care. Applications may include formative basic behavioral and social science to better understand a step or steps in the HIV prevention or care continuum, large-scale intervention efficacy or effectiveness trials, implementation science studies, or data science approaches to optimize HIV prevention, treatment, and care. Applicants are encouraged to read current Notice of Special Interest (NOSIs) from NIMH Division of AIDS Research (DAR) for further information about the Division’s research priorities (NIMH DAR; https://www.nimh.nih.gov/about/organization/dar/aids-related-funding-opportunity-announcements-foas), and the NIH Strategic Plan for HIV and HIV-Related Research by NIH Office of AIDS Research (NIH OAR; https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan). This FOA, PAR-23-062, uses the R01 grant mechanism for applications with preliminary data or those including longitudinal analysis, advanced modeling, large-scale clinical trials or implementation science studies. Applicants proposing to conduct exploratory, novel studies that break new ground, extend previous discoveries in new directions or result in novel techniques, models or applications should consider the R21 mechanism (PAR-23-061). Applicants proposing the initial development and pilot testing of a clinical trial or formative implementation research should consider using the R34 mechanism (PAR-23-060).

acceptability, and safety of novel or adapted interventions that target HIV prevention or treatment, or implementation outcomes using implementation science approaches. For the purposes of this FOA, “intervention” is defined to include behavioral, social, or structural approaches, as well as combination biomedical and behavioral, social, or structural approaches that improve HIV prevention or treatment outcomes. Applications should be aligned with NIMH Division of AIDS Research (DAR) priorities. Applicants are encouraged to read current Notice of Special Interest (NOSIs) from NIMH Division of AIDs Research (DAR) for further information about the Division’s research priorities (NIMH DAR; <https://www.nimh.nih.gov/about/organization/dar/aids-related-funding-opportunity-announcements-foas>), and the NIH Strategic Plan for HIV and HIV-Related Research by NIH Office of AIDS Research (NIH OAR; <https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan>). This FOA, PAR-23-060, uses the R34 grant mechanism to provide support for the initial development and pilot testing of a clinical trial or formative implementation research. Applications with preliminary data and/or those including longitudinal analysis, advanced modeling, or large-scale clinical trials or implementation science approaches should consider using the companion R01 mechanism, PAR-23-062. Applicants proposing to conduct exploratory, novel studies that break new ground, extend previous discoveries in new directions or result in novel techniques, models, or applications should consider the R21 mechanism (PAR-23-061).

Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 07-Sep-2025 , 05-Oct-2025 , 07-Jan-2026 , 05-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 07-Sep-2026
Synopsis	The National Institute of Mental Health (NIMH) is issuing this Notice to highlight its interest in supporting planning grants to conduct retrospective natural history studies that explore the prevalence of disabling psychiatric symptoms and disruptions in function in patients (birth to 25 years of age) with rare genetic neurodevelopmental disorders (NDD). The principal goal of these studies is to assess the time of onset and severity of these symptoms, identify appropriate outcome measures, and establish potential timepoints for intervention. Additionally, the planning grants should focus on identifying potential quantitative clinical functional measures or biomarkers that could be used as prognostics and/or measures of change in

the neurobiology of mental illnesses. The screening assays developed from this FOA are expected to build upon systems neurobiology and clinical neuroscience to enhance the scientific value of preclinical animal data contributing to a therapeutic development pipeline in which treatment candidates and therapeutic targets can be evaluated for their ability to impact neurobiological mechanisms of potential clinical relevance to mental illnesses. The objectives of this FOA will be accomplished by supporting basic neuroscience aimed at improving the efficiency and scientific value of the therapeutic development pipeline by advancing the discovery of in vivo physiological and behavioral measures reflecting circuit engagement as tools for early phase target validation and therapeutic screening for mental illness treatment development. The efforts supported by this initiative focus on measures in animals as a first step in generating translational assay measures that are adaptable across early therapeutic screens in animals to evaluation in humans. The FOA may be considered a prequel to build a suite of assays that are evaluated in future projects for coherence of assay performance between the preclinical species and healthy humans. In summary, this FOA will support efforts to improve the tool kit of assays available for early phase testing of novel therapeutic agents by incorporating measures proximal to neural systems that impact mental health.

Synopsis	The overarching goal of this Notice of Funding Opportunity (NOFO) is to support the development and validation of screening assays for the discovery of validated hits that can be used in future drug discovery/development efforts for identifying potential drug candidates for the treatment of mental illness. For purposes of this initiative, a “hit” is defined as a compound that has the desired activity in a compound screen and whose activity is confirmed upon retesting in orthogonal assays. Stages of discovery research covered by this NOFO include 1) assay development; 2) primary screen implementation to identify initial screening hits (high throughput target-focused screens, or moderate throughput screens); and 3) hit validation using a series of assays and initial medicinal chemistry inspection to prioritize the hit set.

	Synopsis	<p>The goal of this Funding Opportunity Announcement (FOA) is to identify, in animals, in vivo neurophysiological and behavioral measures for use as assays in the early screening phase of treatment development. This FOA will support efforts to optimize and evaluate measures of neurophysiological and behavioral processes that may serve as pharmacokinetic/pharmacodynamic (PK/PD) markers of neural processes of clinical interest based on available knowledge of the neurobiology of mental illnesses. The screening assays developed from this FOA are expected to build upon systems neurobiology and clinical neuroscience to enhance the scientific value of preclinical animal data contributing to a therapeutic development pipeline in which treatment candidates and therapeutic targets can be evaluated for their ability to impact neurobiological mechanisms of potential clinical relevance to mental illnesses. The objectives of this FOA will be accomplished by supporting basic neuroscience aimed at improving the efficiency and scientific value of the therapeutic development pipeline by advancing the discovery of in vivo physiological and behavioral measures reflecting circuit engagement as tools for early phase target validation and therapeutic screening for mental illness treatment development. The efforts supported by this initiative focus on measures in animals as a first step in generating translational assay measures that are adaptable across early therapeutic screens in animals to evaluation in humans. Synopsis	<p>The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Courses for Skills Development Research Experiences Mentoring Activities The fully integrated educational activities should prepare undergraduate students from diverse backgrounds, including those from groups underrepresented in biomedical and behavioral sciences, to enter Ph.D. degree programs in the neurosciences. To accomplish this goal, this initiative will provide institutional awards to develop neuroscience research education programs comprised of collaborative partnerships integrated across different educational institution types. Each partnership must include: a) one or more institutions that either: 1) have a historical and current mission to educate students from any of the populations that have been identified as underrepresented in biomedical research as defined by the National Science Foundation (NSF), see http://www.nsf.gov/statistics/wmpd/) (i.e., African Americans or Blacks, Hispanic or Latino Americans, American Indians, Alaska Natives, Native Hawaiians, U.S. Pacific Islanders, and persons with disabilities) or 2) have a documented track record of recruiting, training and/or educating, and graduating underrepresented students as defined by NSF (see above), which has resulted in a historically documented contribution by the institution to the national pool of graduates from underrepresented backgrounds who pursue biomedical research careers; b) a research-intensive institution that has an established neuroscience or neuroscience-related program; c) integrated curriculum/academic enhancement and research experience activities designed to increase participants' preparation to enter doctoral programs in the neurosciences; and d) well-described plans to provide early communication and interaction between participating students and graduate neuroscience programs across the country.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Jan-2024 , 05-Apr-2024</p> <p>Synopsis Some projects initiated with SBIR or STTR funding require considerable financing beyond the SBIR/STTR Phase II award to achieve commercialization. The development of medical biotechnology products is often impeded by a significant funding gap (known as the “Valley of Death”) between the end of the SBIR/STTR Phase II award and the commercialization stage. The goal of this FOA is to assist applicants in pursuing the next appropriate milestone(s) necessary to advance a product/technology that requires Federal regulatory approval or to bring a complex research tool to market. This opportunity aims to facilitate the transition of previously funded SBIR and STTR Phase II projects to the commercialization stage by promoting partnerships between NINDS SBIR or STTR awardees and third-party investors and/or strategic partners in the Phase IIB competing renewal. Applicants are strongly encouraged to secure independent third-party funding throughout the Phase IIB project period.</p>

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Jan-2024 , 05-Apr-2024</p> <p>Synopsis This Funding Opportunity Announcement (FOA) encourages small business applications for exploratory clinical trials of investigational agents (drugs, biologics, surgical therapies or devices) that may contribute to the justification for and provide the data required for designing clinical studies. Diseases chosen for study should be based on the NINDS strategic plan and clinical research interests (www.ninds.nih.gov/funding/areas/index.htm). Successful applicants will be given access to the NeuroNEXT infrastructure. Following peer review, NINDS will prioritize and order trials that are given access to the NeuroNEXT infrastructure. The NeuroNEXT Clinical Coordinating Center (CCC) will work with the successful applicant to efficiently implement the proposed study. The NeuroNEXT Data Coordinating Center (DCC) will provide statistical and data management support. The NeuroNEXT clinical sites will provide recruitment/retention support as well as on-site implementation of the clinical protocol. Applicants do not need to be part of the existing NeuroNEXT infrastructure.</p>				
121162	<p>HEAL INITIATIVE: Development and Validation of Remote or Patient Wearable Device Derived Objective Biosignatures or Functional Assessments to Monitor Pain for use as Endpoints in Clinical Trials (UG3/UH3 - Clinical Trial Optional)</p>	National Institute of Neurological Disorders and Stroke/NIH/DHHS	RFA-NS-24-023	30-Dec-2023 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Ram Arudchandran, PhD</p> <p>Contact Telephone 301-402-5257</p> <p>Contact Email ramachandran.arudchandran@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 30-Dec-2023 [Optional][LOI/Pre-App], 30-Jan-2024</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to promote the discovery, development, and validation of real-world digital endpoints derived from data generated by existing remote or wearable devices. These endpoints will be used for monitoring the experience of pain, its progression, response to interventions, and impact on quality of life. In this NOFO, endpoints refer to biosignatures obtained from functional and physiological assessments captured by remote or wearable devices. Development of digital endpoints will involve clinical research using existing wearable or remote devices, with a specific focus on selecting and validating novel measurements as appropriate digital endpoints for pain assessment. The proposed digital endpoints may focus on a specific pain condition or encompass multiple pain conditions. Applications aiming to identify digital endpoints across various pain conditions should involve Multiple Principal Investigator (MPI)-led</p>				

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

teams that represent each relevant pain condition and associated clinical networks. These teams should collaborate to discover, develop, and validate digital endpoints that accurately measure pain and related outcomes, such as quality of life or appropriate pain-related functional measures. In addition, the applicant should include experts in digital technology, data analysis, and advanced statistical methods to handle real-world data. Applicants must establish centralized resource groups responsible for coordinating clinical trials, standardizing sample or data collection methods, technology development, statistical analysis, and algorithm development across all pain conditions under investigation. For applications focused on developing digital endpoints for a single pain condition, MPI-led teams with cross-functional expertise should be included, along with centralized resource groups responsible for coordinating clinical trials, standardizing sample or data collection methods, technology development, and statistical analysis. Furthermore, the inclusion of people with lived experience in the team is required to incorporate patient perspectives, concerns, and valuable input regarding the relevance and acceptability of digital measurements in the study. The final products of this effort would be algorithms and software designed to analyze data from existing remote or wearable technologies. The goal is to demonstrate that digital biosignatures or digital functional assessments, serving as digital endpoints, are sensitive and objective measures of clinical benefit.

101794	NINDS Renewal Awards of SBIR Phase II Grants (Phase IIB) for Pre-Clinical Research (R44 Clinical Trial Not Allowed)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	PAR-21-114	05-Jan-2024	Not Specified
	<p>Contact Name Emily Caporello, Ph.D.</p> <p>Contact Telephone 301-496-1778</p> <p>Contact Email Emily.caporello@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Jan-2024</p> <p>Synopsis Some projects initiated with SBIR or STTR funding require considerable financing beyond the SBIR/STTR Phase II award to achieve commercialization. The development of medical biotechnology products is often impeded by a significant funding gap (known as the “Valley of Death”) between the end of the SBIR/STTR Phase II award and the commercialization stage. The goal of this FOA is to assist applicants in pursuing the next appropriate milestone(s) necessary to advance a product/technology that requires Federal regulatory approval or to bring a complex research tool to market. This opportunity aims to facilitate the transition of previously funded SBIR and STTR Phase II projects to the commercialization stage by promoting partnerships between NINDS SBIR or STTR awardees and third-party investors and/or strategic partners in the Phase IIB competing renewal. Applicants are strongly encouraged to secure independent third-party funding throughout the Phase IIB project period.</p>				
100306	NINDS Ruth L. Kirschstein National Research Service Award (NRSA) for Training of Postdoctoral Fellows (F32 Clinical Trial Not Allowed)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	PAR-21-032	07-Jan-2024	Not Specified
	<p>Contact Name Stephen Korn, Ph.D.</p> <p>Contact Telephone 301-496-4188</p> <p>Contact Email korns@ninds.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 09-Feb-2024 , 07-May-2024</p> <p>Synopsis The purpose of this award is to support outstanding scientific training of highly promising postdoctoral candidates with outstanding mentors. Candidates are eligible to apply for support from this program from ~12 months prior to the start of the proposed postdoctoral position to within 12 months after starting in the proposed postdoctoral position. This NINDS F32 seeks to foster early, goal-directed planning and to encourage applications for bold and/or innovative projects by the</p>

candidate that have the potential for significant impact. Inclusion of preliminary data is strongly discouraged; rather, this F32 seeks innovative research ideas and thoughtful plans for training and mentorship that will facilitate the development of the postdoctoral fellow into an outstanding scientist. Applications are expected to incorporate strong training in quantitative reasoning and the quantitative principles of experimental design and analysis. Support by this program is limited to the first 4 years of a candidate's activity in a specific laboratory or research environment, so as to further encourage early, thoughtful planning and timely completion of "mentored training" within a particular lab or environment. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

---------	---------------	--------------	----------------	---------------	----------------

studies will utilize community-engaged research and collaborative, multidisciplinary teams to identify, develop, and evaluate strategies to improve outcomes related to neurological disorders in HDPs and fill gaps in clinical trial readiness. Expected outcomes include 1) Identifying and understanding drivers of health disparities and barriers for specific neurological disorders within HDP communities, 2) Identifying specific modifiable targets to prevent and/or decrease neurological morbidity/mortality and inequities among HDPs, and 3) Developing future community-driven research interventions to decrease disparities and gaps in neurological health among HDPs. The National Institute of Neurological Disorders and Stroke (NINDS) intends to enhance the quality and increase the likelihood of success of future clinical trials in neurological health disparities by supporting studies leading to trial readiness.

	Synopsis	<p>This NOFO solicits applications for planning grants to assess feasibility and/or determine best practices to conduct community-engaged health equity research in neurological disorders with populations that experience health disparities (HDPs). If successful, these planning grants would support, enable and/or lay the groundwork for future clinical studies or trials. In addition to posing a research question related to addressing health disparities in neurological disorders, applicants must also be filling a gap in 1) Engagement with one or more HDP communities; and/or 2) Multidisciplinary research team expertise in neurological disorders, health disparities research and/or community-engaged research. Expected outcomes would advance understanding of drivers of health disparities and barriers to neurological health equity and establish collaborative research teams, including community partners, with appropriate expertise in community engagement with HDPs, health disparities research and neurological disorders.</p>

	<p>Synopsis This Notice of Special Interest (NOSI) is intended to promote small business advances on the use of digital technologies for early detection, characterization, and monitoring of senescence-related changes and diseases outside of clinical settings. Developments are encouraged at all scales, from cells to tissues to whole-body. The intent is to support the development, validation, and commercialization of such technologies to be realized, targeting aging-specific processes and related conditions.</p>				
121049	RFA-AG-24-027 -- Building Neuroscience Research Infrastructure for Alzheimer's Disease (AD) and AD-Related Dementias (ADRD) in Africa (UG3/UH3 Clinical Trial Not Allowed)	National Institute on Aging/NIH/DHHS	RFA-AG-24-027	12-Jan-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name Damali Martin, Ph.D., MPH</p> <p>Contact Telephone </p> <p>Contact Email martinda@mail.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 12-Jan-2024 [Optional][LOI/Pre-App], 14-Feb-2024</p> <p>Synopsis This notice of funding opportunity (NOFO) promotes collaborative research programs to support the development/enhancement of infrastructure (e.g., tools, surveys, biospecimens, data) for Alzheimer's disease (AD) and AD-related dementias (ADRD) neuroscience research in low- and middle-income countries (LMICs) in Africa, as defined by the World Bank. Specifically, the National Institute on Aging (NIA) seeks to support UG3/UH3 Exploratory/Developmental Phase Innovation Awards Cooperative Agreement projects to enable the following: (1) The formation of transformative collaborations between institutions/scientists in the US and LMICs in Africa; (2) The development, or enhancement, of research infrastructure and resources for studies of AD/ADRD neuroscience relevant to Africa, as well as to examine how social or behavioral factors influence AD/ADRD in Africa; and (3) The initiation of pilot or exploratory studies that may inform future research for AD/ADRD neuroscience in Africa. The research infrastructure programs are expected to contribute to the long-term goals of building sustainable AD/ADRD neuroscience research capacity and research, with the aim of ultimately leading to prevention and mitigation strategies for AD/ADRD in Africa.</p>

Synopsis	In light of the documented increases in both alcohol misuse (among some individuals) and domestic violence (DV) as a result of the global COVID-19 pandemic and array of mandated restrictions enacted to mitigate COVID spread, the purpose of this grant application solicitation is to announce NIAAA’s interest in addressing the critical need for research related to developing, testing, and intervening proximal to drinking occasions, when risk of DV is elevated, to decrease the likelihood of alcohol consumption at levels sufficient to trigger DV and to provide skills shown to reduce risk of DV perpetration and victimization. In particular, this solicitation seeks to advance the development, feasibility, acceptability, pilot testing, potential efficacy, and implementation of scalable, low resource, and remotely delivered interventions via mobile devices (mHealth) that rely on communication technologies for reducing and preventing alcohol consumption and DV. For this FOA, the term “domestic violence” will extend to child maltreatment (abuse and neglect) and elder abuse, in addition to intimate partner violence (IPV).

	Synopsis	The purpose of this notice of special interest (NOSI) is to provide enhanced understanding of genetic, genomic, and epigenetic factors contributing to biological processes for individual variation in sensitivity, the development of tolerance, and progression to AUD. NIAAA is interested in projects that will develop innovative strategies integrating both experimental and bioinformatics approaches to establish causality for candidate genes from GWAS and linkage studies and to provide insights into genetic mechanisms of alcohol sensitivity and the development of tolerance through investigation of genomic, epigenetic, or transcriptional variation, and gene network and pathway analyses. Applicants are encouraged to consider model systems in which these complex relationships can be better studied under defined genetic backgrounds and well-controlled environmental conditions.

---------	---------------	--------------	----------------	---------------	----------------

a supplemental slot designated specifically for a selected trainee - either predoctoral or postdoctoral - to an existing T32 or T35 award. That position remains a part of the T32 or T35 for as long as the named individual is a member of the training program. When the individual no longer receives support from the T32 or T35, the funds for the position are removed from the grant. To ensure an appropriate training experience, only predoctoral slots are considered for programs that exclusively support predoctoral training; the same applies to postdoctoral slots. Programs supporting both predoctoral and postdoctoral training may apply for either. NIDCD encourages institutions to recruit prospective predoctoral and postdoctoral students from diverse backgrounds to consider participating in this program, including but not limited to individuals from underrepresented groups, such as those from underrepresented racial and ethnic groups, individuals with disabilities and individuals from disadvantaged backgrounds. For more information, see NOT-OD-20-031 "Notice of NIH's Interest in Diversity".

This funding opportunity announcement (FOA) supports investigator initiated low risk clinical trials addressing the mission and research interests of NIDCD. Clinical trials must meet ALL the following criteria: meet the budget limits of this FOA, not require FDA oversight, are not intended to formally establish efficacy and have low risks to potentially cause physical or psychological harm. This FOA also supports low risk trials determined to be Basic Science Experimental Studies involving Humans (BESH). These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. It is advisable that only one clinical trial be proposed in each NIDCD Clinical Trials in Communication Disorders R01 application. High risk clinical trials not meeting all the criteria above are referred companion U01 FOA PAR-21-064, NIDCD Cooperative Agreement for Clinical Trials in Communication Disorders.</p>

	<p>Deadline Dates (ALL) 15-Jan-2024 [Optional][LOI/Pre-App], 15-Feb-2024</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to solicit applications for research aimed at elucidating neurobiological mechanisms underlying the influence of psychosocial stress on substance use disorders (SUDs) and co-occurring psychiatric disorders in people living with HIV (PLWH). This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material</p>				
120064	RFA-DA-24-064 -- HEAL Initiative: Novel Targets for Opioid Use Disorders and Opioid Overdose (R21 Clinical Trial Not Allowed)	National Institute on Drug Abuse/NIH/DHHS	RFA-DA-24-064	01-Jan-2024 [Optional][LOI/Pre-App]	275,000 USD
	<p>Contact Name Sam Ananthan, Ph.D.</p> <p>Contact Telephone 301-435-2199</p> <p>Contact Email sam.ananthan@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 01-Jan-2024 [Optional][LOI/Pre-App], 01-Feb-2024</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to support research focusing on the identification of druggable new targets and the discovery of optimizable probes for the development of safe and efficacious medications to prevent and treat opioid use disorders (OUDs), opioid overdose, and opioid-polysubstance use comorbidities. This NOFO is part of the NIH Helping to End Addiction Long-term (HEAL) initiative to accelerate the development of novel medications to treat all aspects of the opioid addiction cycle, including progression to chronic use, withdrawal symptoms, craving, relapse, and overdose. For information about Novel Therapeutic Options for Opioid Use Disorder and Overdose, see https://heal.nih.gov/research/medication-options This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>				
104056	Development & Testing of Novel Interventions to improve HIV Prevention, Treatment, and Program Implementation for People Who Use Drugs (R34 Clinical Trial Required)	National Institute on Drug Abuse/NIH/DHHS	PA-21-205	07-Jan-2024	450,000 USD
	Contact Name Richard A. Jenkins, PhD

Applications received under this FOA may fall within two scientific areas, namely: (1) pharmacotherapeutics (small molecules and biologics) and (2) medical therapeutic and diagnostic devices, including software as a medical device. This FOA strives to contribute to the effort against the national opioid and psychostimulant emergency and offer new medical products for individuals, families, and communities affected by this devastating crisis. Small business companies that developed currently marketed technologies or are developing technologies for different indications and are interested in demonstrating that their FDA-regulated product has a potential application in the OUD/StUD space are encouraged to apply.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	This funding opportunity announcement (FOA) seeks to facilitate the entry of both newly independent and early career investigators to the area of drug use and use disorder research and HIV/AIDS. This FOA, the AIDS-Science Track Award for Research Transition (A-START), encourages Small Research Grant (R03) applications to support research projects on drug use and/or use disorder and HIV/AIDS that can be carried out in a short period of time with limited resources. This FOA welcomes applications integrating substance use and/or substance use disorder (SUD) and HIV/AIDS across all areas of research supported by NIDA.

Synopsis	This Notice encourages research projects that 1) leverage data science to provide actionable insights for substance use prevention and treatment 2) shorten the time between data capture and data availability so that data are available real-time or near real-time, and 3) explore methods and tools that may allow for faster or better localized responses for substance use treatment and prevention. Priority will be given to projects that emphasize the use of existing data streams (e.g., electronic health records, syndromic surveillance, claims data, registry data, pharmacy dispensing, social media, and mortality records).

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>The purpose of this Notice is to encourage the submission of research project applications that enhance our understanding of the nature, extent, distribution, etiology, comorbidities, and consequences of drug use, misuse, and addiction across individuals, families, communities, and diverse population groups. Of interest are applications that address multiple levels of risk, resilience, and causation across scientific disciplines, and that apply novel methods to advance knowledge of the interplay among genetic, environmental, neurobiological, and developmental factors and associated health and disease outcomes. Priority will be given to research with a well described path towards translation and/or public health impact. In addition to novel data collection, approaches are encouraged that build on the research investments of NIH and sister HHS agencies to harness existing data on the epidemiology and etiology of drug misuse to improve public health prevention and treatment programs. The research areas noted below should be considered in the context of topics such as health disparities or inequities, familial/genetic liability, and physical, psychiatric, and polysubstance comorbidities and interactions.</p>

Research projects should align with the NIDA Strategic Plan (2022-2026 NIDA Strategic Plan Director's Message National Institute on Drug Abuse (NIDA) (nih.gov). This award will facilitate the entry of promising new investigators into the field of substance use/substance use disorder (SU(D) research, enhancing the pool of highly talented SU(D) researchers. Applications are particularly encouraged from individuals from diverse backgrounds, including those from underrepresented groups as described in the Notice of NIH's Interest in Diversity (NOT-OD-20-031). This NOFO is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.</p>

support small scale research grants at institutions that do not receive substantial funding from the NIH, with an emphasis on providing research experience that intersects drug addiction and data science primarily for undergraduate students, and enhancing the drug addiction research environment that applies data science at applicant institutions. The over-arching goal of this R15 program is to train a diverse data science workforce to leverage the potential of artificial intelligence and machine learning (AI/ML) to accelerate the pace of socio-behavioral and biomedical innovation in drug addiction research. The establishment of mutually beneficial partnerships to enhance the participation of researchers from diverse backgrounds and communities experiencing health disparities is expected. Help in determining the Organization Funding Level can be found here or <https://grants.nih.gov/grants/funding/r15.htm>.

Synopsis	National Institute on Drug Abuse (NIDA) is issuing this Notice of Special Interest (NOSI) to inform potential applicants of its interest in research project grant submissions that examine the effects of drug use on the structural and functional diversity and plasticity of glia and non-neuronal cells on nervous system process in the context of drug misuse and substance use disorders (SUD). Glial and other non-neuronal cells include astrocytes, microglia, oligodendrocytes and ependymal cells.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 25-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 25-Jun-2024 , 07-Sep-2024			
	Synopsis	NIDA seeks to stimulate research in non-human species aimed at modeling environmental and/or biological risk factors for SUD to elucidate neural and cognitive developmental mechanisms that may mediate, moderate, or predict the effects of these factors on subsequent emergence of SUD-related behaviors. Use of longitudinal designs and developmental-stage-appropriate paradigms are strongly encouraged.			
104862	Notice of Special Interest (NOSI): Advancing HIV/AIDS Research through Computational Neuroscience	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-21-030	07-Jan-2024	Not Specified

	Synopsis	This Notice of Special Interest [NOSI] is to support computational HIV/AIDS research as it relates to NIDA's mission through collaborative research between investigators with experimental expertise related to HIV/AIDS and those with computational proficiency, including scientists from statistics, physics, mathematics, engineering, and computer science. The NOSI will support meritorious and innovative research built on well-established computational strategies (theory, models, and methods) to investigate HIV-related neurocognitive deficits and neuropathogenesis in the context of substance use or substance use disorder (SUD). Investigators are expected to have complementary and integrated expertise in their field(s), but an ongoing collaboration or record of co-authorship is not required.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 07-Jan-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to encourage theoretically-driven pilot and/or feasibility research in the following areas: 1) the development and pilot testing of new or adapted interventions to prevent or delay the initiation of substance use and/or the progression from use to misuse or disorder and 2) services research examining questions specific to the prevention of substance use. The latter may include pilot studies of strategies or approaches to intervention, and/or other service system-based research to address areas such as economics, funding, service quality and engagement. In addition to the prevention of substance use, misuse and disorder, other outcomes of interest for the research supported through this FOA include a reduction in negative sequelae such as deaths related to impaired driving, suicidal behavior (e.g., nonfatal and fatal attempts), and substance-related acquisition or transmission of HIV infection and viral hepatitis among diverse populations and settings.</p>				
102446	Notice of Special Interest (NOSI): Using Data to Advance HIV Epidemic Knowledge and Program Planning	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-21-007	07-Jan-2024	Not Specified
	<p>Contact Name Richard A. Jenkins PhD</p> <p>Contact Telephone 301-443-1923</p> <p>Contact Email jenkinsri@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024</p> <p>Synopsis The purpose of this Notice is to encourage grant applications proposing research that makes use of available, large data sets with the objective of improving HIV epidemic modeling and service planning, with greater attention to the role of substance use. Data may be from NIDA-funded or co-funded projects as well as from other sources. This Notice is expected to increase the utilization of existing data including epidemiologic and clinic cohorts, longitudinal follow-up studies of interventions, as well as other publicly available data including those provided by government bodies, data warehouses and commercial data sources. Existing data may include data from completed projects as well as those that are ongoing. Results from studies supported by this NOSI are expected to generate knowledge that can be used to answer significant questions about HIV epidemics, promote efficient provision of services, and address limitations of existing models that have guided public policy. NIDA is particularly interested in research that integrates substance use considerations into program planning and policy to increase the quality of HIV services and their responsiveness to substance using populations.</p>				
101829	Notice of Special Interest (NOSI): Effects of Smoking and Vaping on the Risk and Outcome of COVID-19 Infection	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-21-011	07-Jan-2024	Not Specified

	<p>Contact Email sgust@nida.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024</p> <p>Synopsis The purpose of this notice is to encourage collaborative research applications that take advantage of opportunities outside of the United States. Applications examining all areas of NIDA-supported research addressing the causes, consequences, treatment, recovery, and prevention of drug use, misuse, and addiction are encouraged. Projects may be conducted through newly formed or well-established partnerships between investigators in a U.S.-based institution and scientists working in another country. All NIH grant applications for research to be conducted outside the United States must establish that the proposal takes advantage of unique research opportunities in other countries, speeds scientific discovery, and advances U.S. health science.</p>				
122293	<p>RFA-DA-25-058 -- Psychedelics Treatment Research in Substance Use Disorder (UG3/UH3 Clinical Trials Optional)</p>	National Institute on Drug Abuse/NIH/DHHS	RFA-DA-25-058	28-Jan-2024	Not Specified
	<p>Contact Name Tanya Ramey, M.D., Ph.D</p> <p>Contact Telephone 301-827-5944</p> <p>Contact Email tanya.ramey@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 28-Jan-2024 , 28-Feb-2024</p> <p>Synopsis The purpose of this notice of funding opportunity (NOFO) is to support the development of classic psychedelics (e.g., psilocybin, LSD), empathogens (e.g., MDMA), dissociatives (e.g., ketamine and related compounds), and other hallucinogens (e.g., ibogaine and its analogues) (henceforth “psychedelics”) as new treatment options for Substance Use Disorder (SUD). There is an urgent need to develop novel treatments for SUD in light of the escalating rates of substance use, addiction, and overdose. Psychedelics may offer a new potential therapeutic use in SUD. Applications may include the evaluation of an existing psychedelic, a new formulation, or a new psychedelic compound. The application can be at a preclinical and/or clinical phase of medication development. This NOFO utilizes the UG3/UH3 Phased Innovation Awards Cooperative Agreement grant mechanism that includes two phases. The applications responding to this funding opportunity should present a research plan that will cover both the UG3 and UH3 phases. In the 2-year UG3 phase, the project will have a set of milestones to be completed by the end of this period. Once the UG3 phase has been successfully completed, the project may transition to the UH3 phase and may be funded for up to three additional years. The ultimate goal is to advance the</p>

Development. This NHGRI R25 program offers to support the development of curricula for Master of Science (M.S.) degree programs in genomics, genomic medicine and/or genomic informatics for medical students. Specifically, this FOA will support the development of curriculum designed to be freely available, at no cost to the broader community to enhance training in genomics for medical students.

107671	Notice of Special Interest (NOSI): Administrative Supplements for Research on Sexual and Gender Minority (SGM) Populations (Admin Supp Clinical Trial Optional)	National Institutes of Health/DHHS	NOT-OD-22-032	31-Jan-2024	100,000 USD

Synopsis | The mission of the NIH is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. The NIH is committed to supporting research that will increase scientific understanding of the health and well-being of various population and subpopulation groups and that will help to establish the effectiveness of evidence-based health interventions and services for individuals within these groups. NIH places high priority on research with populations that have distinct health risk profiles and who have also received insufficient attention from the scientific research enterprise. To this end, this Notice of Special Interest (NOSI) announces the availability of administrative supplements to provide funding for the expansion of existing research projects to incorporate sexual and gender minority (SGM) populations or SGM-relevant research questions. SGM populations include, but are not limited to, those populations described in NOT-OD-19-139. Basic, social, behavioral, clinical, translational, and health services research relevant to the missions of the sponsoring NIH Institutes or Centers (ICs) may be proposed in response to this solicitation. Potential applicants are encouraged to review the most recent annual Portfolio Analysis of NIH-funded SGM research to identify potential research gaps that may be relevant to this NOSI. More information about the SGM administrative supplements program and previously awarded research projects can be found on the SGMRO website.

	Synopsis	<p>The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support educational activities with a primary focus on: Courses for Skills Development Research Experiences The ESTEEMED program is designed to foster the development of undergraduate freshmen and sophomores from diverse backgrounds to pursue further studies and careers in bioengineering or STEM fields relevant to NIBIB’s scientific mission. Applications are encouraged to propose integrated educational activities that include 3 elements: a summer bridge program for incoming freshmen, and in the freshman and sophomore years, academic year activities and summer research experiences. The ESTEEMED program is intended to expose students to bioengineering research early in their college careers while also providing students didactic, mentoring and career development opportunities. This will prepare students to join, in their junior and senior years, an honors program that promotes STEM and entrance into a Ph.D. program. The ultimate goal is for the participants to pursue a doctoral degree and a subsequent research career in bioengineering or NIBIB-relevant field.</p>

114322	Leading Equity and Diversity in the Medical Scientist Training Program (LEAD MSTP)(T32)	National Institutes of Health/DHHS	PAR-23-030	25-Jan-2024	Not Specified
	<p>Contact Name Mercedes Rubio, Ph.D.</p> <p>Contact Telephone</p> <p>Contact Email rubiome@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 25-Jan-2024 , 27-Jan-2025</p> <p>Synopsis The goal of the Leading Equity and Diversity in the Medical Scientist Training Program (LEAD MSTP) is to develop a diverse pool of highly trained clinician-scientist leaders available to meet the Nation’s biomedical research needs by providing support for dual-degree clinician scientist training at institutions that have historically not been well represented among NIGMS-funded MSTPs. Specifically, this Funding Opportunity Announcement (FOA) provides support to eligible domestic institutions to develop and implement effective, evidence-informed approaches to fully integrate the transitional phases of dual-degree training and mentoring that will lead to the completion of both clinical degrees (e.g., M.D., D.O., D.V.M., D.D.S., Pharm.D., etc.), and research doctorate degrees (Ph.D.) and keep pace with the rapid evolution of the biomedical enterprise. With the dual qualification of a rigorous scientist and clinician, graduates will be equipped with the skills to develop research programs that accelerate the translation of research advances to the understanding, detection, treatment, and prevention of human disease, and to lead the advancement of biomedical research. Areas of particular importance to NIGMS are optimizing training efficiency, fostering the persistence of alumni in research careers, and enhancing the diversity of the clinician-scientist workforce. NIGMS expects that the proposed research training programs will incorporate didactic, research, mentoring and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the Nation. This program is limited to dual-degree training programs at (1) Historically Black Colleges and Universities (HBCUs), (2) Tribal Colleges and Universities (TCUs), and (3) institutions within Institutional Development Award (IDeA)-eligible states. When appropriate, NIGMS encourages applications using a partnership model to further and advance the goals of the program (see Section III for detailed eligibility information). This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>

Synopsis The National Institutes of Health (NIH) will award Ruth L. Kirschstein National Research Service Award (NRSA) Institutional Research Training Grants (T32) to eligible, domestic institutions to develop and/or enhance predoctoral and postdoctoral research training, including short-term research training, to help ensure that a diverse and highly trained workforce is available to meet the needs of the Nation’s biomedical, behavioral, and clinical research agenda. Research training programs are expected to incorporate engaging, didactic, research, and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the Nation. Programs proposing only short-term predoctoral research training should not apply to this announcement, but rather to the Kirschstein-NRSA Short-Term Institutional Research Training Grant Program (T35) exclusively reserved for predoctoral, short-term research training. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

Synopsis The National Institutes of Health (NIH) will award Ruth L. Kirschstein National Research Service Award (NRSA) Short-Term Institutional Research Training Grants (T35) to eligible, domestic institutions to develop and/or enhance research training opportunities for predoctoral students interested in careers in biomedical, behavioral, or clinical research. Many NIH Institutes and Centers (ICs) use this NRSA program exclusively to support intensive, short-term research training experiences for health professional students (medical students, veterinary students, and/or students in other health-professional programs) during the summer. This program is also intended to encourage training of graduate students in the physical or quantitative sciences to pursue research careers by short-term exposure to, and involvement in, the health-related sciences. The training should be of sufficient depth to enable the trainees, upon completion of the program, to have a thorough exposure to the principles underlying the conduct of biomedical research. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

The I-Corps at NIH program is focused on educating researchers and technologists on how to translate technologies from the lab into the marketplace. I-Corps enables and accelerates the transformation of invention to impact patients. The program provides three-member project teams with access to instruction and mentoring to accelerate the translation of technologies currently being developed with NIH and CDC SBIR and STTR funding. The participants conduct evidence-based research to identify where the company's technology can have greatest impact on unmet clinical needs. It is anticipated that outcomes for the I-Corps teams participating in this program will include significantly refined commercialization plans and well-informed pivots in their overall commercialization strategies. Prospective applicants are strongly encouraged to contact relevant Scientific/Research staff listed in Section VII for more information about the program before applying.</p>

Synopsis	The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences The proposed research experiences may be targeted to undergraduates, graduate students, postdoctorates or early to mid-career faculty and should be designed to extend their research skills, experiences and knowledge base. . The nature of research experiences should be tailored to the needs and career levels of participants and engage them in NIDCD-funded research or expose them to skills, experiences and knowledge base related to NIDCD research. It is expected that mentoring will be provided in conjunction with planned research experiences and participants will design individualized development plans (IDPs) that are compatible with their needs and experience. Additionally, programs that provide educational/research experiences that enhance the participation and productivity of investigators from diverse backgrounds, including from underrepresented groups, in carrying out research on NIDCD mission-relevant health disparities will be considered.

---------	---------------	--------------	----------------	---------------	----------------

populations with health disparities (hence, underserved youth). The goals of this FOA are to support multidisciplinary research that investigates the effectiveness of SBHCs as a health services care delivery model to detect, manage, and prevent chronic illnesses that disproportionately burden underserved youth. The mechanisms of impact by which SBHCs improve the health of at-risk populations such as sexual and gender minority youth, immigrant youth, and youth who reside in rural areas are also a relevant focus for understanding effective models of SBHCs. Applications are expected to provide a conceptual model that describes hypothesized causal pathways by which SBHCs engage underserved youth to improve health outcomes and how SBHCs may complement (or reduce) the use of other services. Lessons learned through this initiative can help determine whether SBHCs can be adopted as a best practice care model to address the health services needs of underserved youth and if so, whether SBHCs given their accessibility to students can be an effective site of intervention to address disparities in chronic conditions, and behavioral, oral, and reproductive health of youth from underserved communities who lack access to health care.

Synopsis | The SBIR Technology Transfer (SBIR-TT) Notice of Special Interest (NOSI) is intended to help move commercially-viable technologies from the NIH Intramural Program to the marketplace. Small Business Concerns (SBCs) are encouraged to submit applications that further develop available technologies from the NIH Intramural Program and bring them to the commercial market. While universities can spin off companies, use incubator resources, and obtain funding from venture capital, the NIH intramural programs have no similar mechanism to develop technologies. If selected for SBIR funding, the SBC will be granted a royalty-free, non-exclusive patent license agreement for internal research use for the term of and within the field of use of the SBIR award to technologies held by NIH with the intent that the SBC will develop the invention into a commercial product to benefit the public. For a complete listing of NIH intramural technologies which are available, please see NIH Office of Technology Transfer at: <https://www.ott.nih.gov> or the web sites of the technology transfer offices of the participating Institutes.

	Deadline Dates (ALL)	20-Nov-2023 [Optional][LOI/Pre-App], 19-Jan-2024 , 02-Aug-2024 [Optional][LOI/Pre-App], 01-Oct-2024 , 03-Apr-2025 [Optional][LOI/Pre-App], 02-Jun-2025 , 21-Nov-2025 [Optional][LOI/Pre-App], 20-Jan-2026			
	Synopsis	<p>This FOA seeks applications to optimize instrumentation and device technologies for recording and modulation of neural cells and circuits, to address major challenges and to enable transformative understanding of dynamic signaling in the central nervous system. It is expected that the proposed technologies and approaches have previously demonstrated their transformative potential through initial proof-of-concept testing, and are ready for accelerated refinement through iterative engineering and end-user feedback, appropriate for a path towards sustainable dissemination and user-friendly incorporation into routine neuroscience research. Applications may propose development of instrumentation hardware and/or devices and associated software. Approaches may utilize any modality such as optical, electrical, magnetic, or acoustic recording/manipulation, to target neuronal electrical signals or other forms of neural activity, including intracellular signaling and engagement of non-neuronal cells in circuit function. This FOA is a re-issue of RFA-NS-21-027, but unlike the previous FOA the focus is narrowed to technologies associated with recording/manipulation instrumentation and devices, and excludes projects primarily focused on development of molecular reagents. Potential applicants primarily optimizing molecular constructs should consider RFA-MH-22-245, BRAIN Initiative: Engineering and optimization of molecular technologies for functional dissection of neural circuits (UM1 Clinical Trial Not Allowed). For projects at an earlier stage of development of molecular reagents, potential applicants should consider the companion FOA (RFA-NS-24-004) or alternative BRAIN Initiative announcements including RFA-MH-21-175 and RFA-EY-21-001. For this and the companion FOA, the aim of the proposed technologies should be to reduce major barriers to conducting neurobiological experiments, including considerations of cost and ease of access, and to enable new discoveries for understanding neural circuit function. Technologies should address major challenges associated with recording and modulating CNS activity, at cellular or circuit resolution, and should contribute to an overall ecosystem of technologies spanning multiple spatial and temporal scales in any region throughout the CNS. The approaches should be compatible with experiments in behaving animals, with an expectation that they will be validated with in vivo experiments during the course of the project. Proposed validation experiments must focus on demonstrating the capabilities and potential impact of the technology, rather than advancing the state of biological knowledge as the primary project goal. Applications are encouraged to integrate multiple approaches, and where appropriate, to leverage diverse domains of expertise from biological, chemical, and physical sciences, engineering, computational modeling, and statistical analysis. This FOA requires a Plan for Enhancing Diverse Perspectives (PEDP), which</p>

Deadline Dates (ALL)	20-Nov-2023 [Optional][LOI/Pre-App], 19-Jan-2024 , 02-Aug-2024 [Optional][LOI/Pre-App], 01-Oct-2024 , 03-Apr-2025 [Optional][LOI/Pre-App], 02-Jun-2025 , 21-Nov-2025 [Optional][LOI/Pre-App], 20-Jan-2026
Synopsis	<p>This FOA seeks applications for proof-of-concept testing and development of new technologies and novel approaches for recording and modulation of neural cells and circuits, to address major challenges and enable transformative understanding of dynamic signaling in the central nervous system. Preliminary feasibility data are not required, and it is expected that the proposed research may be high-risk, but if successful could profoundly change the course of neuroscience research. Applications may propose development of instrumentation hardware and/or devices and associated software, and/or molecular constructs for sensing and manipulating neural activity. Approaches may utilize any modality such as optical, electrical, magnetic, or acoustic recording/manipulation, to target neuronal electrical signals or other forms of neural activity, including intracellular signaling and engagement of non-neuronal cells in circuit function. A companion FOA (RFA-NS-24-005) is targeted to projects focused on optimization of instrumentation and devices that are later in the development cycle, where iterative optimization and end-user testing is needed. The companion FOA does not allow projects primarily focused on development or optimization of molecular constructs for recording and manipulating neural activity. Projects of this nature are supported by this FOA and other BRAIN Initiative announcements including RFA-MH-22-245, RFA-MH-21-175, and RFA-EY-21-001. For this and the companion FOA, the aim of the proposed technologies should be to reduce major barriers to conducting neurobiological experiments, including considerations of cost and ease of access, and to enable new discoveries for understanding neural circuit function. Technologies should address major challenges associated with recording and modulating CNS activity, at cellular or circuit resolution, and should contribute to an overall ecosystem of technologies spanning multiple spatial and temporal scales in any region throughout the CNS. The approaches should be compatible with experiments in behaving animals, with an expectation that they will be validated with in vivo experiments during the course of the project. Proposed validation experiments must focus on demonstrating the capabilities and potential impact of the technology, rather than advancing the state of biological knowledge as the primary</p>

Deadline Dates (ALL)	08-Dec-2023 , 07-Jan-2024 , 07-Jan-2024 , 08-Apr-2024 , 07-May-2024 , 08-Aug-2024 , 07-Sep-2024 , 08-Dec-2024 , 08-Apr-2025 , 07-May-2025 , 08-Aug-2025 , 07-Sep-2025
Synopsis	<p>This Notice of Funding Opportunity (NOFO) will support students at institutions with NIH-funded institutional predoctoral dual-degree training programs. The purpose of the Kirschstein-NRSA, dual-doctoral degree, predoctoral fellowship (F30) is to enhance the integrated research and clinical training of promising predoctoral students, who are matriculated in a combined MD/PhD or other dual-doctoral degree training program (e.g. DO/PhD, DDS/PhD, AuD/PhD, DVM/PhD), and who intend careers as physician/clinician-scientists. Candidates must propose an integrated research and clinical training plan and a dissertation research project in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The fellowship experience is expected to clearly enhance the individual's potential to develop into a productive, independent physician/clinician-scientist. This Notice of Funding Opportunity (NOFO) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

The ReWARD program provides support for the health-related research of scientists who are making a significant contribution to Diversity, Equity, Inclusion, and Accessibility (DEIA) and who have no current NIH research project grant funding. The ReWARD program provides funding for both the scientific research and the DEIA activities of investigators. The grant will support scientific research in areas related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) and ongoing DEIA activities focused on enhancing diversity in the biomedical research enterprise within the United States and territories.</p>				
119607	HIV/AIDS Scholars Using Nonhuman Primate (NHP) Models Program (K01 Independent Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-23-225	07-Jan-2024	Not Specified
	<p>Contact Name Biao Tian, PhD</p> <p>Contact Telephone 301-594-5367</p> <p>Contact Email biao.tian@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 07-May-2024 , 07-Sep-2024 , 07-Jan-2025 , 07-May-2025 , 07-Sep-2025</p> <p>Synopsis The purpose of this NIH Mentored Research Scientist Development Award (K01) is to provide salary and research support to investigators who are within ten years of completing their terminal professional degree or residency training. Research and mentorship must be in the field of HIV/AIDS translational studies, using nonhuman primates (NHPs) as preclinical models. These awards will provide 3 years of support for intensive research career development under the guidance of an experienced mentorship team, with expertise in both the pre-clinical application of NHP HIV/AIDS models and in translation of the results from such studies to clinical application in humans. The expectation is that this sustained experience will launch independent research careers and enable awardees to become competitive for new research project grant (e.g., R01) funding. This funding initiative addresses research priorities of the fiscal year (FY) 2021-2025 NIH Strategic Plan for HIV and HIV-Related Research (https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan): reduce the incidence of HIV;</p>

	<p>develop next-generation HIV therapies; research toward HIV cure; and address HIV-associated comorbidities, coinfections, and complications. This Notice of Opportunity Announcement (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor and/or co-mentor.</p>				
119606	Early Stage Investigator HIV/AIDS Research Using Nonhuman Primate (NHP) Models (R21 Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-23-215	07-Jan-2024	400,000 USD
	<p>Contact Name Biao Tian, PhD</p> <p>Contact Telephone 301-594-5367</p> <p>Contact Email biao.tian@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 07-May-2024 , 07-Sep-2024 , 07-Jan-2025 , 07-May-2025 , 07-Sep-2025</p> <p>Synopsis The purpose of this notice of funding opportunity announcement (NOFO) is to support preclinical HIV/AIDS research using NHP models performed by Early Stage Investigators (ESIs) who are within 10 years of their terminal degree or completion of their residency training but who have at least two years of postdoctoral experience. The goal of this support is to help advance HIV/AIDS researchers using NHP models in preclinical research by providing a degree of independence for these ESIs to develop new research directions and to position these researchers to be competitive for new research funding (e.g., R01). Proposed projects must use NHPs as preclinical models for HIV/AIDS research. This funding initiative encompasses all priorities of the fiscal year (FY) 2021-2025 NIH Strategic Plan for HIV and HIV-Related Research (https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan): reduce the incidence of HIV; develop next-generation HIV therapies; conduct research toward HIV cure; address HIV-associated comorbidities, coinfections, and complications; and advance cross-cutting areas of research.</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis The NIH INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndrome (INCLUDE) Project seeks to improve health and quality-of-life for individuals with Down syndrome (DS). This Notice of Special Interest (NOSI) announces NIH support for the professional development of trainees aiming to establish a career in DS-related research. By providing these scientists with training, resources, and mentorship, the NIH intends to support the career development of junior investigators in DS who will lead future research to improve the understanding of the biology of DS and support development of new treatments for health conditions experienced by those with DS. Investigators early in their careers (e.g., predoctoral candidates) as well as those with advanced degrees (e.g., PhD, MD) may benefit from mentorship from established investigators and professionals in the DS research community in basic science fields as well as clinical and translational arenas.</p>				
118479	HIV Prevention and Alcohol (R34 Clinical Trials Optional)	National Institutes of Health/DHHS	PAS-23-172	07-Jan-2024	450,000 USD

	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Jan-2024 , 07-May-2024 , 07-Sep-2024 , 07-Jan-2025 , 07-May-2025 , 07-Sep-2025 , 07-Jan-2026 , 07-May-2026			
	Synopsis	<p>The NOFO seeks to expand the HIV/AIDS prevention toolkit among alcohol impacted populations with a range of patterns of episodic and long-term use and associated behavioral and biological risks for HIV acquisition. This includes integration of effective prevention and treatment interventions with an understanding of the overarching framework for reducing the incidence of new infections by facilitating cross-cutting informative research. This R34 Notice of Funding Opportunity (NOFO) supports studies that are both necessary and sufficient to inform the planning of a clinical trial within the scope of the companion announcement RFA- AA-21-016 HIV Prevention and Alcohol (R01 Clinical Trials Optional). The NIAAA expects that applications to this NOFO will describe the planned clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent trial. Furthermore, this NOFO will support research projects that are designed to provide results that will be sufficient to inform the future trial without further studies. The planned Phase II, III, or IV trial must be primarily intended to test the efficacy, safety, clinical management, or implementation of intervention(s) in the prevention of HIV. In this NIAAA funding opportunity for pilot clinical trials the R34 mechanism is intended to provide new information that answers a scientific or operational question(s) which may be pragmatic in nature and, therefore, informs the final development of a clinical trial and testing of intervention tools.</p>

	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 07-May-2024			
	Synopsis	<p>Postural Orthostatic Tachycardia Syndrome (POTS) can be a debilitating condition that affects routine activities such as working or attending school. POTS primarily affects women of child-bearing age, with most studies reporting 80-90% female predominance. The peak incidence is at age 14 years, but half of all individuals with POTS develop it in adulthood. While there are no precise data on the prevalence of POTS, it is estimated to affect 0.2-1% of the U.S. population. There is thus a compelling need to stimulate research to understand the causes of POTS in order to inform the development of treatments. Improving the diagnosis of POTS through the development of biomarkers or improved diagnostic tools represents another major need. Translational studies and mechanistic clinical trials to guide the development of better treatments are also important goals. This NOSI signals interest in this important area with the goal of stimulating research applications to address these critical needs.</p>			
109791	Accelerating the Pace of Child Health Research Using Existing Data from the Adolescent Brain Cognitive Development (ABCD) Study (R01-Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-22-137	07-Jan-2024	1,250,000 USD

	<p>Deadline Dates (ALL) 15-Jan-2024</p> <p>Synopsis The NIH Department of Bioethics welcomes applications for fully funded two-year postbaccalaureate and postdoctoral research fellowships. Fellowships begin annually in September. Stipends are determined by NIH Intramural Research Training Award (IRTA) guidelines.</p>				
114402	<p>Multisite Clinical Research: Leveraging Network Infrastructure to Advance Research for Women, Children, Pregnant and Lactating Individuals, and Persons with Disabilities (U01 Clinical Trial Optional)</p>	National Institutes of Health/DHHS	PAR-23-037	07-Jan-2024	Not Specified
	<p>Contact Name Robert Tamburro, MD, MSc</p> <p>Contact Telephone 301-480-2619</p> <p>Contact Email NICHD-Network-ClinicalResearch@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 07-Sep-2025 , 05-Oct-2025 , 07-Jan-2026</p> <p>Synopsis The purpose of this funding opportunity announcement (FOA) is to invite applications for multisite clinical trials and observational studies developed in conjunction with NICHD Networks that will be conducted using NICHD-supported Network infrastructure. The goal of this FOA is to operationalize the previously reported NICHD guiding principles for multisite clinical trials delineated in Notice NOT-HD-19-034: To enhance the rigor and reproducibility of clinical trial protocols To promote greater availability of multisite clinical trial infrastructure to support trials from a wider range of investigators To facilitate data sharing and access to biospecimens to efficiently expand research capacity for all investigators To facilitate greater involvement of diverse populations in multisite clinical trials. Consequently, multisite clinical trials and observational studies conducted by and within the participating NICHD-supported Clinical Research Networks will be submitted as investigator-initiated, multi-Principal Investigator (PI) grant applications by any qualified investigator in the extramural community (including NICHD Network investigators) in conjunction with the respective NICHD Network Data Coordinating Center (DCC). It is the intent of this initiative to utilize the NICHD Clinical Research Network infrastructure in a manner that will promote the funding and support of the best science in a timely, transparent, equitable and cost-effective manner.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024</p> <p>Synopsis This Funding Opportunity Announcement (FOA) invites applications that seek to support the identification of shared mechanisms and development of innovative interventions to address multimorbidity or multiple chronic conditions (MCCs) and its consequences. Intervention research supported by this initiative should be designed to study: (1) mechanisms or pathways that prevent MCCs, including the identification of early biomarkers, behavioral pathways, and individual and contextual risk factors and interactions that contribute to the development of common MCCs; (2) targeted therapies and management, including self-management, of MCCs to delay progression and prevent onset of new diseases; and (3) innovative health care partnership models for managing or treating MCCs. Studies may include shared mechanisms, and assessments of interactions between risk factors and interventions that address MCCs at different periods of the lifespan in diverse populations. Use of innovative technologies to assess and intervene on risk factors and pathways are encouraged. Studies may also include those that make use of existing data and/or data linkages to explore new research questions that may be helpful in understanding the impact of mechanisms in isolation or in combination. Of particular interest are interventions that target prevention and treatment of multiple chronic health conditions, including study designs that address therapeutic targets for preventing co-occurring MCCs. Prospective applicants whose research interests relate to developing improved measures and methods for understanding multimorbidity, including but not limited to measures/tools to support basic mechanistic discovery of shared MCC pathways and identification and initial evaluation of MCC shared signatures, should see PAR-20-179.</p>

---------	---------------	--------------	----------------	---------------	----------------

measures/tools to support basic mechanistic discovery of shared MCC pathways using animal models of MCCs, and identification and initial biological, analytical, and clinical evaluation of MCC shared signatures. Also sought are patient-focused studies that capture patient reports and related constructs such as functional limitations and quality of life; analytic approaches best suited for use with multimorbidity data and matched to target populations; and approaches that fully harness the wealth of multimorbidity data available in EHR systems. Studies may make use of existing data and data linkages to explore new research questions related to co-occurring MCCs. Prospective applicants whose research interests relate to studies that identify shared mechanisms or development of innovative interventions to address MCCs should see PAR-20-180.

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 07-May-2024</p> <p>Synopsis The NIH Research Project Grant supports a discrete, specified, circumscribed project in areas representing the specific interests and competencies of the investigator(s). This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ or ‘Clinical Trial Optional’ FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Note: Not all NIH Institutes and Centers (ICs) participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest at the R01 IC-Specific Scientific Interests and Contact website. ICs that do not participate in this announcement will not consider applications for funding.</p>

Studies are required to use phenotypic data and/or DNA samples and/or associated sequence data from the NIH/CDC Sudden Death in the Young (SDY) Case Registry as foundations for their research. Studies may use SDY Case Registry phenotypic data and/or samples and/or sequence data alone or in combination with other cohorts. Results of such studies are required to adhere to the NIH Data Sharing Policy so that the data is disseminated widely and provides an evidence base to advance discussions about screening and prevention of SDY.</p>				
111805	Research Opportunities for New and "At-Risk" Investigators to Promote Workforce Diversity (R01 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-22-181	07-Jan-2024	Not Specified
	<p>Contact Name Albert Avila, Ph.D.</p> <p>Contact Telephone 301-496-8804</p> <p>Contact Email aavila@nida.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 09-Jan-2024 , 06-Feb-2024 , 06-May-2024 , 07-May-2024 , 06-Jun-2024 , 06-Sep-2024 , 07-Sep-2024 , 08-Oct-2024 , 07-Jan-2025 , 08-Jan-2025 , 06-Feb-2025 , 05-May-2025 , 07-May-2025 , 06-Jun-2025 , 07-Sep-2025</p> <p>Synopsis This Funding Opportunity Announcement (FOA) solicits R01 grant applications that propose independent research projects that are within the scientific mission areas of the participating NIH Institutes or Centers. This program is intended to support New Investigators and At-Risk Investigators from diverse backgrounds, including those from groups underrepresented in the health-related sciences. Investigators from diverse backgrounds, including those from underrepresented groups (e.g., see NOT-OD-20-031, Notice of NIH's Interest in Diversity), are encouraged to work with their institutions to apply for support under this program. Investigators from categories A and B are particularly encouraged to work with their institutions to apply.</p>				
105957	Time-Sensitive Obesity Policy and Program Evaluation (R01 Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-21-305	11-Dec-2023	Not Specified

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount

Program URL	Link to program URL
Deadline Dates (ALL)	11-Dec-2023 , 09-Jan-2024 , 09-Feb-2024 , 08-Mar-2024 , 09-Apr-2024 , 08-May-2024 , 10-Jun-2024 , 09-Aug-2024 , 10-Sep-2024
Synopsis	This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not eligible for re-submission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date; however, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline.

104854	Notice of Special Interest (NOSI): Harnessing Big Data to Halt HIV	National Institutes of Health/DHHS	NOT-AI-21-054	07-Jan-2024	Not Specified

Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 07-May-2024
Synopsis	The purpose of this Notice of Special Interest (NOSI) is to promote and support innovative methods in Big Data Science (BDS) to identify unappreciated biomedical, behavioral, social patterns and other social determinants that shed light on HIV acquisition, transmission, the development of comorbidities, and long-term viral control as in the HIV treatment continuum. BDS approaches can bring together data to evaluate the complex interplay between individual, contextual, and structural

NIH Funding Opportunities

	<p>factors influencing the epidemiology of risk and care. Further, because this field can reveal unexpected associations through analysis of diverse data, BDS approaches may reveal events that are unseen or transient in traditional analysis of datasets. Discovery of these events will considerably advance research on HIV networks of transmission and the care continuum. This NOSI will support the establishment of BDS standards, bioinformatics data tools, machine-learning algorithms, mathematical modeling, advanced epidemiology and statistical analytic methods, and consideration and application of privacy and ethical issues in the use of public and personal data in the context of HIV research.</p>				
104500	Notice of Special Interest (NOSI): Behavioral Economics for Implementation Research (BEIR) to Improve Use of Evidence-Based Practices for HLBS Conditions	National Institutes of Health/DHHS	NOT-HL-21-010	07-Jan-2024	Not Specified
	<p>Contact Name Rebecca A. Roper, MS, MPH Contact Telephone 301-496-1051 Contact Email Rebecca.Roper@nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 07-Sep-2024 Synopsis This Notice of Special Interest (NOSI) is intended to stimulate the use of behavioral economics strategies for implementation research (BEIR) in order to develop more effective strategies for implementation of evidence-based practices (EBP) to address heart, lung, blood, and sleep (HLBS) conditions. NHLBI encourages applications that recognize the importance of cultural context, patterns of behavior change, and motivators for change across decision-making levels, including individuals (e.g., patients, parents, clinicians, others), groups, healthcare systems and/or communities. Applications that focus on the use of behavioral economics to develop implementation strategies for user-driven, sustainable interventions that may be simplified and minimally disruptive when possible are encouraged. Applications may propose either a clinical trial or non-clinical trial design, as appropriate to the research objectives.</p>				
111616	Notice of Special Interest (NOSI): NIH Research Project Grants on Down Syndrome (R01) for the INCLUDE (INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndrome) Project	National Institutes of Health/DHHS	NOT-OD-22-123	28-Dec-2023	Not Specified

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to support studies that will identify, develop, and/or test strategies for overcoming barriers to the adoption, adaptation, integration, scale-up, and sustainability of evidence-based interventions, practices, programs, tools, treatments, guidelines, and policies. Studies that promote equitable dissemination and implementation of evidence-based interventions among underrepresented communities are encouraged. Conversely, there is a benefit in understanding circumstances that create a need to stop or reduce (“de-implement”) the use of practices that are ineffective, unproven, low-value, or harmful. In addition, studies to advance dissemination and implementation research methods and measures are encouraged. Applications that focus on re-implementation of evidence-based health services (e.g. cancer screening) that may have dropped off amidst the ongoing COVID pandemic are encouraged. All applications must be within the scope of the mission of one of the Institutes/Centers listed above.</p>			
110794	Notice of Special Interest (NOSI): Sustained Release of Antivirals for Treatment or Prevention of HIV or Treatment of Latent TB/HBV (SRATP)	National Institutes of Health/DHHS	NOT-AI-22-042	07-Jan-2024	Not Specified

Deadline Dates (ALL) 07-Jan-2024

Synopsis The purpose of this Notice of Special Interest (NOSI) is to solicit applications to support the secondary use of real-world data for Artificial Intelligence (AI)-based predictive modeling with the ultimate goal of improving early detection and risk assessment for abdominal cancers. This Notice encourages applications proposing multi-institutional collaborative AI development approaches such as federated learning, which distributes the models to data-owners and aggregates the results without sharing the actual data.

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 07-May-2025</p> <p>Synopsis This Funding Opportunity Announcement (FOA) supports projects relevant to the NIGMS mission or those of other NIH institutes or Centers (ICs) participating in the FOA that focus solely on the development of technologies with the potential to enable acquisition of biomedical knowledge. Projects should be justified in terms of technical innovation and utility of such technical innovation for impacting future biomedical research. Outcomes or products of the proposed project should significantly advance the current state of the art and be sufficiently characterized for application in addressing a broad range of biomedical research questions. These outcomes may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified by human intervention to become research tools. The goal of this FOA is to support the development of technologies with demonstrated proof-of-concept that have remaining significant technical challenges to full implementation and broad utility. As such, applications should not propose to test specific biological questions. Applications proposing to test specific biological questions are not responsive to this FOA and will be administratively withdrawn without review. Applications with a focus on optimization, hardening, or obvious extrapolations of established technology will be a lower priority for funding.</p>				
110513	Notice of Special Interest (NOSI): High Priority Areas in Genetics, Epigenetics, and Developmental Neuroscience Branch in the Division of Neuroscience and Behavior	National Institutes of Health/DHHS	NOT-DA-23-004	07-Jan-2024	Not Specified

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Synopsis | The NIH Exploratory/Developmental Grant supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ or ‘Clinical Trial Optional’ FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Note: Not all NIH Institutes and Centers (ICs) participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest at the R21 Basic Experimental Studies with Humans Required IC-Specific Scientific Interests and Contact website. ICs that do not participate in this announcement will not consider applications for funding.

While research related to the direct clinical effects of COVID-19 are supported by other funding opportunities, there are additional urgent public health needs, particularly in populations who experience health disparities and in vulnerable populations. The purpose of this Notice is to 1) emphasize the roles and impacts of interventions, particularly those under the umbrella of digital health, as well as community-engaged and multi-level interventions in healthcare settings to address access, reach, delivery, engagement, effectiveness, scalability, and sustainability of services that are utilized during and following the pandemic, and 2) encourage the leveraging of existing large-scale data sources with broad population coverage to improve prediction of various mitigation efforts (including vaccinations, masking, and physical distancing to inform the public health response) on transmission reduction and on social and economic impacts, and assess the downstream health and healthcare access effects, with an emphasis on underserved and vulnerable populations. Additionally, the use of large-scale data sources to study the indirect health impacts of the</p>

	Synopsis	This Notice of Special Interest (NOSI) encourages studies of the endocannabinoid system (ECS) and its roles in brain health and acute and chronic disease, substance use, and substance use disorder (SUD). The desired outcomes of research will be a mechanistic understanding of how cannabinoids and manipulation of the ECS can elicit both therapeutic and deleterious effects as well as the role of cannabinoids and ECS in symptom management.			
121523	Specialized Programs of Research Excellence (SPOREs) in Human Cancers for Years 2024, 2025, and 2026 (P50 Clinical Trial Required)	National Institutes of Health/DHHS	PAR-23-284	25-Jan-2024	7,000,000 USD

	Program URL	Link to program URL			
	Deadline Dates (ALL)	25-Jan-2024 , 25-May-2024 , 25-Sep-2024 , 25-Jan-2025 , 25-May-2025 , 25-Sep-2025 , 25-Jan-2026 , 25-May-2026 , 25-Sep-2026			
	Synopsis	Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) invites applications for P50 Research Center Grants for Specialized Programs of Research Excellence (SPORE). Based on the research proposed, applications may be jointly funded with the National Institute of Dental and Craniofacial Research (NIDCR). The program will fund P50 SPORE grants to support state-of-the-art investigator-initiated translational research that will contribute to improved prevention, early detection, diagnosis, and treatment of an organ-specific cancer or a highly related group of cancers. For the purpose of this NOFO, a group of highly related cancers are those that are derived from the same organ system, such as gastrointestinal, neuroendocrine, head and neck, and other cancers. Other programmatically appropriate groups of cancers may include those centered around a common biological mechanism critical for promoting tumorigenesis and/or cancer progression in organ sites that belong to different organ systems. For example, a SPORE may focus on cancers caused by the same infectious agent or cancers promoted and sustained by dysregulation of a common signaling pathway. In addition, a SPORE may focus on cross-cutting themes such as pediatric cancers or cancer health disparities. The research supported through this program must be translational and must stem from research on human biology using cellular, molecular, structural, biochemical, and/or genetic experimental approaches. SPORE projects must have the goal of reaching a translational human endpoint within the project period of the grant.			
104041	RFA-NS-21-023 -- BRAIN Initiative: Next-Generation Invasive Devices for Recording and Modulation in the Human Central Nervous System (UG3/UH3 Clinical Trial Optional)	National Institutes of Health/DHHS	RFA-NS-21-023	21-Jan-2024 [Optional][LOI/Pre-App]	Not Specified

	<p>Contact Telephone 301-496-1447</p> <p>Contact Email NINDS-Devices@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 21-Jan-2024 [Optional][LOI/Pre-App], 20-Feb-2024</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to encourage investigators to pursue translational activities and small clinical studies for recording and/or stimulating devices to treat central nervous system disorders and better understand the human brain. Activities supported in this program include implementation of clinical prototype devices, non-clinical safety and efficacy testing, design verification and validation activities, obtaining an Investigational Device Exemption (IDE) for a Significant Risk (SR) study, as well as a subsequent small clinical study. Only Significant Risk (SR) clinical studies that will require an Investigational Device Exemption (IDE) from the FDA, such as chronic implants, will be supported by this FOA. The clinical study is expected to provide information about the device function or final design that cannot be practically obtained through additional non-clinical assessments (e.g., bench top or animal studies) due to the novelty of the device or its intended use. This FOA is a milestone-driven cooperative agreement program and will involve participation of NIH program staff in negotiating the final project plan before award and monitoring of research progress. Individuals, institutions, or businesses developing their own devices or that already have established collaborations with device manufacturers are welcome to apply directly to RFA-NS-21-024 or this FOA. The BRAIN PPP includes agreements with a number of device manufacturers willing to make such devices available, including devices and capabilities not yet market approved but appropriate for clinical research. In general, it is expected that the devices' existing safety and utility data will be sufficient to enable new FDA IDE and IRB approvals without need for significant additional non-clinical data. For more information on the BRAIN PPP, see https://braininitiative.nih.gov/brain-programs/public-private-partnerships</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount	
	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to encourage investigators to pursue first-in-human or early stage clinical studies for recording and/or stimulating devices to treat central nervous system disorders and better understand the human brain. Only Significant Risk (SR) studies that require an Investigational Device Exemption (IDE) from the FDA, such as chronic implants, will be supported by this FOA. The clinical study is expected to provide data to answer key questions about the function or final design of a device and is expected to provide information about the device function or final design that cannot be practically obtained through additional non-clinical assessments (e.g., bench top or animal studies) due to the novelty of the device or its intended use. This FOA is part of a milestone-driven cooperative agreement program and will involve participation of NIH program staff in negotiating the final project plan before award and monitoring of research progress. As part of the BRAIN Initiative, NIH has initiated a Public-Private Partnership Program (BRAIN PPP) that includes agreements (Memoranda of Understanding, MOU) with a number of device manufacturers willing to make such devices available, including devices and capabilities not yet market approved but appropriate for clinical research. In general, it is expected that the devices' existing safety and utility data will be sufficient to enable new FDA IDE and IRB approvals without need for significant additional non-clinical data. For more information on the BRAIN PPP, see https://braininitiative.nih.gov/brain-programs/public-private-partnerships Individuals, institutions, or businesses developing their own devices or that already have established collaborations with device manufacturers are welcome to apply directly to RFA-NS-21-023 or this FOA.</p>

	Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 07-Sep-2025				
	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to encourage researchers from diverse backgrounds to work with their institutions to submit applications for research projects within the mission of either NIAID or NIDDK. This NOFO seeks to support either (a) a New Investigator (NI), who has not previously competed successfully for substantial, independent funding from NIH, or (b) an 'At-Risk' investigator, who had prior support as a PD/PI on a substantial independent research award and unless successful in securing a substantial research grant award in the current fiscal year, will have no substantial research grant funding in the following fiscal year.</p>

	<p>Deadline Dates (ALL) 07-Jan-2024 , 12-Feb-2024 , 07-May-2024</p> <p>Synopsis The purpose of the NIH Mentored Patient-Oriented Research Career Development Award (K23) is to support the career development of individuals with a clinical doctoral degree who have made a commitment to focus their research endeavors on patient-oriented research. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. ICs that do not participate in this announcement will not consider applications for funding. Consultation with NIH staff before submitting an application is strongly encouraged.</p>

Synopsis	<p>The primary purpose of the NIH Mentored Clinical Scientist Research Career Development Awards (K08) program is to prepare qualified individuals for careers that have a significant impact on the health-related research needs of the Nation. This program represents the continuation of a long-standing NIH program that provides support and "protected time" to individuals with a clinical doctoral degree for an intensive, supervised research career development experience in the fields of biomedical and behavioral research, including translational research. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA. Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. 115095	Mentored Career Development Program for Early Stage Investigators Using Nonhuman Primate Research Models (K01 Independent Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-23-073	07-Jan-2024	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email AITraininghelpdesk@niaid.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 12-Feb-2024 , 07-May-2024 , 12-Jun-2024 , 07-Sep-2024 , 12-Oct-2024 , 07-Jan-2025 , 12-Feb-2025 , 07-May-2025 , 12-Jun-2025 , 07-Sep-2025 , 12-Oct-2025 , 07-Jan-2026</p> <p>Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to provide early-stage investigators with support and “protected time” (up to five years) for intensive, research-focused career development program activities under the guidance of an experienced mentorship team with expertise in both the preclinical application of nonhuman primate (NHP) models and in translation of the results from such studies to clinical application. The focus of this program is to increase the number of highly skilled scientists using NHP models to address complex translational biomedical research designed to foster translation of outcomes into the clinic. The expectation is that through this sustained period of research career development and training, awardees will launch independent research careers and become competitive for new research project grant (e.g., R01) funding. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.</p>				
107763	Notice of Special Interest (NOSI): Electronic Nicotine Delivery Systems (ENDS) and Alternative Nicotine and Tobacco Delivery Systems: Population, Clinical and Applied Prevention Mechanisms of Health Effects	National Institutes of Health/DHHS	NOT-OD-22-023	05-Nov-2023	Not Specified

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Nov-2023 , 07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-Mar-2024 , 07-May-2024</p> <p>Synopsis The Office of Disease Prevention and participating ICOs are issuing this Notice to communicate our interest in research on electronic nicotine delivery systems (ENDS). Research on alternative nicotine and tobacco delivery systems [e.g., heated tobacco products (also called heat-not-burn)] will also be considered. Research with a focus on other non-combustible nicotine and tobacco products will be considered on a case-by-case basis. Studies should examine population-based, clinical, and applied prevention of disease, including etiology and epidemiology of use, potential risks, benefits and impacts on other tobacco use behavior among different populations. Studies exclusively examining smokeless tobacco or combustible tobacco products (e.g., cigarettes, cigars) will be considered non-responsive.</p>

Elucidate the host immune mechanisms in response to and exploited by TBD pathogens. Advance research to improve the diagnosis of TBDs using both host- and pathogen-targeted approaches, including research for rapid diagnostics and multiplex platform approaches that detect multiple tickborne pathogens. Accelerate research to improve TBD prevention by supporting science to design, develop, and evaluate vaccines, vector control strategies, and other prevention approaches. Promote research to improve treatment for all forms of TBDs, including studies to develop effective therapies to treat symptoms that persist after TBD treatment, therapies for non-infectious TBDs, and new antimicrobials. Support tools and resources to advance research in understanding, preventing, diagnosing, and treating TBDs, including repositories, genomic resources, animal models, and preclinical services to aid the development and assessment of diagnostic, vaccine, and therapeutic candidates.</p>

	Synopsis	This notice informs applicants of an expansion to the NOT-HD-22-038 "Notice of Special Interest (NOSI): Research on the Impact of Policy Changes and Emerging and Evolving Public Health Crises on NICHD Populations of Interest" to include research priority areas for the National Institute on Drug Abuse (NIDA). The National Institute on Drug Abuse (NIDA) is issuing this Notice of Special Interest (NOSI) to announce that research on the effects of: emerging and evolving public health crises; and/or policy changes on the health, development, and well-being of populations of interest to the NIDA is of high program priority. The NIDA populations of interest include neonates, infants, children, adolescents, young adults, adults, and older adults, people using or misusing substances, people with substance use disorders, as well as the families of these individuals. The NIDA supports research on the impact of policy in understanding and addressing substance use risk and behavior across the life span. For information on the NIDA Strategic Goals and Mission, see https://nida.nih.gov/about-nida/strategic-plan/nidas-mission .

Synopsis	The purpose of this Academic Research Enhancement Award (AREA) for Undergraduate-Focused Institutions is to support small scale research grants at institutions that do not receive substantial funding from the NIH, with an emphasis on providing biomedical research experiences primarily for undergraduate students, and enhancing the research environment at applicant institutions. Eligible institutions must award baccalaureate science degrees and have received no more than \$6 million dollars per year of NIH support (in both direct and F&A/indirect costs) in 4 of the last 7 fiscal years. For institutions composed of multiple schools and colleges, the \$6 million funding limit is based on the amount of NIH funding received by all the non-health professional schools and colleges within the institution as a whole. Help determining the Organization Funding Level can be found here.

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 20-Jan-2024 [Optional][LOI/Pre-App], 20-Feb-2024</p> <p>Synopsis This RFA is soliciting applications proposing placebo-controlled, phase 3 clinical trials to determine the efficacy and safety of FDA approved monoclonal antibody therapies directed against amyloid compared to placebo in diverse "mixed dementia" populations with a focus on vascular contributions to cognitive impairment and dementia (VCID). In this NOFO the mixed-etiology dementias (MED) that are of interest and that are in scope are cognitive impairment and dementia cases positive for 1) canonical Alzheimer's pathology biomarkers (for example, amyloid deposition assessed using positron emission tomography and/or low cerebrospinal fluid amyloid beta 42 combined with elevated phosphorylated tau; and 2) with evidence of vascular contributions based on imaging (for example, white matter disease and/or subclinical infarction). Bayesian approaches with response adaptive randomization to examine specific subgroups are encouraged. Successful applications will be powered to determine efficacy in diverse populations representative of the distribution of the disease in the United States by sex, race/ethnicity, and geographic distribution. Applications must include elements of patient and community engagement that are incorporated into all stages of program development and at all levels of the organizational structure.</p>

Synopsis	The purpose of the Research Enhancement Award Program (REAP) for Health Professional Schools and Graduate Schools is to support small scale research grants at institutions that do not receive substantial funding from the NIH, with an emphasis on providing biomedical research experiences primarily for health professional, undergraduate and graduate students and enhancing the research environment at applicant institutions. Eligible institutions must award baccalaureate or advanced science degrees and have received no more than \$6 million dollars per year of NIH support (in both direct and F&A/indirect costs) in 4 of the last 7 fiscal years. For institutions composed of multiple schools and colleges, the \$6 million funding limit is based on the amount of NIH funding received by all the schools and colleges within the institution as a whole. Help determining the Organization Funding Level can be found here or https://grants.nih.gov/grants/funding/r15.htm . This REAP funding opportunity announcement (FOA) supports investigator-initiated mechanistic and/or minimal risk clinical trials addressing the mission and research interests of the participating NIH institutes. For purposes of this FOA, minimal risk clinical trials are defined as those that do not require FDA oversight, do not intend to formally establish efficacy, and have low risks to potentially cause physical or psychological harm.

	Synopsis	<p>The National Eye Institute (NEI) is issuing this Notice of Special Interest (NOSI) to encourage novel research that incorporates newly identified factors into new or existing models of visual system regeneration. These factors were identified by a consortium of research teams as part of the Audacious Goal Initiative (AGI) and are being shared broadly with the research community. Applicants beyond the original consortium are strongly encouraged to apply.</p>

	Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 12-Feb-2024 , 16-Feb-2024 , 25-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 12-Jun-2024 , 16-Jun-2024 , 25-Jun-2024 , 07-Sep-2024			
	Synopsis	<p>The Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) is issuing this Notice of Special Interest (NOSI) to invite applications to: Identify mechanisms, causes, correlates, and modifiable risk factors underlying recent trends in mortality during adolescence and young adulthood. Trends to be examined include the growing inequalities in overall mortality and by cause of death and manner of death (natural, unintentional and intentional injuries, including suicide and homicide, and undetermined), with attention to race, ethnicity, sex, gender, age, disability status, as well as family structure and living arrangements, income, education, and geographic location. Examine trends in mortality among individuals with intellectual and physical disabilities with a particular interest in studies that identify mechanisms, explanations, and modifiable risk factors. Improve the accuracy and granularity of cause of death coding, especially for individuals with intellectual and physical disabilities, and to improve the accuracy of manner of death coding, particularly across unintentional and intentional injuries, including suicide and homicide, for adolescents and young adults as well as for individuals with intellectual and physical disabilities. Improve research on mortality among youth populations of all sexual orientations and gender identities –especially for suicide and homicide, and other intentional and unintentional injuries. Examine the impact of rising mortality among adolescents, adolescents transitioning to adulthood and young adults on the health and development of the population, including demographic factors such as fertility and nuptiality, on the health and development of decedents' offspring and other family members, and on the health, development, and well-being of populations of interest to the NICHD is of high program priority. The NICHD populations of interest that are the focus of this Notice are adolescents, young adults, and individuals with intellectual, developmental, or physical disabilities. For information on the NICHD Strategic Plan 2020 (https://www.nichd.nih.gov/about/org/strategicplan)</p>

	Synopsis	The primary purpose of the NIH Mentored Clinical Scientist Research Career Development Awards (K08) program is to prepare qualified individuals for careers that have a significant impact on the health-related research needs of the Nation. This program represents the continuation of a long-standing NIH program that provides support and "protected time" to individuals with a clinical doctoral degree for an intensive, supervised research career development experience in the fields of biomedical and behavioral research, including translational research. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA. Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the website. ICs that do not participate in this announcement will not consider applications for funding. Consultation with NIH staff before submitting an application is strongly encouraged.

This Notice of Special Interest (NOSI) announces NIH support for the professional development of early career scientists aiming to establish a career in DS-related research. By providing these scientists with training, resources, and mentorship, the NIH intends to support the career development of junior investigators in DS who will lead future research to improve the understanding of the biology of DS and support development of new treatments for health conditions experienced by those with DS.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Contact Email david.schopfer@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 10-Jan-2024 , 11-Oct-2024 , 10-Jan-2025</p> <p>Synopsis The purpose of the Stimulating Access to Research in Residency Transition Scholar (StARRTS) K38 Career Development program is to retain and support clinician investigators who have successfully completed the Stimulating Access to Research in Residency (StARR) R38 Program (RFA-HL-18-023 or RFA-HL-23-006) as resident-investigators. Individuals who are awarded K38 grants described in this FOA will be referred to as Transition Scholars. The intent of this FOA is to provide Transition Scholars with opportunities for additional research and career development during subsequent clinical fellowship or early career faculty appointments (as defined in Section III. 3. Additional Information on Eligibility). It is anticipated that the StARRTS K38 program will provide a pathway to retain the newly-created pool of clinician-investigators generated through the StARR R38 program. Transition Scholar grantees will receive support for continued research and career development opportunities in basic, clinical and/or translational research thereby providing enhanced potential to accelerate the transition to independent research careers. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.</p>				
103312	Notice of Special Interest (NOSI): Developing and Testing Multilevel Physical Activity Interventions to Improve Health and Well-Being	National Institutes of Health/DHHS	NOT-OD-21-087	07-Jan-2024	Not Specified

Synopsis | The purpose of this Notice of Special Interest (NOSI) is to highlight interest in supporting research that aims to promote health equity in the prevention, treatment, and management of eye and vision conditions. Applications that target reduction of health disparities experienced by people who are visually impaired or blind are encouraged, as well as applications that investigate the impact of bias, structural racism, and discrimination in causing or sustaining eye or vision health inequities.

Synopsis | Though epidemiologic research has helped identify drowning risk factors, little is known about what intervention strategies have the greatest efficacy to prevent drowning and/or improve outcomes after a drowning event. Thus, the goal of this NOSI is to encourage and facilitate scientific discovery for drowning prevention, specifically aimed at reducing drowning risk and improving outcomes in three primary domains. Domain 1: Understanding drowning disparities and developing drowning interventions to address these disparities. Rates of drowning vary significantly. Reasons contributing to drowning risks among certain populations are multifaceted and likely related to access and exposure to water, knowledge and skills around water, and behaviors and beliefs. Research evaluating both structural and/or systemic forces which contribute to disparities in drowning risk among children, parents and communities is needed. Development of effective interventions aimed at addressing these factors as they pertain to drowning prevention is critical. Domain 2: Studying the effects of swim instruction on swim skills to prevent drowning. Swim skills, which are often obtained through swim instruction, can decrease drowning risk; however tremendous variability among types and techniques of swim instruction exists. Validated measures which consistently assess swim skill efficacy to prevent drowning at differing ages and developmental abilities are lacking. Metrics which help to identify effective, quality swim instruction to prevent drowning are needed. The development of evidence-based best practices as to when and how to instruct populations most at risk for drowning (such as children of young age, of certain races/ethnicities, with intellectual or developmental disabilities, or those with linguistic or cultural differences), is essential. Domain 3: The adoption, integration and sustainable scale-up of the drowning chain of survival. The five steps of drowning chain of survival can reduce drowning mortality. These steps include: (1) preventing drowning, (2) recognizing distress, (3) providing flotation, (4) removal from water and (5) providing care as needed. Depending on the

093935	NIH Pathway to Independence Award (Parent K99/R00 Independent Basic Experimental Studies with Humans Required)	National Institutes of Health/DHHS	PA-20-189	07-Jan-2024	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 12-Feb-2024 , 07-May-2024</p> <p>Synopsis</p> <p>The purpose of the NIH Pathway to Independence Award (K99/R00) program is to facilitate a timely transition of outstanding postdoctoral researchers with a research and/or clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help awardees to launch competitive, independent research careers. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. ICs that do not participate in this announcement will not consider applications for funding. Consultation with NIH staff before submitting an application is strongly encouraged.</p>

This initiative is broadly supported by many participating NIH institutes, centers, and offices (ICOs). For this NOSI, interoception includes the processes by which an organism senses, interprets, integrates, and regulates signals originating from within itself and represents its internal states. This NOSI encourages basic and clinical research projects that 1) combine diverse expertise; 2) develop and use innovative technologies and approaches to delineate interoceptive mechanisms at the molecular, cellular, circuit, functional, and/or behavioral levels; 3) assess pathophysiological processes of interoception in the context of diseases and disorders; 4) determine the impact of interventions and therapies to manipulate interoceptive processes on health and/or disease; and 5) develop and validate predictive biomarkers, computational models, or artificial intelligence models relevant to interoception and its impact on health and disease.</p>

	<p>Deadline Dates (ALL) 13-Nov-2023 , 07-Jan-2024 , 05-Feb-2024 , 06-Feb-2024 , 16-Feb-2024 , 11-Mar-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 09-Jul-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 12-Nov-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 16-Jun-2025 , 07-Sep-2025 , 05-Oct-2025</p> <p>Synopsis The purpose of this Notice is to highlight interest in addressing the role of violence in health outcomes and integrating violence-related screening and interventions into health care settings. This Notice is to encourage intervention research focused on addressing exposure to violence - including but not limited to child maltreatment, intimate partner violence/teen dating violence, elder mistreatment, peer violence/bullying, and community violence – to improve individual-level health processes and outcomes.</p>				
112267	Notice of Special Interest (NOSI): Advancing Research on Early Pregnancy Loss	National Institutes of Health/DHHS	NOT-HD-22-026	07-Jan-2024	Not Specified
	<p>Contact Name Clara Cheng, PhD</p> <p>Contact Telephone 301-435-6992</p> <p>Contact Email clara.cheng@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 16-Jun-2025 , 07-Sep-2025</p> <p>Synopsis Early Pregnancy loss (EPL), defined as a pregnancy loss occurring up to 20 weeks gestation, is a very common pregnancy complication, occurring in 12-15% of clinically recognized pregnancies, with increased prevalence associated with increasing maternal age. The use of highly sensitive hCG assays allows the detection of pregnancy earlier in gestation than the time of clinical recognition, and gives an even higher estimated loss of 50-70% of conceptions prior to the second trimester. To achieve a successful pregnancy, a series of strict embryonic and maternal conditions must be met, that include high quality embryos, favorable conditions for embryo implantation, receptive maternal endometrium and optimal uterine environment to sustain the conceptus to term. In addition, maternal immune tolerance and hormonal factors play a critical role. While approximately half of all cases of EPL appear to be due to embryonic aneuploidy, very little is known about the physiologic and pathophysiologic processes that underlie non-aneuploid EPL. As a result, there is also a lack of understanding for the underlying causes of recurrent pregnancy loss (RPL). This NOSI seeks to address these critical knowledge gaps by encouraging basic, translational and clinical studies on biological processes that may uncover potential etiologies of EPL and RPL. This includes research to understand implantation mechanistically and identify a range of key factors, involved in implantation and placentation that are important for early pregnancy establishment, including abnormalities that contribute to sporadic EPL and recurrent pregnancy loss.</p>

The research approach should be interdisciplinary in nature, and the research teams are expected to establish a common goal that requires collaboration, synergy, and managed team interactions. Proposed research should not represent a collection of individual efforts or parallel projects. Proposed research should support a cohesive, single, well-integrated research plan with a singular focus, one set of aims, and a budget without subprojects. Teams must leverage appropriate multi-disciplinary expertise to develop new principles and methods for experimentation, analysis, and interpretation. Teams are encouraged to consider transformative objectives with defined 5-year outcomes that will produce major advances in the understanding of human pain conditions and are likely to improve strategies for effective management of human pain.</p>

on patient-oriented research. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. ICs that do not participate in this announcement will not consider applications for funding. Consultation with NIH staff before submitting an application is strongly encouraged.

Synopsis	<p>The purpose of the Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC) Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to support a cohort of early career, independent investigators from diverse backgrounds conducting research in NIH mission areas. The long-term goal of this program is to enhance diversity in the biomedical research workforce. The MOSAIC K99/R00 program is designed to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds (e.g., see Notice of NIH's Interest in Diversity) from their mentored, postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The MOSAIC K99/R00 program will provide independent NIH research support before and after this transition to help awardees launch successful, independent research careers. Additionally, MOSAIC K99/R00 scholars will be part of organized scientific cohorts and will be expected to participate in mentoring, networking, and professional development activities coordinated by MOSAIC Institutionally-Focused Research Education Award to Promote Diversity (UE5) grantees. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include</p>

Synopsis

The purpose of the Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC) Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to support a cohort of early career, independent investigators from diverse backgrounds conducting research in NIH mission areas. The long-term goal of this program is to enhance diversity in the biomedical research workforce. The MOSAIC K99/R00 program is designed to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds (e.g., see Notice of NIH's Interest in Diversity) from their mentored, postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The MOSAIC K99/R00 program will provide independent NIH research support before and after this transition to help awardees launch successful, independent research careers. Additionally, MOSAIC K99/R00 scholars will be part of organized scientific cohorts and will be expected to participate in mentoring, networking, and professional development activities coordinated by MOSAIC Institutionally-Focused Research Education Award to Promote Diversity (UE5) grantees. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA PAR-21-271.

112644	<p>Notice of Special Interest (NOSI): Promoting Mechanistic Research on Therapeutic and Other Biological Properties of Minor Cannabinoids and Terpenes</p>	National Institutes of Health/DHHS	NOT-AT-22-027	07-Jan-2024	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 06-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024</p> <p>Synopsis This Notice of Special Interest (NOSI) is being issued by the National Center for Complementary and Integrative Health (NCCIH) with participation from multiple NIH Institutes, Centers, and Offices (ICOs). This NOSI aims to promote mechanistic research of therapeutic benefits of minor cannabinoids and terpenes in the cannabis plant. Minor cannabinoids are defined as any and all cannabinoids from the cannabis plant other than Δ9-tetrahydrocannabinol (Δ9-THC). Cannabinoids of particular interest include the following: Δ8-THC, Cannabidiol (CBD), Cannabigerol (CBG), Cannabinol (CBN), Cannabichromene (CBC), cannabichromevarin (CBDV), tetrahydrocannabivarin (THCV), Tetrahydrocannabivarin acid (THCVA), tetrahydrocannabinolic acid (THCA), carmagerol, cannabicitran, sesquicannabigerol. Terpenes of particular interest include the following: Myrcene, β-caryophyllene, Limonene, α -terpineol, Linalool, α-phellandrene, α-pinene, β-pinene, β-terpinene, and α-humulene. This NOSI intends to support highly innovative basic and/or mechanistic studies in appropriate model organisms and/or human subjects aiming to investigate the impact of minor cannabinoids and terpenes on mechanisms underlying their therapeutic effects. Preclinical studies of combinations of minor cannabinoids with terpenes or other natural products that may enhance their therapeutic benefits and/or abate unwanted effects are encouraged. The mechanisms and processes underlying potential contribution of minor cannabinoids and terpenes to symptoms relief and functional restoration may be very broad encompassing different pathological conditions and diseases. This NOSI encourages interdisciplinary collaborations among experts from multiple fields, such as pharmacologists, chemists,</p>

	Synopsis	<p>This Trailblazer Award is an opportunity for NIH-defined New and Early Stage Investigators (https://grants.nih.gov/policy/early-investigators/index.htm) to pursue research programs of high interest to the NIBIB that integrate engineering and the physical sciences with the life and/or biomedical sciences. A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</p>

	Synopsis	This Notice of Special Interest (NOSI) solicits applications in the area of XAI applied to neuroscientific questions of encoding, decoding, and modulation of neural circuits linked to behavior. This NOSI encourages collaborations between computationally and experimentally focused investigators. This NOSI seeks the development of machine learning algorithms that are able to mechanistically explain how experimental manipulations affect cognitive, affective, or social processing in humans or animals. Proof-of-concept applications aimed at improving the current state of the technology that uses XAI to provide unbiased, hierarchical explanations of causal relationships between complex neural and behavioral data are also appropriate.

The program will provide independent NIH research support during this transition in order to help awardees to launch competitive, independent research careers. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA. Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. ICs that do not participate in this announcement will not consider applications for funding. Consultation with NIH staff before submitting an application is strongly encouraged.</p>

093214	Independent Scientist Award (Parent K02 Independent Basic Experimental Studies with Humans Required)	National Institutes of Health/DHHS	PA-20-173	07-Jan-2024	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email grantinfo@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 12-Feb-2024 , 07-May-2024</p> <p>Synopsis</p> <p>The purpose of the NIH Independent Scientist Award (K02) is to foster the development of outstanding scientists and enable them to expand their potential to make significant contributions to their field of research. The K02 award provides three to five years of salary support and "protected time" for newly independent scientists who can demonstrate the need for a period of intensive research focus as a means of enhancing their research careers. Each independent scientist career award program must be tailored to meet the individual needs of the candidate. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.</p>

---------	---------------	--------------	----------------	---------------	----------------

Synopsis This announcement encourages applications to conduct research on the effects of public policies on health-related behaviors and outcomes associated with alcohol, cannabis, tobacco, prescription drugs, and other substances. The purpose of the Notice is to advance understanding of how public policy may serve as a tool for improving public health and welfare through its effects on behaviors and outcomes pertaining to alcohol and other drugs. This Notice is intended to support innovative research to examine policy effects that have the potential to lead to meaningful changes in public health. Research projects that may be supported include, but are not necessarily limited to: causal analyses of the effects of one or multiple public policies; evaluations of the effectiveness of specific public policies as tools for improving public health through their effects on alcohol-, cannabis-, tobacco-, and other substance-related behaviors and outcomes; studies of disparities in policy effects and the role of policy in exacerbating or potentially reducing health disparities; and research to advance methods and measurement used in studying relationships between public policies and alcohol-, cannabis-, tobacco-, and other substance-related behaviors and outcomes.

107449	Notice of Special Interest (NOSI): Reducing Stigma Related to Drug Use in Human Service Settings	National Institutes of Health/DHHS	NOT-DA-21-060	07-Jan-2024	Not Specified
	<p>Contact Name Richard A. Jenkins PhD</p> <p>Contact Telephone 301-443-1923</p> <p>Contact Email jenkinsri@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 07-Jan-2025</p> <p>Synopsis The National Institute on Drug Abuse (NIDA) recognizes that stigma is pervasive in clinic, social service and other settings related to HIV prevention and care. Stigma contributes to a lack of attention to drug use screening, inadequate outreach to people who use drugs (PWUD) and insufficient uptake of services to prevent, treat, or mitigate HIV infection (and related consequences of drug use) among PWUD. Stigmas of interest include: internalized stigma among drug users, stigma associated with providing services to PWUD, and stigma toward PWUD by providers or service settings. Policies and practices that create or augment stigma also are of interest here, as well as stigma experienced by providers who might otherwise broaden their services to PWUD. Stigma reduction interventions for HIV service settings have been developed and, in some cases, implemented on a wide scale, but generally target sexual transmission as the primary behavioral risk; however, knowledge from this work can inform stigma among PWUD. Large literatures on stigma also exist in a variety of other conditions (e.g., cancer, mental illness) which also can provide conceptual and programmatic bases to speed the development of new interventions addressing PWUD.</p>

Synopsis	<p>The purpose of this funding opportunity is to provide an opportunity for funded researchers in these various fields to pursue supplemental funding to conduct research addressing these emerging and other existing COVID-related issues among pregnant and lactating people, infants, children and adolescents, and individuals with physical and/or intellectual disabilities. The goal of this NOSI is to not replace or to compete with the various COVID-related funding opportunities currently available. Instead, the purpose is to complement them by offering a funding opportunity for currently funded investigators to address key issues not currently covered by available COVID-related funding announcements among these populations. It is hoped that the use of administrative supplements will foster research in these key areas in the most timely manner. Research projects addressing issues that are the focus of currently available or future COVID funding opportunity announcements will be encouraged to submit to those announcements. Also, applicants responding to this NOSI are strongly encouraged to describe plans for the rapid sharing of data and results as well as innovative data analytics approaches. The sharing of COVID-related data and resources and the effective communication of results are a high priority of the NIH.</p>

	Deadline Dates (ALL)	07-Jan-2024 , 16-Feb-2024 , 07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 16-Feb-2025 , 07-May-2025			
	Synopsis	This Funding Opportunity Announcement (FOA) supports exploratory research leading to the development of innovative technologies for biomedical research that is relevant to the NIGMS mission or that of other NIH Institutes or Centers (ICs) participating in this FOA. Projects should entail a high degree of risk and/or novelty, which will be offset by a high future potential impact in biomedical research. Outcomes or products of the proposed project, which should significantly advance the current state of the art, may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified by human intervention to become research tools. The goal of this FOA is to support proof of concept, high-risk and potentially high-reward studies for feasibility and exploratory technology development. Due to the constraints that would be imposed on broad utility, this FOA does not support technology development that is narrowly focused on addressing specific biological questions. Rather, applications should propose development of innovative tools that can potentially benefit a broad spectrum of biomedical research. Moreover, feasibility of the proposed technology must not have already been established in the literature or with preliminary data. Applications that are focused on technology development to address specific biological questions and/or include unpublished or published data that provide proof of concept are not responsive to this FOA and will be administratively withdrawn without review.

The intent is to support the addition of new measurement modalities to evaluate existing and recently developed but not yet validated digital health and AI tools such as sensor technologies, smartphone applications, software as a medical device (SaMD), and AI algorithms.</p>				
110102	<p>Notice of Special Interest (NOSI): Dissemination and Implementation Research to Advance Mental, Emotional, and Behavioral Health Preventive Interventions in School Settings</p>	National Institutes of Health/DHHS	NOT-AT-22-004	07-Jan-2024	Not Specified
	<p>Contact Name Beda Jean-Francois, Ph.D.</p> <p>Contact Telephone 202-313-2144</p> <p>Contact Email Beda.Jean-Francois@nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2024 , 05-Feb-2024 , 15-Feb-2024 , 16-Feb-2024 , 07-May-2024 , 05-Jun-2024</p> <p>Synopsis The purpose of this Notice of Special Interest (NOSI) is to stimulate dissemination and implementation research to support innovative approaches to identifying, understanding, and developing strategies for overcoming barriers to the adoption, adaptation, integration, scale-up and sustainability of evidence-based preventive interventions to support children’s mental, emotional, and behavioral (MEB) health in school settings. This NOSI encourages applications which focus on dissemination and implementation research to deliver interventions in the school setting that will promote healthy MEB development and/or prevent MEB disorders. Applications should include a focus on one of the following: (1) primary/universal prevention MEB programs designed to promote healthy MEB development by decreasing risk factors and increasing protective factors to prevent onset of an MEB disorder; or (2) secondary/selective prevention programs designed to support screening and early identification of MEB disorders to slow progression with early intervention. Applications focused on tertiary/indicated treatment of MEB disorders will be considered non-responsive to this Notice.</p>

	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to support investigators who have interest and capability to join efforts for the discovery of cell-based chemical probes for novel brain targets. It is expected that applicants will have, in hand, the starting compounds (“validated hits”) for chemical optimization and bioassays for testing new analog compounds. Through this FOA, NIH wishes to stimulate research in: 1) discovery and development of novel, small molecules for their potential use in understanding biological processes relevant to the missions of NIMH, NIDA, NEI and/or NIA; and 2) discovery and/or validation of novel, biological targets that will inform studies of brain disease mechanisms. Emphasis will be placed on projects that provide new insight into important disease-related biological targets and biological processes. The main emphasis of projects submitted under this FOA should be the discovery of cell-based chemical probes. Applicants interested in developing in vivo chemical probes may wish to apply using the companion R01 mechanism, (PAR-21-029).</p>			
101367	Notice of Special Interest (NOSI): Use of Human Connectome Data for Secondary Analysis	National Institutes of Health/DHHS	NOT-MH-21-175	07-Jan-2024	Not Specified

	Program URL	Link to program URL			
	Deadline Dates (ALL)	07-Jan-2024 , 05-Feb-2024 , 16-Feb-2024 , 07-May-2024			
	Synopsis	<p>NIMH and participating institutes/centers (ICs) listed above are issuing this Notice of Special Interest (NOSI) to encourage secondary analyses of data from the Human Connectome Project (HCP) including the multiple datasets in the Lifespan Human Connectome projects and the Human Connectomes Related to Human Disease. Applicants beyond the groups that originally collected the data are encouraged to apply. The analyses will serve to generate and evaluate hypotheses about the complex interrelationships among: brain structure, function and connectivity; cognitive, affective, sensory and motor processes; environmental factors; life event, social and psychosocial factors; genomic data, and clinical symptoms during development, aging, or disease. Details about the “Lifespan” and “Disease” Connectomes, including neuroimaging protocols and clinical and behavioral assessments, can be found at the Connectome Coordinating Facility website: https://www.humanconnectome.org/ and at the NIMH Data Archive (NDA) www.nda.nih.gov.</p>

	<p>Contact Email gindhartjg@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 25-Jan-2024</p> <p>Synopsis The goal of the Medical Scientist Training Program (MSTP) is to develop a diverse pool of highly trained clinician-scientist leaders available to meet the Nation’s biomedical research needs. Specifically, this funding opportunity announcement (FOA) provides support to eligible domestic institutions to develop and implement effective, evidence-informed approaches to integrated dual-degree training leading to the award of both clinical degrees, e.g., M.D., D.O., D.V.M., D.D.S., Pharm.D., and research doctorate degrees (Ph.D.). With the dual qualification of rigorous scientific research and clinical practice, graduates will be equipped with the skills to develop research programs that accelerate the translation of research advances to the understanding, detection, treatment and prevention of human disease, and to lead the advancement of biomedical research. Areas of particular importance to NIGMS are the iterative optimization of MSTP training efficacy and efficiency, fostering the persistence of MSTP alumni in research careers, and enhancing the diversity of the clinician-scientist workforce. NIGMS expects that the proposed research training programs will incorporate didactic, research, mentoring and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the Nation. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>

	Synopsis	<p>The Office of Research Infrastructure Programs (ORIP) encourages resource-related research grant applications aimed at developing broadly applicable technologies, tools, and resources for validating animal models and enhancing rigor, reproducibility, and translatability of animal research. Proposed studies, models, resources, or technologies submitted under this Funding Opportunity Announcement (FOA) must either address research interests of multiple NIH Institutes and Centers (ICs), explore multiple organ systems, or be applicable to diseases and processes that impact multiple organ systems in order to align with ORIP's NIH-wide mission and programs. Applications should aim to enhance the rigor, reproducibility, and translatability of animal research through the development of technologies, tools, and resources that have significant impact across a broad range of research areas using animal models. Applications must demonstrate how the proposed resources and technologies impact rigor and reproducibility of animal studies. Applications for developing a limited quantity of resources are not suitable for this FOA.</p>

Nonhuman primates (NHPs) are most closely related to humans, both physiologically and genetically. Therefore, NHPs are critical animal models for basic and translational research aimed at understanding human biology, both in normal and diseased states. Proper husbandry and management of NHPs require specialized physical and intellectual resources, which are most effectively and economically provided in centralized primate centers, the resources of which are made available to investigators on a national basis. The NPRCs provide these resources to investigators/grantees who utilize NHPs in biomedical research and thereby complement and help enable the missions of the NIH Institutes and Centers.</p>				
115070	RFA-OD-23-001 -- Animal and Biological Material Resource Centers (P40) (Clinical Trials Not-Allowed)	Office of Research Infrastructure Programs/NIH/DHHS	RFA-OD-23-001	09-Jan-2024	Not Specified

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	07-Jan-2024			
	Synopsis	The purpose of this Funding Opportunity Announcement is to provide continuing support for specific pathogen-free (SPF) macaque colonies previously funded under the auspices of PAR-18-669 and PAR-14-066. Breeding colonies are essential to sustain appropriate macaques for research related to Human Immunodeficiency Virus (HIV)/Acquired Immunodeficiency Syndrome (AIDS). Pedigree SPF macaques are free of certain viruses, which may confound the results of HIV/AIDS-related investigations or present a risk to the personnel who care for the animals. The SPF macaques are genetically characterized for major histocompatibility complex (MHC) class I types, because MHC class I genotypes have large effects on macaque immune responses to Simian Immunodeficiency Virus (SIV, which can induce AIDS in nonhuman primates (NHP)) and on human immune responses to HIV.

	Synopsis	This Funding Opportunity Announcement (FOA) encourages Research Conference Grant (R13) applications to conduct an annual intensive workshop/conference/meeting that addresses the needs of early stage HIV/AIDS researchers utilizing nonhuman primates (NHPs) as they translate preclinical research from NHPs to human clinical trials. The objectives of the meeting(s) supported by this FOA are to provide these early stage HIV/AIDS researchers with guidance on conducting preclinical research to inform clinical trials on reducing the incidence of HIV/AIDS infection, including vaccine development and testing; developing next-generation HIV therapies, including potential cure therapies; treatment of HIV-associated coinfections, comorbidities and complications; and infection prevention strategies. In addition to guidance on translating results to clinical trials, the conference should target developing skills related to networking, grantsmanship, and goal/milestone-driven projects. Conference topics should also include other considerations such as statistical and host genetics considerations; methods to translate the results of NHP studies to clinical trials in humans; and how to develop new NHP research programs to better reflect clinical observations and findings in HIV/AIDS patients.

Synopsis	<p>This Notice of Funding Opportunity (NOFO) invites applications from eligible academic and research institutions to apply for funding to modernize existing or construct new biomedical research facilities. Applications will be accepted from public and private nonprofit institutions of higher education as well as from non-profit research organizations. Applications from both research-intensive institutions and Institutions of Emerging Excellence (IEE) in biomedical research, both highly resourced and low-resourced institutions, from all geographic regions in the nation are strongly encouraged. NIH recognizes the importance of all institutions of higher learning in contributing to the nation's research capacity. The goal of this NOFO is to modernize biomedical research infrastructure to strengthen biomedical research programs. Each project is expected to provide long-term improvements to the institutional research infrastructure. Intended projects are the construction or modernization of core facilities and the development of other shared research infrastructure serving an institution-wide research community with broad impact on biomedical research.</p>

National Science Foundation (NSF) Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 05-Jan-2024</p> <p>Synopsis The U.S. National Science Foundation (NSF) and the Ministry of Electronics and Information Technology (MeitY) of the Government of India have signed an Implementation Arrangement on research cooperation. The Implementation Arrangement provides a framework to encourage collaborations between U.S. and Indian research communities and sets out the principles by which joint activities might be supported. Through this research agency partnership, U.S. researchers may receive funding from NSF and India researchers may receive funding from MeitY. This NSF-MeitY collaborative opportunity focuses on research and technological development in areas of mutual interest listed through the participating NSF programs that develop new knowledge in all aspects of semiconductor research, next generation communication systems, cyber-security, sustainability and green technologies, and intelligent transportation systems. Technology development/demonstrations may be in terms of development of prototypes, pilot scale demonstrations, field deployment, and other efforts to accelerate technology transfer. Proposing teams of U.S. and India investigators are strongly encouraged to develop appropriate partnerships with testbed providers, local communities, and industry partners to ensure that necessary resources and expertise are available for the success of their project.</p>

research in emerging technologies for teaching and learning that respond to pressing needs in authentic (real-world) educational environments. RITEL supports future-oriented exploratory and synergistic research in emerging technologies (including, but not limited to, artificial intelligence (AI), robotics, and immersive or augmenting technologies) for teaching and learning. The program accepts proposals that focus on learning, teaching, or a combination of both. The scope of the program is broad and includes teaching and learning in science, technology, engineering, and mathematics (STEM) and in foundational areas that enable STEM (e.g., self-regulation, literacy, communication, collaboration, creativity, and socio-emotional skills). RITEL supports research in all learning contexts (e.g., formal, informal, workplace) and for all learner populations. RITEL has a special interest in diverse learner/educator populations and in developing new educational technologies that are cost-effective for budget-limited school districts, colleges and universities. Research in this program should be informed by the convergence (synthesis) of multiple disciplines: e.g., learning sciences; discipline-based education research; computer and information science and engineering; design; and cognitive, behavioral, and social sciences. RITEL is unique in its requirement that projects must advance research in both learning (and/or teaching) and technology.

Deadline Dates (ALL) | 25-Jan-2024

Synopsis | The Ethical and Responsible Research (ER2) program aims to support fundamental research about what constitutes or promotes responsible and ethical conduct of research (RECR). The ER2 program seeks to encourage science, technology, engineering and mathematics (STEM) researchers, practitioners and educators at all career stages to conduct research with integrity and to educate others about RECR. Research questions of interest to the program could address ethical issues involving diversity, equity, inclusion, accessibility, bias, culture, transparency and mentoring or other interpersonal behaviors in research environments, as well as the following: What constitutes responsible and ethical conduct of research (RECR) and why?; What are the similarities and differences between RECR norms in different fields, sectors (for example, academia, industry and non-profit), or locations (states, regions or countries), and what can they learn from one another in terms of promoting ethical research practices?; Which organizational practices, contexts, and incentives promote ethical and responsible STEM research and why?; Which practices contribute to establishing and maintaining ethical cultures, and how

Deadline Dates (ALL)	29-Jan-2024 , 09-Oct-2024
Synopsis	<p>The Research Experiences for Teachers (RET) in Engineering and Computer Science program supports authentic summer research experiences for K-14 educators to foster long-term collaborations between universities, community colleges, school districts, and industry partners. With this solicitation, the Directorates for Engineering (ENG) and Computer and Information Science and Engineering (CISE) focus on a reciprocal exchange of expertise between K-14 educators and research faculty and (when applicable) industry mentors. K-14 educators will enhance their scientific disciplinary knowledge in engineering or computer science and translate their research experiences into classroom activities and curricula to broaden their students' awareness of and participation in computing and engineering pathways. At the same time, the hosting research faculty will deepen their understanding of classroom practices, current curricula, pedagogy, and K-14 educational environments.</p>

Synopsis

The Office of Biomedical Advanced Research and Development Authority (BARDA), within the Administration for Strategic Preparedness and Response (ASPR) at the U.S. Department of Health and Human Services (HHS) seeks to establish partnerships to build the next iteration of the BARDA Accelerator Network (BAN 2.0) using BARDA’s Other Transaction Authority to foster the health security innovation ecosystem with commercialization and wrap-around support and to enable rapid development, evaluation, validation, and commercialization of medical countermeasures. With BAN 2.0, BARDA aims to further enhance the global health security innovation ecosystem, optimize startup acceleration and wrap-around services, and ultimately develop the Accelerator Network as a scalable infrastructure for commercialization including active product development support, and validation capabilities during regular operations as well as rapid response during public health emergencies. BARDA envisions that BAN 2.0 will support BARDA’s mission by addressing the following objectives/tasks: Support health security innovators, startups, and existing BARDA partners already receiving BARDA funding (“BARDA funded partners”) by providing wraparound accelerator services including entrepreneurship education and access to technical and business/commercialization expertise and resources. Provide BARDA with capabilities to source, review, fund, and accelerate startups and perform product development, evaluation, and validation of MCMs based on BARDA’s strategic priorities. Build a rapid emergency response infrastructure to fund and accelerate product development and validation of MCMs that can be developed and deployed as quickly as possible in the event of a public health emergency. BARDA intends to enter into other transaction agreements with five or more Accelerator Hub organizations with each Accelerator Hub providing resources and support focused on one of the following Technology Areas: Therapeutics/Vaccines Diagnostics/Medical Devices Digital Health Enabling Technologies (e.g., Biomanufacturing/Drug Development/Clinical Support) Special Populations (e.g., Pediatrics, low resource settings) Submissions are due at 12:00PM ET on the due dates listed below for each technology area. BARDA may adjust the closing date for submissions under any of the following technology areas through amendment of this notice. Diagnostics/Medical Devices on September 15, 2023, with the intent to make an award within 90-120 days of the proposal due date. Therapeutics/Vaccines on October 2, 2023, with the intent to make an award within 90-120 days of the proposal

The program’s purpose is to integrate preventive oral health care into primary care services accessible to MCH populations living in communities underserved by oral health care. The Consortium will bridge the gap between evidence and practice. As the principal technical assistance (TA) provider, the Consortium will accelerate the adoption and implementation of evidence-based integrated POHC strategies that aim to advance health equity. The Consortium will provide targeted TA, using implementation science and collaborative learning, to strengthen an MCH-IOHI Project team’s two-tier, state and local, improvement approach. The Consortium will also provide universal TA that’s easily accessible to all states and jurisdictions. Universal TA will include the development and dissemination of evidence-based/-informed preventive oral health care resources and guidance.</p>

Deadline Dates (ALL)	31-Jan-2024 [LOI/Pre-App], 27-Mar-2024
Synopsis	<p>This competition will support innovative research to application (R2A) projects that will address the prevention and/or removal of marine debris and provide the potential for transformational behavior change. “Research to application” or R2A refers to research that transitions into tangible outputs. Example outputs include (but are not limited to) inventive prototypes, commercial products, specialized services, or cutting-edge tools. Big ideas and risk taking are encouraged. Planning and capacity building activities are allowed but must accompany subsequent implementation activities; the end result of these projects cannot be solely academic or non-tangible outputs (e.g., scientific publications, awareness/training). A strong application will clearly outline how the project will produce new and effective deliverables that change the landscape for marine debris prevention and/or removal. Projects will communicate these outputs to the public (communities, stakeholders, industry, etc.) with the aim of addressing critical gaps with respect to marine debris. Proposals may address (but are not limited to) innovative or non-proven interception and/or removal technologies (i.e. prototype devices that require additional research and development prior to deployment, and/or need to be tested in new environments), reusable systems, and/or the detection and mitigation of microplastics and/or nanoplastics.</p>

	Synopsis	<p>The Boyce Thompson Institute for Plant Research - Plant Genome Research Program (PGRP) summer internship program offers an opportunity for undergraduate students to learn how basic plant research can be applied to protect the environment, enhance human health, and improve agriculture. PGRP undergraduate researchers gain knowledge of plant genomics and scientific research by working closely with their mentors, postdoctoral fellows, and graduate students in a laboratory setting. Undergraduate researchers will learn the latest molecular biology techniques and bioinformatics tools while working on a supervised, independent research project within the framework of the assigned laboratory's research program. The program offers a variety of projects spanning plant science, plant molecular biology, plant biotic interactions, bioinformatics, and biological engineering of plant systems. To learn more about each area please visit https://btiscience.org/education-outreach/research-internships/</p>

	Deadline Dates (ALL)	08-Jan-2024			
	Synopsis	Recognizing the vital role cross-trained scientists will play in furthering biomedical science, the Burroughs Wellcome Fund developed the Career Awards at the Scientific Interface. These grants are intended to foster the early career development of researchers who are dedicated to pursuing a career in academic research. The specific target group are researchers who have transitioned from graduate work in the physical/mathematical/computational sciences or engineering into postdoctoral work in the biological sciences. BWF's Career Awards at the Scientific Interface (CASI) provide \$560,000 over five years to bridge advanced postdoctoral training and the first three years of faculty service. These awards are open to U.S. and Canadian citizens, permanent residents, or temporary residents.

	<p>Deadline Dates (ALL) 11-Jan-2024</p> <p>Synopsis The Conquer Cancer Global Oncology Young Investigator Award (GO YIA) provides research funding to early-career investigators to encourage and promote quality research in global oncology and to develop the next generation researchers to address global health needs. Global oncology, as defined by the ASCO Global Oncology Task Force, “collaboratively addresses disparities and differences in cancer prevention, care, research, education, and the disease’s social and human impact around the world. It includes a full spectrum of activities ranging from epidemiology to implementation science to public health policy”. Global oncology research generally applies of the concepts of global health to cancer, and implies an approach to the practice of oncology that acknowledges the reality of limited resources in most parts of the world. For purposes of this Request for Proposals (RFP), “global health” is described as an “area for study, research, and practice that places a priority on improving health and achieving health equity for all people worldwide.”</p> <p>Applicant Types</p> <p>Funding Limit 50,000.00 maximum</p> <p>Limited Submission No</p>

	<p>Synopsis</p> <p>Applicant Types</p> <p>Funding Limit</p> <p>Limited Submission</p>	<p>The Collaborative Initiative for Paediatric HIV Education and Research (CIPHER) Grant Programme funds projects with the potential to address critical research questions that remain unanswered in the global response. The intention is to support research that can inform policy change and ensure better outcomes for infants, children and adolescents living with and affected by HIV in resource-limited settings. Designed for early-stage investigators, a key aim of the programme is to build research capacity within these settings by fostering the next generation of investigators in paediatric and adolescent HIV. By attracting young investigators from inside and outside the field of HIV, it encourages innovative ideas and leads to the design of evidence-based approaches and interventions to overcome major obstacles in the field.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The Patient-Centered Outcomes Research Institute (PCORI) is seeking to fund high-quality, comparative clinical effectiveness research (CER) projects that focus on optimizing physical and mental functioning for community-dwelling older adults and their caregivers. The proposed budget for studies under this initiative may be up to \$5 million in direct costs. By 2060, the number of Americans over 65 is projected to reach around 95 million, making up almost a quarter of the U.S. population. The number of people of color among the older adult population is also projected to increase significantly. Many older adults live with multiple chronic conditions, with a disproportionately greater burden experienced by people of color. Most older adults, including those with multiple chronic conditions, prefer to stay in their homes and communities for as long as possible, a concept referred to as “aging in place.” Family members or close friends often serve as the primary caregiver to older adults and play a critical role in helping them age in place by directly addressing their care needs and helping them navigate a fragmented health care system. As the needs of older adults become more complex, the caregiving role also intensifies, often resulting in a detrimental impact on caregiver well-being. Currently, the health care system is not well-equipped to address the complex care needs of the rapidly growing and diverse older adult population in the United States.</p>

	Synopsis	This PCORI Funding Announcement (PFA) invites applications for high-quality comparative clinical effectiveness research (CER) projects that will examine a critical patient-centered research question that is also relevant to decision makers and other stakeholders. Investigators should propose an individual-level or cluster randomized controlled trial of significant scale and scope, requiring funding in excess of \$10 million in direct costs. The proposed trials should address important decisional dilemmas that require additional evidence to inform the comparative effectiveness of available interventions.

	Synopsis	The Collaborative Initiative for Paediatric HIV Education and Research (CIPHER) Grant Programme funds projects with the potential to address critical research questions that remain unanswered in the global response. The intention is to support research that can inform policy change and ensure better outcomes for infants, children and adolescents living with and affected by HIV in resource-limited settings. Designed for early-stage investigators, a key aim of the programme is to build research capacity within these settings by fostering the next generation of investigators in paediatric and adolescent HIV. By attracting young investigators from inside and outside the field of HIV, it encourages innovative ideas and leads to the design of evidence-based approaches and interventions to overcome major obstacles in the field.

	Synopsis	The goal of the UNC Lineberger Cancer Control Education Program (CCEP) is to support research and training for highly-qualified individuals pursuing independent research careers in interdisciplinary and collaborative cancer prevention and control. The program emphasizes biobehavioral, translational public health research, pairing new knowledge on behavioral, community, organizational, policy-oriented, and molecular cancer risk factors with the design and implementation of interventions designed to decrease cancer risk or detect it early. Interventions by past trainees have targeted changes in tobacco use, diet, physical activity, tanning, vaccinations, and/or other cancer screening and adherence behaviors. The program has trained and fostered career development for over 100 trainees over the past two decades.

	Deadline Dates (ALL)	09-Jan-2024			
	Synopsis	<p>The Patient-Centered Outcomes Research Institute (PCORI) is seeking to fund high-quality, comparative clinical effectiveness research (CER) projects that focus on optimizing physical and mental functioning for community-dwelling older adults and their caregivers. The proposed budget for studies under this initiative may be up to \$5 million in direct costs. By 2060, the number of Americans over 65 is projected to reach around 95 million, making up almost a quarter of the U.S. population. The number of people of color among the older adult population is also projected to increase significantly. Many older adults live with multiple chronic conditions, with a disproportionately greater burden experienced by people of color. Most older adults, including those with multiple chronic conditions, prefer to stay in their homes and communities for as long as possible, a concept referred to as "aging in place." Family members or close friends often serve as the primary caregiver to older adults and play a critical role in helping them age in place by directly addressing their care needs and helping them navigate a fragmented health care system. As the needs of older adults become more complex, the caregiving role also intensifies, often resulting in a detrimental impact on caregiver well-being. Currently, the health care system is not well-equipped to address the complex care needs of the rapidly growing and diverse older adult population in the United States.</p>
